Kori: Thank you for the response. The car in question was a Toyota sedan. After turning in my driveway He parked in front of the Pipers house, hanging over the edge of the driveway because there wasn't actually a space large enough to park.

Is there a way for you to determine how many cars are using the drop off line so that you can increase that number especially during the busy times you mention?

Linda

We continue to keep families aware, weekly, of necessary steps to take to be a good neighbor including not using neighbors' driveways for their turns. The event that you describe was not witnessed by a monitor, nor am I aware of which home is yours. This is a very busy time in the neighborhood especially with Kaiser's dismissal at 3pm too. It is not conclusive the afternoon line of cars belong entirely to Bentley. We will continue to urge parents to utilize the drop-off/pick-up lane through both group and direct communication.
