Kori:

Is the Estimated Number of Guests column being used to mean the number of cars (not people) you expect on Hiller for an event? In the past the school has not used shuttles for events with 50 guests. It would be helpful to know how many people will attend the school event because that would forecast the level of pedestrian and shuttle activity expected in the neighborhood.

Knowing the hours of the events rather than the AM/PM description would also help neighbors plan for their own events and guests around the school events.

Thank you,
Linda Harris
