Marco,

In evidence of unprofessional cooperation and bias against me, Mr. Garcia has not yet responded to my email questions below. My staff is going through tremendous aggravation with the back freight elevator at PAB disabled for going on 2 months now.

I was told by Mr. Garcia that the state had red tagged the elevator and taken it out of operation.

We want to simply know, when is the date of expected repairs for this elevator? My staff is being beat up by the extra manual labor involved with this elevator down. So, can you answer the question where Mr. Garcia refuses to engage professional courtesy.

Harold

Staff,

1). has informed me that freight elevator #4 seems to be inoperable. Can you please check this out?

2). also, a couple of weeks ago you told me that the back freight elevator was in need of a part. But you did not mention or provide an estimated time of repair. Can you tell us when do you expect repairs to be started on this particular elevator? It has been down for a month or so and is causing major operational disruptions for my staff.
