1 **WHEREAS:**

- 2
- 3 A. On January 15, 2009, Plaintiff United States of America (“United States”), on behalf of
- 4 the United States Environmental Protection Agency (“EPA”), and Plaintiff People of the
- 5 State of California ex rel. California State Water Resources Control Board (“State Water
- 6 Board”) and California Regional Water Quality Control Board, San Francisco Bay
- 7 Region (“Regional Water Board” and, with the State Water Board, the “Water Boards”)
- 8 filed a Complaint against the Defendant East Bay Municipal Utility District (“EBMUD”)
- 9 pursuant to Section 309 of the Clean Water Act (“CWA”), 33 U.S.C. § 1319, and Cal.
- 10 Water Code Sections 13376, 13385 and 13386 (“EBMUD Complaint”). The case was
- 11 assigned the Civil No. 09-00186 (“EBMUD Litigation”).
- 12 B. The EBMUD Complaint alleges that EBMUD has discharged pollutants without a
- 13 permit in violation of CWA Section 301(a), 33 U.S.C. § 1311(a), and Cal. Water Code
- 14 Section 13376, and has discharged pollutants in violation of the terms and conditions of
- 15 its National Pollutant Discharge Elimination System (“NPDES”) Permits. The
- 16 Complaint further alleges that EBMUD would not be able to comply with its next
- 17 NPDES Permit, which was proposed on November 14, 2008, and issued on January 14,
- 18 2009.
- 19 C. On March 4, 2009, the Court granted the Motion to Intervene of both San Francisco
- 20 Baykeeper and Our Children’s Earth Foundation (together, “Intervenors”) in the
- 21 EBMUD Litigation.
- 22 D. EBMUD receives wastewater from seven East Bay wastewater collection agencies,
- 23 including City of Alameda, City of Albany, City of Berkeley, City of Emeryville, City of
- 24 Oakland, City of Piedmont, and the Stege Sanitary District (collectively “Satellites”),
- 25 with a total population of approximately 650,000. Each Satellite owns and operates its
- 26 own wastewater collection system, which delivers wastewater to EBMUD’s Interceptor
- 27 System. The Interceptor System transports wastewater to EBMUD’s year-round main
- 28

1 wastewater treatment plant near the eastern anchorage of the Bay Bridge (“MWWTP”).
2 During wet weather, EBMUD at times discharges wastewater from three wet weather
3 facilities, located at 5597 Oakport Street, Oakland; 2755 Point Isabel Street, Richmond;
4 and 225 5th Avenue, Oakland (collectively the “WWFs”). The Satellites’ and EBMUD’s
5 connected wastewater conveyance systems shall be referred to collectively as the
6 “Regional Wastewater Collection and Transmission System.”

7 E. The WWFs were built pursuant to EPA’s June 18, 1986, letter to the Regional Water
8 Board, determining that wet weather overflows from EBMUD’s Interceptor System were
9 subject to Best Conventional Pollution Control Technology and Best Available
10 Technology Economically Achievable (collectively, “Best Technology”) under CWA §
11 301(b)(1)(C) and § 301(b)(2), and San Francisco Bay Water Quality Control Plan water
12 quality standards, based on the conclusion that the WWFs functioned like combined
13 sewers. Extensive studies performed under the oversight of the regulators reached the
14 consensus conclusion that Best Technology included the WWFs. Therefore, starting in
15 1987, based on regulatory guidance from EPA and the Regional Water Board, EBMUD
16 built the WWFs at a cost of hundreds of millions of dollars. The WWFs – completed in
17 1990, 1994 and 1996 – provide treatment in the form of solids removal and disinfection,
18 but do not provide secondary treatment before discharge to the San Francisco Bay. On
19 September 7, 2004, EPA described the conclusion in its June 18, 1986 letter that the
20 WWFs functioned as combined sewers as error. It concluded that, because the Regional
21 Wastewater Collection and Transmission System is in fact separate from the stormwater
22 sewer system, the WWFs are publicly owned treatment works (“POTW”) and their
23 discharges require secondary treatment. Defendants do not agree with these conclusions.

24 F. Discharges from the WWFs were permitted until EBMUD’s newest permit became
25 effective on January 14, 2009. On its own motion, the State Water Board reviewed a
26 September 2005 permit issued by the Regional Water Board which continued to allow
27 discharges from the WWFs. The State Water Board found that EBMUD constructed the
28

WWFs “in reliance on” EPA’s 1986 letter. The State Water Board concluded that the WWFs are POTWs and concurred with EPA’s 2004 assertion that the conclusions of the 1986 letter were erroneous. It further concluded that the permit was inconsistent with the mandates of the CWA and its implementing regulations because it allowed WWF Discharges without secondary treatment and failed to ensure compliance with applicable water quality standards. The State Water Board expressed concern that the WWF Discharges do not meet treatment levels that are adequate to protect water quality and meet CWA requirements. The State Water Board stated that: (1) the WWFs are located in a highly urbanized area, and discharges from the facilities, though intermittent, have been of appreciable quantity and frequency; (2) the WWFs discharge to receiving waters used extensively for both contact and non-contact water recreation; and (3) two of the WWFs discharge to receiving waters that are beneficially used for shellfish harvesting. The State Water Board remanded the permit to the Regional Water Board for revision consistent with its decision. Thereafter, the Regional Water Board issued an amended permit prohibiting discharges from the WWFs and adopted a Cease and Desist Order (“CDO”) with requirements and time schedules for EBMUD to cease discharging from the WWFs.

G. The Satellites also worked under CDOs issued by the Regional Water Board to reduce Inflow and Infiltration coming into their systems by making capital expenditures and plans to rehabilitate their systems from 1986 forward, spending upwards of \$335 million collectively, and reducing Inflow and Infiltration reaching the EBMUD Interceptor System by 29% prior to 2007.

H. Inflow and Infiltration of stormwater into the Collection Systems and Sewer Laterals during severe wet weather events – via cross-connections, cracks and other imperfections in system pipes, joints and manholes – can lead to a greater-than-10-fold increase in the volume of wastewater that reaches EBMUD’s Interceptor System. During such severe wet weather events, partially treated discharges from the WWFs sometimes

1 occur. Such discharges were prohibited after January 14, 2009.

2 I. On July 22, 2009, this Court entered a Stipulated Order (“EBMUD SO”) in the EBMUD
3 Litigation requiring EBMUD to take certain interim steps to address the alleged
4 violations in the EBMUD Complaint. EBMUD has been performing the work required
5 under the Stipulated Order since that time.

6 J. Reduction of Inflow and Infiltration requires the active participation of the Satellites.
7 On December 3, 2009, the United States, on behalf of EPA, filed a Complaint against the
8 Satellites pursuant to Section 309 of the CWA, 33 U.S.C. § 1319, in *United States, et al.*
9 *v. City of Alameda, et al.*, No. C 09-05684 RS (“Satellite Litigation”).

10 K. The Complaint filed in the Satellite Litigation alleged that the Satellites have discharged
11 pollutants without a permit in violation of CWA Section 301(a), 33 U.S.C. § 1311(a),
12 and have discharged pollutants in violation of the terms and conditions of their NPDES
13 Permits. The Complaint joined the State of California to this action pursuant to Section
14 309(e) of the CWA, 33 U.S.C. § 1319(e).

15 L. On January 22, 2010, the Court granted the motion to intervene by San Francisco
16 Baykeeper (“Baykeeper”), and ordered Baykeeper to file its Complaint in Intervention
17 forthwith. Defendants filed a challenge in opposition to Baykeeper’s motion for
18 intervention, but on August 26, 2010, Baykeeper filed a stipulation on behalf of itself
19 and the Satellites acknowledging Baykeeper’s status as Intervenor. On August 27, 2010,
20 the Court entered an Order granting the relief requested in the stipulation.

21 M. On March 15, 2011, the United States, on behalf of EPA, filed a First Amended
22 Complaint (“Amended Satellite Complaint”). In the Amended Satellite Complaint, the
23 People of the State of California ex rel. Water Boards, realigned as a Plaintiff and added
24 State law claims to the Complaint against the Satellites pursuant to California Water
25 Code Sections 13376, 13385 and 13386.

26 N. In the Amended Satellite Complaint, the United States and the Water Boards allege that
27 Sanitary Sewer Overflows (“SSOs”) from the Collection System of each Satellite had
28

1 occurred in violation of the terms and conditions of the NPDES permits regulating
2 discharges from the Collection Systems, and in violation of the Clean Water Act. The
3 United States and the Water Boards also allege that each Satellite violated the terms and
4 conditions of its NPDES permit regulating discharges from its Collection System by
5 operating and maintaining its Collection System in such a manner that the Collection
6 System causes or contributes to discharges from the WWFs; the Satellites disagree.

