Thanks. When Gordon and I met with Alex Koplevich a few weeks ago, he seemed to be under the impression that it was 71 employees at any one time. We said that that wasn't our understanding-- and recommended that he review the videotape of the Planning Commission meeting in 2011(?) when the Transportation Plan was approved and the number of employees was set at 71 full and part time--with part-time being counted as one employee.

We asked him that if the Headmaster in Oakland, who is an all school employee,is counted as one employee, why aren't the other all-school employees also counted. Alex said that when he comes to campus, Arlene is not there (hence the 71 at any one time.) But that is a different understanding than ours. So we agree that finding out how frequently all school staff come to Oakland and how long they stay is pertinent.

He did tell us that when they moved administrative staff off to Lafayette, they hold their meetings in Lafayette. He also said that the middle school coaches and some of the music teachers who used to be in Oakland are now in Lafayette, and that they bus the students to Lafayette for practice.

We want you to know that Gordon and I are working hard to establish a positive working relationship with Alex, and that he is interested in the same. It is our mutual goal to really turn around the trust issue.

We shared with Alex that a big step in that direction would be for the school to address the tree/view issues that the neighbors have been concerned about for the past 6 years. The neighbors have agreed to pay for the trimming or removal of the trees, but Bentley, to date, has not agreed to discuss that with us. I am hopeful that he will help move it forward. There are two huge Redwoods that even Chris Patillo has said should be removed to deal with the issues-- topping would only cause them to grow wider and encroach further on neighbors' views. These two trees impact most of the residents in Hiller Highlands Homes Association.

Anyway, thanks for forwarding this to us.

Sue

We just want to keep our records up to date. Thanks!
