Heather:

Thank you for sending the DKS report for April.

We note that Bentley is not in compliance with vehicle limits for the morning period so far this trimester. The monitor's observation is consistent with what neighbors observe on the street everyday. Bentley's use of carpools has decreased steadily over time since the granting of the CUP and the limited observation and averaging regimen that was approved at that time. The goals of the Planning Commissioners to reduce the school's footprint in the neighborhood and the school's declared intention to do so, have fallen by the wayside.

Even if the school gets the number of vehicles down to achieve the vehicle limit averaged over 4 months, the reality is that they are teetering at the fringe of compliance on a regular basis. We encourage you to remind the school of the requirements and the need to stay consistently below the vehicle limits.

In addition, we note that the monitors did not observe any special events this month. What is the status of the prior notification of non compliance in regard to their past performance on special events?

Thank you,

Linda