7 O. On September 6, 2011, this Court entered a Stipulated Order (“Satellites SO”) in the
8 Satellite Litigation requiring the Satellites to take certain interim steps to address the
9 alleged violations in the Amended Satellite Complaint. The Satellites have been
10 performing work required under the Stipulated Order since that time.

11 P. Since approximately 2004, as part of administrative enforcement actions taken by the
12 Regional Water Board, EBMUD has paid the Regional Water Board roughly \$541,851
13 in penalties for some of its violations, including effluent limit exceedances and SSOs.

14 Q. In 2011, as part of an administrative enforcement action taken by the Regional Water
15 Board, Oakland paid the Regional Water Board \$280,000 in penalties for some of its
16 SSOs.

17 R. On May 20, 2013, the Court consolidated the EBMUD Litigation and the Satellite
18 Litigation.

19 S. The Work required by this Consent Decree represents a comprehensive regional asset
20 management approach by eight different agencies and is based on complex and evolving
21 hydrologic and hydraulic modeling. The term of this Consent Decree, including the
22 ultimate compliance deadline for eliminating discharges from the last WWF by the end
23 of 2035 (as demonstrated by the Final Compliance WWF Output Test in 2036),
24 represents the Parties’ mutual understanding regarding an achievable timeline based on
25 current information.

26 T. Under this Consent Decree, EBMUD will implement an Urban Runoff Diversion Project
27 (Section XVII) to offset harm from the WWF Discharges that may continue to occur
28

1 until the Defendants meet the final compliance deadline. The Urban Runoff Diversion
2 Project serves as mitigation, and is one of the reasons Plaintiffs have agreed to the
3 ultimate deadline for eliminating discharges from the last WWF.

4 U. Defendants do not admit any liability to Plaintiffs or to Intervenor for the transactions
5 or occurrences alleged in the Complaints. Defendants are operating under NPDES
6 permits from the Regional Water Board, some of the terms of which they contest in
7 proceedings pending before the State Water Board. Such proceedings are being held in
8 abeyance by the State Water Board and will be dismissed, along with petitions filed by
9 Intervenor, within 90 Days after the Effective Date of this Consent Decree pursuant to
10 Section XXIV of this Decree (Effect of Settlement/Reservation of Rights). Nothing in
11 this Consent Decree modifies or affects the rights of third parties or property owners, or
12 the defenses available to Defendants, with respect to damages to private property
13 allegedly caused by SSOs.

14 V. The Parties desire to avoid further litigation and to work cooperatively on issues relating
15 to SSOs and wet weather flows. The Parties now wish to implement a final remedy to
16 address the alleged violations.

17 W. To comply with the provisions of this Consent Decree, Defendants are obligated to
18 perform Work. To pay for their share of the Work needed to comply with a valid federal
19 court order entered for the purpose of facilitating compliance with the Clean Water Act,
20 Defendants intend to rely on funds generated through levying taxes, fees and/or
21 assessments.

22 X. The Parties recognize, and the Court by entering this Consent Decree finds, that (1) this
23 Consent Decree has been negotiated by the Parties in good faith and will resolve the
24 claims stated in the Complaints, and (2) this Consent Decree is fair, reasonable, and in
25 the public interest.

26 **NOW, THEREFORE, IT IS HEREBY ADJUDGED, ORDERED, AND DECREED** as
27 follows:

I. JURISDICTION AND VENUE

1. For purposes of enforcement of this Consent Decree only, Defendants agree that this Court has jurisdiction over the subject matter of the consolidated actions pursuant to 28 U.S.C. §§ 1331, 1345, 1355, and 1367, Sections 309(b) and 505(b)(1)(B) of the CWA, 33 U.S.C. §§ 1319(b), 1365(b)(1)(B), and Sections 13376, 13385 and 13386 of the California Water Code; and the Court has jurisdiction over the Parties. Venue lies in this District pursuant to Section 309(b) of the CWA, 33 U.S.C. § 1319(b), and 28 U.S.C. §§ 1391(b) and 1395(b), because this is the District in which Defendants are located. For purposes of enforcement of this Consent Decree only, Defendants agree that the Complaints state claims upon which relief may be granted pursuant to the CWA and the California Water Code.
2. Notice of the commencement of the consolidated actions was provided to the Regional Water Board pursuant to Section 309(b) of the CWA, 33 U.S.C. § 1319(b).

II. APPLICABILITY

3. The provisions of this Consent Decree shall apply to and be binding upon the Parties and any successors, assignees, transferees, purchasers, or other entities or persons otherwise bound by law.
4. Each Defendant shall provide a copy of this Consent Decree to all officers, employees, and agents whose duties might reasonably include compliance with any provision of this Consent Decree. Defendants may comply with the preceding sentence by providing a link to a website. In any contract any Defendant enters into for the performance of any of the Work, the Defendant shall require the contractor to perform the Work in compliance with the terms of this Consent Decree.
5. In any action to enforce this Consent Decree, no Defendant shall raise as a defense the failure by any of its officers, directors, employees, contractors, or agents to perform the Work.
6. Each Defendant shall provide a copy of this Consent Decree to any successor in interest at least 30 Days prior to transfer of that interest, and simultaneously shall verify in writing to

1 Plaintiffs that such notice has been given. Absent agreement of the Parties or order of the
 2 Court, any sale or transfer of a Defendant's interests in, or operating role with respect to, the
 3 Regional Wastewater Collection and Transmission System shall not in any manner relieve
 4 that Defendant of its responsibilities for meeting the terms and conditions of this Consent
 5 Decree.

6 **III. OBJECTIVES**

- 7 7. The express purpose of the Parties entering into this Consent Decree is for Defendants to
 8 take all necessary measures, consistent with the objectives of the CWA as set forth in
 9 Section 101 of the Act, 33 U.S.C. § 1251, and with the objectives of the Porter-Cologne
 10 Water Quality Control Act as set forth at California Water Code Sections 13000, 13001,
 11 13370, and 13372 ("Porter-Cologne Act"), to achieve compliance at the completion of the
 12 Work with the CWA and Porter-Cologne Act, the regulations promulgated thereunder, and
 13 NPDES Nos. CA0038440, CA0038474, CA0038471, CA0038466, CA0038792,
 14 CA0038512, CA0038504, and CA0038482. The actions set forth herein are in furtherance of
 15 the goals of eliminating discharges from the WWFs and of eliminating SSOs. All plans,
 16 reports, construction, remedial maintenance, and other obligations in this Consent Decree,
 17 and under any amendment to this Consent Decree, shall have the objective of ensuring that
 18 the Defendants comply with the CWA and the Porter-Cologne Act, all applicable federal
 19 and State regulations, and the terms and conditions of NPDES Permit Nos. CA0038440,
 20 CA0038474, CA0038471, CA0038466, CA0038792, CA0038512, CA0038504, and
 21 CA0038482.

22 **IV. DEFINITIONS**

- 23 8. Unless otherwise defined herein, terms used in this Consent Decree shall have the meaning
 24 given to those terms in the CWA, 33 U.S.C. §§ 1251 et seq., and the regulations
 25 promulgated thereunder. Whenever terms set forth below are used in this Consent Decree,
 26 the following definitions shall apply:

1 **“Acute Defect”** shall mean a failure in a sewer pipe in need of an urgent response to
2 address an imminent risk of an SSO.

3 **“Amended Satellite Complaint”** shall mean the complaint filed by the United
4 States in the Satellite Litigation on March 15, 2011, as amended to realign the Water Boards
5 as a Plaintiff and to add State law claims.

6 **“Asset Management Implementation Plan,” or “AMIP,”** shall mean the plan
7 describing a Satellite’s schedules and protocols for inspection, maintenance and Repair and
8 Rehabilitation of its Collection System submitted by a Satellite and approved by EPA under
9 Sections VI through XIII of the Satellite SO, and any amendments to such plans as are
10 approved by EPA, after consultation with the Regional Water Board, under Section XIX of
11 this Consent Decree (Review and Approval of Deliverables).

12 **“Baseline WWF Output”** shall mean the volume of discharge for each WWF as
13 predicted for the December 5, 1952 Storm by the Flow Model, as calibrated using flow
14 monitoring data from the 2009-2010 and 2010-2011 Wet Seasons.

