Subject:	Re: Approval of the Portal Delineators and Bentley School"s Revised TDM
Date:	Monday, May 20, 2013 3:54:39 PM

Dear Heather,

Thank you for sending the Revised TDM dated 5/17/2013.

On Page 11, the report states, "The Portable Delineators shall be placed along the drop-off/pick-up lane for a length of approximately 200-250 feet...The Portable elineators shall be spaced at intervals small enough to prevent cars from driving between them and exiting the lane prematurely. All cars must continue through to the end of the lane to exit. This is consistent with the requirements and recommendations from the Oakand Police Department Traffic Division."

At the May 16th NLC meeting, the subject of cars exiting the "curb lane" and entering the moving traffic was discussed (I sent you a copy of the Draft Minutes of the meeting this morning). Currently, the Portable Delineators are are not placed close enough to prevent cars from driving between them. Cars do pull away from the curb and enter moving traffic. Cars are not remaining behind the Portable Delineators. They do not drive through to the end of the exit lane.

I'm pleased to learn that cars must remain in the curb lane and exit only at the south end of the curb lane. It will be much safer for everyone.

Sincerely,

Donna Karch on behalf of NSHH
