Dear Kori,

A few months ago Arlene suggested adding a traffic monitor on the hill area. Her suggestion, if implemented, could eliminate the use of neighbor's driveways and U-turns.

Something to consider.

Donna

Dear Donna,

Yesterday's traffic was out of the ordinary due to a lag in the final dismissal. An additional notice has been sent to teachers to continue their diligence in assuring the dismissal times are respected. We continue to insist to our students to make the transition from class to the pick-up line in a timely manner.

I will investigate the owner of the Silver Honda SUV and send them a traffic strike about using neighbor driveways. The school sends weekly traffic tips to the Bentley Community including appropriate places to make u-turns. Per the CUP, traffic monitors are assigned specific stations on the flat portion of Hiller drive, in the circle drive, and at it's entrance making it difficult to verbally warn drivers up the hill.

Sincerely,
Kori

The traffic was backed up, in both directions, from the intersection (Hiller/Tunnel/Caldecott) to the school. Several cars were stopped along the "no parking" side of the road (uphill direction) of Hiller Drive. I honked at them, and they moved, which enabled me to continue driving up the hill.