15 **“Baykeeper”** shall mean San Francisco Baykeeper.

16 **“Building/Private Property Backup”** shall mean a Sanitary Sewer Overflow in the
17 form of wastewater release or backup into a building or onto private property that is caused
18 by blockages, flow conditions, or other malfunctions in the Regional Wastewater Collection
19 and Transmission System. A wastewater backup or release that is caused by blockages,
20 flow conditions, or other malfunctions of a private Sewer Lateral is not a Building/Private
21 Property Backup for purposes of this Decree.

22 **“Calendar Year”** shall mean the period starting January 1st through the ensuing
23 December 31st.

24 **“Capital Improvement Plan”** shall mean a plan adopted by a Defendant for
25 financing and constructing public improvements.
26
27
28

1 **“Cleanout”** shall mean a pipefitting and associated piping connected to a Sewer
2 Lateral that provides access to the Sewer Lateral for purposes of flushing, rodding, cleaning,
3 and other maintenance and diagnostic purposes.

4 **“Collection System”** shall mean all parts of the wastewater collection system owned
5 or operated by a Satellite that are intended to convey domestic or industrial wastewater to
6 EBMUD’s Interceptor System and the MWWTP, including, without limitation, Sewer
7 Mains, pipes, Pump Stations, lift stations, Maintenance Holes, Force Mains, siphons and
8 appurtenances to each of the above.

9 **“Complaints”** shall mean the EBMUD Complaint, as amended, the EBMUD
10 Complaint in Intervention, the Amended Satellite Complaint, and the Satellite Complaint in
11 Intervention.

12 **“Compliance Certificate”** shall mean a document issued by EBMUD under the
13 Amended Regional Ordinance, or under the Regional Ordinance as it existed prior to
14 amendment – or by a Satellite under its respective Local Ordinance – certifying that the
15 Sewer Lateral in question is in compliance with the applicable standards.

16 **“Condition Assessment Plan”** shall mean a written plan (including a schedule) for
17 testing to assess the condition of Upper Sewer Laterals where Upper Sewer Laterals
18 exceeding 1,000 feet in total combined length are present at any parcel of real property or
19 group of two or more contiguous or directly adjacent parcels of real property under common
20 ownership.

21 **“Consent Decree”** shall mean this Final Consent Decree, including all appendices
22 hereto and any modifications hereto adopted pursuant to this Consent Decree.

23 **“Corrective Action Plan”** shall mean a written plan describing the type, quantity
24 and schedule of work needed to bring into compliance all Upper Sewer Laterals, and where
25 required by Local Ordinance, Lower Sewer Laterals assessed under a Condition Assessment
26 Plan and found to be out of compliance with any applicable Regional Ordinance or Local
27 Ordinance provision.

1 **“Current WWF Output”** shall mean the volume of discharge for each WWF as
2 predicted for the December 5, 1952 Storm by the Flow Model, as calibrated at the time in
3 question.

4 **“CWA”** shall mean the Clean Water Act, 33 U.S.C. §§ 1251 et seq.

5 **“Day,”** regardless of whether it is capitalized, shall mean a calendar day unless
6 expressly stated to be a working day. In computing any period of time under this Consent
7 Decree, where the last day would fall on a Saturday, Sunday, or federal or State holiday, the
8 period shall run until the close of business of the next working day. Wherever this Consent
9 Decree requires an act to be performed by a specified date (e.g., by December 31, 2011 or
10 by August 31st of each year), and the date falls on a Saturday, Sunday, or federal or State
11 holiday, the time for performing the act shall be extended until the close of business of the
12 next working day.

13 **“Defendants”** shall mean the East Bay Municipal Utility District, the Cities of
14 Alameda, Albany, Berkeley, Emeryville, Oakland and Piedmont, and the Stege Sanitary
15 District.

16 **“Deliverable”** shall mean any written report or other document required to be
17 submitted to EPA for review and comment, or for review and approval in consultation with
18 the Regional Water Board, pursuant to this Consent Decree, including but not limited to the
19 EBMUD Technical Memorandum regarding the East Bay December 5, 1952 Storm Rainfall
20 Definition dated February 4, 2014.

21 **“December 5, 1952 Storm”** shall mean the simulated rainfall event described in the
22 EBMUD Technical Memorandum regarding the East Bay December 5, 1952 Storm Rainfall
23 Definition dated February 4, 2014.

24 **“EBMUD”** shall mean East Bay Municipal Utility District.

25 **“EBMUD Complaint”** shall mean the complaint filed on January 15, 2009, in the
26 EBMUD Litigation.

1 **“EBMUD Complaint in Intervention”** means the complaint filed by Baykeeper
2 and Our Children’s Earth Foundation on March 4, 2009 in the EBMUD Litigation.

3 **“EBMUD Litigation”** shall mean *United States, et al. v. East Bay Municipal Utility*
4 *District*, Case No. 3:09-cv-0186-RS (N.D. Cal.)

5 **“EBMUD SO”** shall mean the Stipulated Order entered in the EBMUD Litigation
6 by the Court on July 22, 2009, requiring EBMUD to take certain actions with regard to the
7 Regional Wastewater Collection and Transmission System.

8 **“EBMUD’s Interceptor System”** shall mean all transmission systems, including all
9 pipes, interceptors, Force Mains, Gravity Sewer Lines, lift stations, Pump Stations,
10 Maintenance Holes, siphons and appurtenances thereto, that are owned or operated by
11 EBMUD.

12 **“Effective Date”** is that date established in Section XXVII of this Consent Decree.

13 **“Effective RWP”** shall mean an RWP (“Revised Work Plan”) that revises the Work
14 program to meet the performance benchmarks set forth in Paragraph 133.2 for the second
15 Mid-Course Check-In WWF Output Test, if it has not yet occurred, and the Final
16 Compliance WWF Output Test. The determination of whether an RWP is an Effective
17 RWP shall be undertaken in light of the Objectives of this Consent Decree, the CWA and
18 the Porter-Cologne Act, the regulations promulgated thereunder, and all relevant EPA and
19 Water Board guidance (including, without limitation, any then-effective affordability
20 guidance), and plans and policies issued pursuant to the Acts and their implementing
21 regulations. Consideration of whether an RWP is an Effective RWP will include, among
22 other things, consideration of any information presented by Defendants on whether
23 infrastructure investments are cost-effective over their life cycle, are resource efficient, and
24 are consistent with community sustainability goals.

25 **“EPA”** shall mean the United States Environmental Protection Agency.

26 **“Fiscal Year”** shall mean the year running from July 1st through the ensuing June
27 30th.

1 **“Flow Model”** shall mean the hydrologic and hydraulic model (described in Chapter
 2 3 of the FMLR and updated from time to time) that (a) takes inputs relating to weather
 3 conditions (such as the December 5, 1952 Storm) and EBMUD’s Interceptor System
 4 operating parameters, and (b) predicts flows in the Regional Wastewater Collection and
 5 Transmission System and at the MWWTP and WWFs. The Flow Model shall be
 6 maintained, improved as appropriate, and annually re-calibrated pursuant to the “Flow
 7 Model Calibration” paragraphs of the “EBMUD WORK” Section of this Decree by
 8 EBMUD.

9 **“FMLR”** shall mean the September 2012 Revised Final Flow Modeling and Limits
 10 Report EBMUD submitted to Plaintiffs on September 7, 2012 pursuant to the EBMUD SO.

11 **“FOG”** shall mean fats, oils and grease.

12 **“Force Main”** shall mean any pipe that receives and conveys, under pressure,
 13 wastewater from the discharge side of a pump.

14 **“Gravity Sewer Line”** shall mean a pipe that receives, contains and conveys
 15 wastewater not normally under pressure, but is intended to flow unassisted under the
 16 influence of gravity.

17 **“High Priority Source”** shall mean a source of Inflow or Rapid Infiltration
 18 identified through EBMUD’s RTSP the elimination of which is necessary based on the Flow
 19 Model, either alone or in combination with other sources of Inflow or Rapid Infiltration, to
 20 ensure that the Defendants satisfy the Mid-Course Check-In WWF Output Tests and
 21 eliminate the WWF Discharges by the compliance deadlines as specified in Paragraph 16 of
 22 this Consent Decree. EBMUD shall make the determination as to whether a source of Inflow
 23 or Rapid Infiltration is a High Priority Source for the Satellites, except for Oakland.
 24 Oakland shall make the determination in its jurisdiction as to whether a source of Inflow or
 25 Rapid Infiltration is a High Priority Source. High Priority Sources shall consist of three
 26 categories:

1 **“Linear High Priority Source”** shall mean a High Priority Source, the
2 elimination of which requires Sewer Main Rehabilitation or Repair.

3 **“Non-Linear High Priority Source”** shall mean a High Priority Source in
4 the Collection System, or connections to the Collection System of storm sewers, streams, or
5 other similar sources, the elimination of which requires Work other than Sewer Main
6 Rehabilitation or Repair.

7 **“Private High Priority Source”** shall mean a High Priority Source not in the
8 Collection System including, but not limited to, an illicit connection.

9 **“Infiltration”** shall mean water other than wastewater that enters a sewer system
10 during wet weather conditions from the ground through such means as defective pipes, pipe
11 joints, connections, or Maintenance Holes.

12 **“Inflow”** shall mean water other than wastewater that enters a sewer system during
13 wet weather conditions from illicit or unpermitted sources other than Infiltration, such as,
14 but not limited to, roof leaders, foundation drains, yard drains, area drains, drains from
15 springs and swampy areas, Maintenance Hole covers, cross connections between storm
16 sewers and sanitary sewers, catch basins, cooling towers, storm water, surface runoff, street
17 wash waters, or drainage.

18 **“Inflow and Infiltration” or “I&I”** shall mean all water from both Infiltration and
19 Inflow without distinguishing the source.

20 **“Intervenors”** shall mean San Francisco Baykeeper and Our Children’s Earth
21 Foundation.

22 **“Local Ordinance”** shall mean a Sewer Lateral ordinance enacted by a Satellite that
23 is similar to the Amended Regional Ordinance. A Local Ordinance shall be designed to
24 work in conjunction with the Amended Regional Ordinance or, if a Satellite is not a
25 Regional Sewer Lateral Program Participant, independently from it. A Local Ordinance
26 enacted by a Regional Sewer Lateral Program Non-Participant must be no less stringent than
27 the Amended Regional Ordinance.
28

1 **“Lower Sewer Lateral” or “Lower Lateral”** shall mean the portion of the Sewer
2 Lateral extending from the property line or the Cleanout near the curb to the Sewer Main.
3 The Lower Sewer Lateral includes the connection to the Sewer Main.

4 **“Maintenance Hole” or “Manhole”** shall mean any appurtenance or structure that
5 allows direct access to a Sewer Main or Interceptor.

6 **“MS4 Permit”** shall mean the Municipal Regional Stormwater NPDES Permit
7 (NPDES Permit No. CAS612008), issued by the Regional Water Board on October 14, 2009
8 as Final Order R2-2009-0074, and amended by Order No. R2-2011-0083 on November 28,
9 2011.

10 **“MWWTP”** shall mean the municipal wastewater treatment plant located at 2020
11 Wake Avenue, Oakland, California, owned and operated by EBMUD, and permitted under
12 NPDES Permit No. CA0037702. The MWWTP includes all components of such wastewater
13 treatment plant.

14 **“NPDES Permits”** shall mean those permits issued to Defendants bearing NPDES
15 Permit Nos. CA0038440, CA0038474, CA0038471, CA0038466, CA0038792, CA0038512,
16 CA0038504, and CA0038482.

17 **“Output Ratio”** shall mean the ratio of a WWF’s Current WWF Output to its
18 Baseline WWF Output, expressed as a percentage.

19 **“Paragraph”** shall mean a portion of this Consent Decree identified by an Arabic
20 numeral.

21 **“Parties”** shall mean the United States, the State Water Board, the Regional Water
22 Board, Our Children’s Earth Foundation, Baykeeper, EBMUD and each of the Satellites.

23 **“Performance Evaluation Plan” or “PEP”** shall mean a plan prepared by
24 Defendants for investigation and identification of appropriate corrective measures in the
25 event the results of any Mid-Course Check-in WWF Output Test show that the Work is not
26 meeting this Consent Decree’s Objectives – as more specifically explained in Section XVI
27
28

1 (WWF Output Tests) – to eliminate discharges during a December 5, 1952 Storm from any
2 WWF(s) by the compliance deadline(s) prescribed by this Consent Decree.

3 a. The PEP shall include processes that require the sharing of data among
4 EBMUD and the Satellites. The PEP shall explain what data will be collected and how it
5 will be used to design changes to the Work to eliminate discharges during a December 5,
6 1952 Storm from each WWF by the date prescribed by this Decree. The PEP shall not
7 presuppose any particular approach to meeting the prescribed compliance deadline for any
8 WWF.

9 b. The PEP shall include a separate data-collection plan for each WWF, and
10 each separate data-collection plan shall identify the specific locations of data-collection
11 devices and explain how the locations were chosen to provide sufficient and representative
12 data regarding the portions of the Collection Systems that influence discharges from the
13 WWF in question.

14 c. The PEP shall include procedures for calibration, maintenance and repair of
15 flow-monitoring devices (flow-monitoring devices shall include flow monitors or other
16 alternative devices, data recording equipment, and any other ancillary equipment needed for
17 measurement and recording of flow data).

18 d. The PEP shall include procedures for monitoring rainfall totals, duration and
19 intensity as a function of time.

20 e. The PEP shall include (i) the number and location of existing and/or
21 proposed rainfall-measuring equipment sufficient for adjusting the radar rainfall data, (ii) a
22 recommended schedule for calibration, maintenance and interrogation of rainfall-measuring
23 equipment that is owned or controlled by a Defendant, and (iii) a paragraph explaining how
24 Defendants will determine that rainfall measuring equipment not owned or controlled by a
25 Defendant is adequately calibrated, maintained and interrogated.

1 f. The PEP shall identify places in the Regional Wastewater Collection and
2 Transmission System where Defendants propose to maintain flow monitors for the WWF in
3 question.

4 g. The PEP shall describe the flow monitoring devices or alternative devices
5 intended to be employed in the flow monitoring program including, but not limited to,
6 providing information on accuracy, reliability, and durability of the proposed monitoring
7 technology.

8 h. The PEP shall document the level of accuracy expected of the metering or
9 alternative equipment based upon manufacturer's data, and describe potential physical and
10 hydraulic conditions that may limit the in-situ flow monitoring accuracy or repeatability.

11 i. The PEP shall include a quality assurance/quality control element to identify
12 procedures designed to maximize the level of accuracy achieved.

13 j. The PEP shall include information as to the inventory of monitors or other
14 devices (and ancillary equipment) needed to implement the flow monitoring program
15 (including spare parts).

16 k. The PEP shall include a flow monitor (or alternative device) installation
17 schedule that shall provide for the completion of installation of flow monitoring or
18 alternative devices by December 1 of the Calendar Year in which a Mid-Course Check-In
19 WWF Output Test (pursuant to Section XVI(A)) is performed.

20 **"Plaintiffs"** shall mean the United States and the People of the State of California ex
21 rel. State Water Board and the Regional Water Board. The Water Boards are the only State
22 entities that are parties to this Consent Decree. Nothing in this Consent Decree shall be
23 construed to bind other State entities not a party to this Consent Decree.

24 **"Public Entity"** shall mean: (1) any city or county; (2) any special district or agency
25 of the State formed pursuant to general law or special act for the local or regional
26 performance of governmental or proprietary functions within limited boundaries; (3) any
27 agency or entity created pursuant to the Joint Exercise of Powers Act (Cal. Gov. Code §
28

6500, et seq.); (4) a school district or a community college district; (5) the University of California; (6) the California State University; (7) an air pollution control district or an air quality maintenance district; (8) a housing authority; and (9) any other entity with the capacity to own real property created by any of the above.

“Pump Station Reliability Plan” shall mean a report submitted by a Defendant as part of its Work relating to reliability of a Pump Station(s).

“Pump Station” shall mean facilities comprised of pumps that lift wastewater to a higher hydraulic grade line, including all related electrical, mechanical, and structural systems necessary to the operation of that pump station.

“Rapid Infiltration” shall mean Infiltration that is heavily influenced by rainfall and enters the sewer very quickly during storm events. Rapid Infiltration may appear similar to Inflow on a hydrograph.

“Regional Ordinance” shall mean EBMUD’s Regional Private Sewer Lateral Ordinance, EBMUD Ordinance No. 359-13, as may be amended from time to time.

“Regional Sewer Lateral Program” shall mean the program authorized by the Regional Ordinance under which EBMUD certifies Sewer Laterals within the jurisdictions of Regional Sewer Lateral Program Participants when certification is required under the Regional Ordinance, after the property owner completes all Repair or Rehabilitation needed to ensure the Sewer Laterals meet the performance standards in the Regional Ordinance and the Local Ordinance enacted by the relevant Regional Sewer Lateral Program Participant, and after the Sewer Laterals pass a verification test witnessed by EBMUD.

“Regional Sewer Lateral Program Participant” shall mean a Satellite that has provided consent for EBMUD to implement the Regional Sewer Lateral Program in its jurisdiction.

“Regional Sewer Lateral Program Non-Participant” shall mean a Satellite that has not provided consent for EBMUD to implement the Regional Sewer Lateral Program in

1 its jurisdiction and has retained responsibility for all aspects of implementing a Sewer
2 Lateral program.

3 **“Regional Standards”** shall mean a collection of details, specifications, and
4 practices, to be developed by Defendants, prescribing how the Work on Sewer Mains,
5 Manholes, and Sewer Laterals is to be performed so as to optimize the I&I reductions
6 resulting from the Work.

7 **“Regional Wastewater Collection and Transmission System”** shall mean the
8 entire system that includes: (1) the Collection Systems; and (2) EBMUD’s Interceptor
9 System.

10 **“Regional Water Board”** shall mean the California Regional Water Quality Control
11 Board, San Francisco Bay Region.

12 **“Rehabilitation” or “Rehabilitate”** shall mean:

13 a. For Sewer Mains: the complete renewal or reconstruction of a Sewer Main
14 from node to node, including Maintenance Holes;

15 b. For Sewer Laterals: the complete replacement or lining of an Upper Sewer
16 Lateral, or, where required by Local Ordinance as a prerequisite of obtaining a Compliance
17 Certificate, of the Upper Sewer Lateral and Lower Sewer Lateral;

18 c. For Lower Laterals: the complete replacement or lining of the Lower Lateral.

19 **“Repair”** shall mean:

20 a. For Sewer Mains: the Work of fixing a portion of a Sewer Main that does
21 not result in Rehabilitation of the Sewer Main;

22 b. For Sewer Laterals: the Work of fixing a portion of the Sewer Lateral that
23 does not result in Rehabilitation of the Upper Sewer Lateral, or, where required by Local
24 Ordinance as a prerequisite of obtaining a Compliance Certificate, of the Upper Sewer
25 Lateral and Lower Sewer Lateral.

26 **“Revised Work Plan” or “RWP”** shall mean a document prepared by a Defendant
27 or Defendants after two complete Wet Seasons of PEP implementation, presenting the data
28

1 gathered as a result of the implementation of a PEP, and prescribing revisions or additions to
2 the Work both to meet the performance benchmarks set forth in Paragraph 133.2 for the
3 second Mid-Course Check-in WWF Output Test, if it has not yet occurred, and to eliminate
4 discharges during a December 5, 1952 Storm from one or more WWFs by the dates
5 prescribed by this Decree. The development of the RWP shall not presuppose any particular
6 approach to meeting the prescribed compliance Output Ratio or deadline for any WWF.

7 a. The RWP shall summarize the data developed during the implementation of
8 the PEP. This shall include identifying any data gaps and discussing both (i) whether such
9 gaps are significant and (ii) appropriate methods to address significant gaps.

10 b. The RWP shall include a description of the modeling methodology and key
11 assumptions used.

12 c. The RWP shall propose revisions or additions – in light of the PEP results –
13 to the Work both to meet the performance benchmarks set forth in Paragraph 133.2 for the
14 second Mid-Course Check-in WWF Output Test, if it has not yet occurred, and to eliminate
15 discharges during a December 5, 1952 Storm from the WWFs by the dates prescribed by
16 this Decree. The RWP shall explain the bases for its conclusion that the prescribed Output
17 Ratios and compliance deadlines will be met and shall contain the information, including
18 modeling and data, supporting that conclusion. The RWP shall discuss all other alternatives
19 analyzed and rejected and shall explain the reasons for such rejections including, without
20 limitation, the relative cost-effectiveness of such alternatives and the proposed revisions or
21 additions to the Work. The RWP shall contain the information, including modeling and
22 data, supporting the proposed revisions or additions to the Work and the proposed rejection
23 of all other alternatives analyzed. The RWP may also contain any other information the
24 Defendant(s) wish Plaintiffs to consider during their evaluation of the RWP, including
25 information regarding the degree to which the proposed infrastructure investments are
26 cost-effective over their life cycle, are resource efficient, and are consistent with community
27 sustainability goals.
28

d. In describing the proposed revisions or additions to the Work, the RWP shall specify the tasks that must be performed, which Defendant is required to perform each task, the schedule for the performance of the tasks, and a proposal for any additional stipulated penalties that may be necessary to ensure timely and effective performance of the proposed revisions or additions to the Work. A RWP may include a proposed allocation of the cost of the revised Work among the Defendants.

“Sanitary Sewer Overflow” or “SSO” shall mean: (i) for the Satellites, any overflow, spill, or release of wastewater from a Collection System; and (ii) for EBMUD, any overflow, spill, or release of wastewater from EBMUD’s Interceptor System.

“Satellite” shall mean each city or district that owns or operates a Collection System from which EBMUD’s Interceptor System receives wastewater. As of the Effective Date, the Satellites are the cities of Alameda, Albany, Berkeley, Emeryville, Oakland and Piedmont, and the Stege Sanitary District.

“Satellite Complaint in Intervention” means the complaint filed by Baykeeper in the Satellite Litigation on January 28, 2010.

“Satellite Litigation” shall mean *United States, et al. v. City of Alameda, et al.*, Case No. 3:09-cv-05684-RS (N.D. Cal.).

“Satellite SO” shall mean the Stipulated Order entered in the Satellite Litigation by the Court on September 6, 2011, requiring the Satellites to take certain actions with regard to the Regional Wastewater Collection and Transmission System.

“Section” shall mean a portion of this Consent Decree (unless another document is specified) identified by an uppercase Roman numeral.

“Sewer Lateral” shall mean a pipe or pipes and appurtenances that carry sewage and liquid waste from the Structure(s) served to the Sewer Main. The Sewer Lateral includes the Upper Sewer Lateral, the Lower Sewer Lateral and the connection to the Sewer Main, and any appurtenances.

1 **“Sewer Main”** shall mean the portion of the Regional Wastewater Collection and
2 Transmission System that receives flows from Sewer Laterals. The Sewer Main does not
3 include any portion of a Sewer Lateral.

4 **“Sewer System Management Plans” or “SSMPs”** shall mean those plans required
5 by State Water Board Order No. 2006-003-DWQ or its successor.

6 **“State”** shall mean the State of California.

7 **“State Water Board”** shall mean the California State Water Resources Control
8 Board.

9 **“Structure”** shall mean any building or facility that is required to be provided with
10 public sewer service, or that is actually provided with public sewer service.

11 **“Sub-Basin”** shall mean the subdivision of sewer basins as established in the 1986
12 East Bay I&I Study, or as modified by changes in Collection System configuration due to
13 sewer improvements constructed since completion of the Study, or by more accurate
14 delineation of the boundaries established by the Study.

15 **“Three-Year-Average Output Ratio”** for a WWF shall mean the average of the
16 Output Ratios for each WWF for each of the three most recent years.

17 **“Time Extension Certificate”** shall mean a certificate issued by EBMUD or a
18 Satellite upon request, to a property owner, or to a transferee, that extends the deadline to
19 obtain a Compliance Certificate for up to 180 Days from the date the Time Extension
20 Certificate is issued. Time Extension Certificates may be issued only in connection with
21 Title Transfer transactions and are not renewable.

22 **“Title Transfer”** shall mean the sale or transfer of an entire real property estate or
23 the fee interest in that real property estate, not including (1) the sale or transfer of partial
24 interest, including a leasehold; (2) transfer by a fiduciary in the course of the administration
25 of a decedent's estates, guardianship, conservatorship, or trust; (3) transfers from one co-
26 owner to one or more other co-owners, or from one or more co-owners into or from a
27 revocable trust, if the trust is for the benefit of the grantor or grantors; (4) transfers made by
28

1 a trustor to fund an inter vivos trust; (5) transfers made to a spouse, to a registered domestic
 2 partner as defined in Section 297 of the California Family Code, or to a person or persons in
 3 the lineal line of consanguinity of one or more of the transferors; (6) transfers between
 4 spouses or registered domestic partners resulting from a decree of dissolution of marriage or
 5 domestic partnership, or a decree of legal separation or from a property settlement
 6 agreement incidental to a decree; (7) transfers from property owners to any financial
 7 institution as a result of a foreclosure or similar process.

8 **“United States”** shall mean the United States of America.

9 **“Upper Sewer Lateral” or “Upper Lateral”** shall mean the portion of the Sewer
 10 Lateral extending from the property line or the Cleanout near the curb to the Structure(s)
 11 served by that Sewer Lateral. If a Sewer Lateral connects to a rear or side yard Sewer Main
 12 located in an easement, or to a Maintenance Hole, the entire Sewer Lateral, including the
 13 connection to the Sewer Main or Maintenance Hole, is an Upper Sewer Lateral.

14 **“Water Boards”** shall mean the Regional Water Board and the State Water Board.

15 **“Wet Season”** shall mean the period from December 1 of one Calendar Year
 16 through April 15 of the following Calendar Year.

17 **“Work”** shall mean the activities Defendants are required to perform under Sections
 18 VI-XVIII of this Consent Decree, as they may be modified from time to time by the
 19 performance evaluation and Work plan revision process in Section XV, or pursuant to
 20 Section XXIX (Modification).

21 **“WWFs”** shall mean EBMUD’s three wet weather facilities, located at 2755 Point
 22 Isabel Street, Richmond (“Point Isabel WWF”), 225 5th Avenue, Oakland (“San Antonio
 23 Creek WWF”), and 5597 Oakport Street, Oakland (“Oakport WWF”), respectively.

24 **“WWF Discharge”** shall mean any discharge from one of the three WWFs.

25 **“WWF Output Test”** shall mean a test applied by comparing the Output Ratio for a
 26 WWF to a benchmark set by this Consent Decree.

“Year”, regardless of whether it is capitalized, shall mean a period of 365 Days, or 366 Days in a leap year, but not a Fiscal Year or a Calendar Year.

V. CIVIL PENALTIES

9. Within 30 Days after the Effective Date of this Consent Decree, each Defendant identified below shall pay to the United States the sum appearing next to its name, as a civil penalty, together with interest accruing from the date on which the Consent Decree is lodged with the Court, at the rate specified in 28 U.S.C. § 1961 as of the date of lodging:

East Bay Municipal Utility District	\$170,800
City of Alameda	\$55,575
City of Albany	\$21,019
City of Berkeley	\$133,500
City of Emeryville	\$935
City of Oakland	\$850,000
City of Piedmont	\$20,519
Stege Sanitary District	\$24,430

10. Each Defendant shall pay its civil penalty due to the United States by FedWire Electronic Funds Transfer (EFT) to the U.S. Department of Justice in accordance with written instructions to be provided to Defendant, after the Effective Date, by the Financial Litigation Unit of the U.S. Attorney's Office for the Northern District of California, Federal Courthouse, 1301 Clay Street, Oakland, CA 94612, 510-637-3680. At the time of payment, each Defendant shall send a copy of the EFT authorization form and the EFT transaction record, together with a transmittal letter, which shall state that the payment is for the civil penalty owed pursuant to the Consent Decree in United States et al. v. EBMUD et al., and shall reference the civil action numbers C 09-00186-RS and C 09-05684-RS, and DOJ case number 90-5-1-1-09361/2, to the United States in accordance with Section XXVI of this Decree (Notices); by email to acctsreceivable.CINWD@epa.gov; and by mail to:
EPA Cincinnati Finance Office

26 Martin Luther King Drive
Cincinnati, Ohio 45268

11. No later than 30 Days after the Effective Date of this Consent Decree, each Defendant identified below shall pay to the Water Boards the sum appearing next to its name, as a civil penalty, together with interest accruing from the date on which the Consent Decree is lodged with the Court, at the rate specified in 28 U.S.C. § 1961 as of the date of lodging:

East Bay Municipal Utility District	\$30,800
City of Alameda	\$55,575
City of Albany	\$21,019
City of Berkeley	\$133,500
City of Emeryville	\$935
City of Oakland	\$0
City of Piedmont	\$20,519
Stege Sanitary District	\$24,430

12. Each Defendant shall pay its civil penalty due to the Water Boards by cashier's or certified check payable to the "California Regional Water Quality Control Board, San Francisco Bay Region" and sent to:

Executive Officer
California Regional Water Quality Control Board
1515 Clay St., Suite 1400
Oakland, CA 94612

At the time of payment, each Defendant shall include a transmittal letter, which shall state that the payment is for the civil penalty owed pursuant to the Consent Decree in United States et al. v. EBMUD et al.

VI. WORK – GENERAL

13. The Work set forth in Sections VII - XIV is intended to further each Defendant's ongoing efforts to improve management of its portion of the Regional Wastewater Collection and Transmission System, to reduce I&I, to address WWF Discharges, to address SSOs, and to develop information necessary to determine compliance with the requirements of this

1 Consent Decree. This Consent Decree adopts a regional asset management approach to
2 reducing I&I to the Regional Wastewater Collection and Transmission System sufficient to
3 eliminate WWF Discharges consistent with the terms of this Consent Decree. To achieve
4 the necessary regional reductions in I&I, the Defendants will: (a) take steps to identify and
5 eliminate illicit connections to the Collection Systems, as set forth in Sections VII - XIV
6 below, to control Inflow; (b) perform Collection System Repair and Rehabilitation at a pace
7 equal to or more accelerated than the rates specified in Sections VII - XIV below, to control
8 Infiltration; and (c) require certification of Sewer Laterals under the circumstances set forth
9 in Sections VII - XIV below, to further control Infiltration. This Work is expected to result
10 in I&I reduction sufficient to eliminate WWF Discharges consistent with the terms of this
11 Consent Decree by no later than December 31, 2035 (as demonstrated by the Final
12 Compliance WWF Output Test in 2036).

13 14. Although the Parties are pursuing a regional asset management approach to compliance,
14 Sections VII - XIV apply to individual Defendants and each Defendant is responsible only
15 for the Work described in the Section applicable to it, as may be modified from time to time
16 by the performance evaluation and Work plan revision process in Section XV, or under
17 Section XXIX (Modification). Each Defendant shall engage in good faith in that process
18 and shall perform any and all obligations resulting therefrom. Each Defendant shall exercise
19 best efforts to fund the Work required under this Decree, including any additional Work that
20 may be required pursuant to Section XV.

21 15. Where appropriate, this Consent Decree requires Work in addition to ongoing work
22 identified in the SSMPs and AMIPs. The Defendants may need to amend their SSMPs and
23 AMIPs in order to arrive at consistent obligations under the SSMPs, AMIPs and this
24 Consent Decree that are not in conflict; provided, however, that only the requirements of the
25 AMIPs and this Consent Decree are enforceable, and amendments to the SSMPs are not
26 subject to review and approval under this Consent Decree. SSMPs are required and enforced
27 by the Water Boards.
28

16. Discharges from the San Antonio Creek WWF shall be eliminated, consistent with the terms of this Consent Decree, by December 31, 2027; discharges from the Point Isabel WWF shall be eliminated, consistent with the terms of this Consent Decree, by December 31, 2033; and discharges from the Oakport WWF shall be eliminated, consistent with the terms of this Consent Decree, by December 31, 2035.

VII. WORK – EBMUD

A. REGIONAL SEWER LATERAL PROGRAM

17. On February 9, 2010, EBMUD adopted a Regional Sewer Lateral Ordinance (the “Regional Ordinance”) setting standards for the performance of Upper Sewer Laterals and establishing requirements for the testing of Sewer Laterals; and, where needed, the Repair or Rehabilitation of defective Sewer Laterals to eliminate Infiltration. The Regional Ordinance also provides for elimination of improper Inflow connections. EBMUD shall cooperate with the Satellites participating in the Regional Sewer Lateral Program pursuant to the terms of an agreement among EBMUD and the participating Satellites.

18. EBMUD shall maintain the Regional Ordinance such that, at a minimum, it requires:

- a. property owners, except the State or federal government, to comply with performance standards that are no less stringent than those currently required for Upper Laterals;
- b. property owners, except for Public Entities and the State or federal government, to obtain Compliance Certificates for Upper Laterals at the times identified in the next sentence; and
- c. property owners, except for Public Entities and the State or federal government, to obtain Compliance Certificates at the times identified in the next sentence for Upper and Lower Laterals in cases where a Local Ordinance applicable to the property owner so requires.

The times referred to in the preceding sentence are: (i) prior to the latter of a Title Transfer or the expiration of a Time Extension Certificate, (ii) prior to obtaining any permit or other

1 final approval needed for new construction upon a parcel, or for remodeling of an existing or
2 previously-existing Structure, if the cost of permitted construction or remodeling work
3 exceeds \$100,000, and (iii) prior to obtaining approval from EBMUD for an increase or
4 decrease in size of the owner's water meter, as defined in EBMUD's Regulations Governing
5 Water Service to Customers.

6 19. With respect to the duration of Compliance Certificates, the Regional Ordinance shall
7 continue to provide:

8 a. If the Compliance Certificate is obtained as a result of the Rehabilitation of
9 the complete length of the Upper Sewer Lateral, or, where required by Local Ordinance, of
10 the Upper Sewer Lateral and Lower Sewer Lateral, the Compliance Certificate shall be valid
11 for 20 years from the date of issuance.

12 b. If the Compliance Certificate is obtained without complete Rehabilitation, the
13 Compliance Certificate shall be valid for 7 years from the date of issuance.

14 20. No later than 90 Days after the Effective Date, EBMUD shall amend the Regional
15 Ordinance ("Amended Regional Ordinance") to: (a) define Public Entities as that term is
16 defined in this Consent Decree; (b) require Public Entities, as so defined, to maintain Upper
17 Sewer Laterals in full compliance with the Regional Ordinance's standards; and (c) add a
18 new subsection requiring EBMUD to provide a Compliance Certificate to any property
19 owner who requests one and passes the verification test including, without limitation, to any
20 owner of a Sewer Lateral who receives notification from EBMUD or a Satellite that the
21 Sewer Lateral is damaged, deteriorating, defective, or in any other way fails to comply with
22 the applicable Regional Ordinance or Local Ordinance requirements for Sewer Lateral
23 maintenance.

24 21. Reserved.

25 22. Certain Satellites have provided consent for EBMUD to implement the Regional Sewer
26 Lateral Program in their jurisdictions by entering agreements with EBMUD for that purpose
27 ("Regional Sewer Lateral Program Participants"). The remaining Satellites have retained
28

1 responsibility for all aspects of implementing a Sewer Lateral program, including lateral
2 verification and certification, under the authority of their respective municipal codes
3 (“Regional Sewer Lateral Program Non-Participants”). As of the Effective Date, the
4 Regional Sewer Lateral Program Participants are the Cities of Albany, Emeryville, Oakland
5 and Piedmont, and the Stege Sanitary District, and the Regional Sewer Lateral Program
6 Non-Participants are the Cities of Alameda and Berkeley. Although, prior to 2014, Alameda
7 was not a Regional Sewer Lateral Program Participant, during the drafting of this Consent
8 Decree, Alameda was in the process of reviewing whether or not it would request to
9 participate in the Regional Sewer Lateral Program. The Alameda City Council will decide
10 whether or not the City will request to participate in the Regional Sewer Lateral Program
11 before the end of 2014.

12 23. Any Regional Sewer Lateral Program Non-Participant may at any time submit to EBMUD a
13 request to begin participating in the Regional Sewer Lateral Program. EBMUD may consent
14 to or decline the request. If EBMUD declines the request, the requesting Satellite shall
15 continue to be responsible for all aspects of implementing a Sewer Lateral program.
16 Otherwise, EBMUD and the requesting Satellite may negotiate agreements concerning
17 EBMUD’s implementation of the Regional Sewer Lateral Program in the Satellite’s
18 jurisdiction. Upon the execution of mutually acceptable agreements and the enactment of
19 any necessary Local Ordinance revisions, the requesting Satellite shall become a Regional
20 Sewer Lateral Program Participant.

21 24. Any Regional Sewer Lateral Program Participant may at any time within five years of the
22 Effective Date submit to EBMUD a request to cease its participation in the Regional Sewer
23 Lateral Program. EBMUD may consent to or decline the request. If EBMUD declines the
24 request, the requesting Satellite shall continue its participation in the Regional Sewer Lateral
25 Program. If EBMUD consents to the request, the requesting Satellite shall submit an
26 application to EPA for a determination that its proposed Local Ordinance is “no less
27 stringent” than the Regional Ordinance (“No Less Stringent Application”). Within 30 Days
28

1 after EPA's receipt of the "No Less Stringent Application" EBMUD shall submit to EPA
2 and the Regional Water Board an analysis of the application for EPA's and the Regional
3 Water Board's consideration. EPA, following consultation with the Regional Water Board,
4 shall determine whether to approve the No Less Stringent Application. If EPA approves the
5 No Less Stringent Application, the applicant may cease its participation in the Regional
6 Sewer Lateral Program and become a Regional Sewer Lateral Program Non-Participant
7 upon the enactment of any necessary Local Ordinance revisions.

8 25. A Regional Sewer Lateral Program Participant may at any time at least five years after the
9 Effective Date submit 180 Days' notice to EBMUD, EPA and the Regional Water Board
10 that it intends to cease its participation in the Regional Sewer Lateral Program. At the time
11 such notice is provided, the requesting Satellite shall submit an application to EPA for a
12 determination that its proposed Local Ordinance is "no less stringent" than the Regional
13 Ordinance ("No Less Stringent Application"). Within 30 Days after EPA's receipt of the
14 "No Less Stringent Application" EBMUD shall submit to EPA and the Regional Water
15 Board an analysis of the application for EPA's and the Regional Water Board's
16 consideration. EPA, following consultation with the Regional Water Board, shall determine
17 whether to approve the No Less Stringent Application. If EPA approves the No Less
18 Stringent Application, the applicant may cease its participation in the Regional Sewer
19 Lateral Program and become a Regional Sewer Lateral Program Non-Participant upon the
20 enactment of any necessary Local Ordinance revisions.

21 **B. REGIONAL TECHNICAL SUPPORT PROGRAM**

22 26. The goal of the Regional Technical Support Program (RTSP) is to identify and characterize
23 sources of Inflow and Rapid Infiltration that afford opportunities to increase the rate of I&I
24 reduction by the Defendants potentially in a more cost effective manner pursuant to their
25 respective Work Sections as soon as possible, and thereby support the elimination of WWF
26 Discharges.

27 27. Within 180 Days of the Effective Date, EBMUD shall develop and submit a RTSP Plan –
28

1 covering the initial five years of the Program's operations – to Plaintiffs for review and
2 approval. At least 60 Days prior to this submittal, EBMUD shall submit a draft of the Plan to
3 the Satellites, who shall submit any comments to EBMUD within 30 Days thereafter.
4 EBMUD shall include, in the RTSP Plan submitted to Plaintiffs for review and approval,
5 Satellites' comments and EBMUD's response to the Satellites' comments. In each EBMUD
6 Annual Report after Plaintiffs' approval of the initial Plan, EBMUD may propose updates to
7 the Plan, but EBMUD shall give Satellites a draft of any proposed updates at least 60 days
8 before submittal to Plaintiffs and shall consider any suggested revisions or responses to such
9 proposed updates prior to submittal. The purpose of any update to the RTSP Plan is to adjust
10 the activities conducted by EBMUD under the Plan in order to maximize the opportunities
11 for the Defendants to increase the rate of I&I reduction, such as improved identification and
12 characterization of sources of Inflow and Rapid Infiltration. EBMUD shall explain why the
13 updates are necessary and how the updates will further the goals of the RTSP. Any updates
14 proposed in the Annual Report shall be subject to Plaintiffs' review and approval. Satellites
15 may provide comments to Plaintiffs within 45 days of receiving the proposed updates in the
16 Annual Report. The RTSP Plan shall, at a minimum:

17 a. Provide an explanation of why EBMUD believes the program will:

18 i. Result in I&I reductions equal to, or greater than, the I&I reductions
19 anticipated from the Private Lateral Incentive Program Work Plan in the EBMUD
20 SO; and

21 ii. Identify sources that, when eliminated, would achieve I&I reductions
22 that, based on the Flow Model, are necessary to satisfy the Mid-Course Check-In
23 WWF Output Tests and eliminate the WWF Discharges by the compliance deadlines
24 specified in Paragraph 16 of this Consent Decree.

25 b. Analyze regional data using tools such as GIS, which enables identification
26 of patterns and correlations in the data, allowing field investigation to focus on areas with
27 the highest likelihood of sources of Inflow or Rapid Infiltration. EBMUD shall prioritize the
28

1 identification and characterization of sources of Inflow and Rapid Infiltration in the Sub-
2 Basins that have the highest Inflow and Rapid Infiltration. However, EBMUD may identify
3 and characterize sources of Inflow and Rapid Infiltration in any areas where EBMUD finds
4 there is a high likelihood that sources of high Inflow or Rapid Infiltration are present. Data
5 may, without limitation, include flow monitoring; rainfall; peaking factors or other
6 indicators of the Collection System's response to rainfall; pipe age, condition, material and
7 elevation relative to groundwater; Collection System inspection results; smoke testing
8 results (including any data received from any Satellite as a result of any smoke testing they
9 performed before or after the Effective Date of this Consent Decree and smoke testing data
10 from EBMUD's field investigations, described below); water consumption; stream and
11 storm sewer system pipe locations; flood maps; soil types; topography or other indicators of
12 where sources of Inflow and Rapid Infiltration are most likely to be present.

13 c. Propose field investigations to be performed by EBMUD, which shall include
14 a combination of the following, designed to accomplish the goal of the RTSP:

15 i. Identification and selection of state of the art tools and techniques for
16 inspection and data analysis.

17 ii. Smoke testing of sufficient linear footage of Sewer Mains in the
18 Collection Systems so that the total amount of Sewer Mains smoke tested by the
19 Satellites and EBMUD comprises at least 50% of the total linear footage of Sewer
20 Mains in the Collection Systems. The location of smoke testing by EBMUD shall
21 have the greatest potential for identifying Inflow and Rapid Infiltration to the WWFs
22 based on an assessment of multiple factors, including rate of I&I; influence on WWF
23 Discharges; pipe age, condition, material and construction; density of connections;
24 and any other relevant data.

25 iii. Flow monitoring, including isolation of Sub-Basins and use of
26 "micro-monitoring" (i.e., the monitoring of very small portions of a Sub-Basin using
27 flow monitoring equipment specifically adapted to the measurement of very low
28

flows) to isolate smaller sections of the Collection System.

iv. Other field data collection methods such as dye testing; level sensors; CCTV; visual inspection; focused electrode leak location; laser; sonar; field reconnaissance during storm events; and other methods of detecting sources of Inflow and Rapid Infiltration.

d. Identify additional techniques for I&I identification and prioritization. These may include, but are not limited to, analysis of surface maps, rainfall-response data analysis, or hydrologic or hydraulic modeling.

e. Identify the process for notifying Satellites annually of defects identified in their service areas, including all sources of Inflow and Rapid Infiltration (including illicit connections on private property).

f. Identify the methodology for estimating the volume and/or flow rate of water entering the Collection System from identified Inflow and Rapid Infiltration sources.

g. Identify the methodology, applicable to all Satellites, except for Oakland, for determining what sources of Inflow and Rapid Infiltration are High Priority Sources that shall be eliminated by the Satellites pursuant to their respective Work Sections. For Oakland, EBMUD shall identify the methodology for identifying sources of Inflow and Rapid Infiltration in Oakland's jurisdiction.

h. Provide an estimate of the quantity and location of the identification and characterization Work to be completed by EBMUD, including, but not limited to, the length of the Collection System pipe and maps and lists of Sub-Basins or other areas to be assessed.

28. Notification and Model Access.

a. Notification to Satellites. EBMUD shall give formal notification to each Satellite, except Oakland, of the sources of Inflow and Rapid Infiltration in a letter to each Satellite, and a copy to Plaintiffs, no later than December 31st of each Year. EBMUD's formal notification shall include the physical location of and unique identifier for each source, a description of the source and the defect, identification of all sources determined to

1 be High Priority Sources, and an estimate of the expected Inflow and Rapid Infiltration
2 reduction of the source if eliminated. The twenty-four (24) month period referred to in the
3 Satellites' Work Sections, except for Oakland, shall run from December 31st of each Year.
4 Nonetheless, the parties are required to confer informally at least once in each calendar
5 quarter, in writing or otherwise, prior to the formal notification regarding any source of
6 Inflow or Rapid Infiltration that may be identified as a High Priority Source.

7 b. Notification to Oakland. For Oakland, EBMUD shall give formal
8 notification of the identified sources of Inflow and Rapid Infiltration in a letter to Oakland,
9 and a copy to Plaintiffs, no later than September 30th of each Year. EBMUD's formal
10 notification to the City shall include the physical location of each source, whether the source
11 is in Sub-Basin 80-111 or 80-011, a description of the source and the defect, and an estimate
12 of the expected Inflow and Rapid Infiltration reduction into Oakland's Collection System of
13 the source if eliminated. In addition, the parties are required to confer informally at least
14 once each calendar quarter, in writing or otherwise, prior to the formal notification regarding
15 any identified source of Inflow or Rapid Infiltration.

16 c. EBMUD shall provide unfettered access as described below (I) to the Flow
17 Model, including a copy of the Flow Model, the assumptions, input parameters, calibration
18 runs and results, and updates, and (II) to EBMUD's consultant related to the Flow Model
19 ("FM Consultant") on request by any Satellite.

20 i. Any Satellite (the "Requester") may, at its own expense,
21 communicate with EBMUD's modeling consultant ("FM Consultant") on any topic
22 and/or ask the FM Consultant to perform model runs as provided in this Paragraph.
23 The Requester shall give at least seven Days' notice to all other Defendants before
24 any communication between the Requester and the FM Consultant. Notwithstanding
25 the previous sentence, telephone communications shall not need seven Days' notice
26 so long as EBMUD participates in the communication and all non-Requester
27 Satellites receive prior notification. EBMUD may participate in any such
28

1 communication, at its discretion. Scheduling communications are not subject to
2 these restrictions. The Requester shall pay for the cost of the FM Consultant for its
3 participation in the communication and performing any analysis using the Flow
4 Model, including but not limited to consultant staff time, consultant costs, and
5 proprietary software licenses, and if requested, a copy of or site license for the Flow
6 Model.

7 ii. The FM Consultant is understood to have three roles that may occur
8 contemporaneously. The first role is as EBMUD's confidential litigation consultant,
9 and all communications between EBMUD and the FM Consultant in this role shall
10 be confidential. The second role is as participant in communications with Satellites
11 (including responding to questions) and performer of work at the request of
12 Satellites. The third role is as a testifying expert witness for EBMUD (if EBMUD
13 decides to designate the FM Consultant as such). If so designated, he or she can
14 testify, but such designation will not impede the FM Consultant's performance of the
15 first two roles stated above. The use of the FM Consultant by the Satellites and by
16 EBMUD shall not disqualify the FM Consultant from serving in any of the three
17 above roles.

18 iii. To assist with the RTSP program, the City of Oakland, and each of
19 the other Satellite Defendants, shall provide to EBMUD, and the other Defendants
20 upon request, the following items current to April 10, 2014: (i) its flow monitoring
21 data, (ii) its analysis of that data pertinent to an assessment of Inflow and Infiltration,
22 and (iii) its flow model including runs performed under design storm conditions.

23 iv. All exchanges of communications between Defendants and the FM
24 Consultant, and discussions and documents exchanged at meetings including
25 Defendants and their consultants with the FM Consultant shall not be a waiver of
26 confidentiality and shall not waive any legal privilege or doctrine applicable to such
27 information that protects such information from disclosure.
28

1 29. Required Spend.

2 a. EBMUD shall spend the following per Fiscal Year on the RTSP (the
3 “Required Spend”): (i) from the date EBMUD submits the RTSP Plan to Plaintiffs for
4 review and approval pursuant to Paragraph 27 through June 30, 2015, \$2,000,000 prorated
5 to the remaining Days left in the Fiscal Year (e.g., EBMUD submits the RTSP Plan on
6 March 1, 2015, the Required Spend for Fiscal Year 2014-2015 is \$666,667), (ii) from July 1,
7 2015 through June 30, 2019, \$2,000,000 per Fiscal Year and (iii) from July 1, 2019,
8 \$1,825,000 per Fiscal Year for the remaining term of this Consent Decree. The Required
9 Spend shall include modeling costs associated with the RTSP and costs to locate and assess
10 Inflow and Rapid Infiltration. The Required Spend shall not include costs to administer the
11 RTSP, and shall not include costs for modeling that is not associated with the RTSP.

12 b. EBMUD’s compliance with the Required Spend requirement of Paragraph
13 29(a) shall be measured on a cumulative basis, starting June 30, 2016 (e.g., if EBMUD
14 submits the RTSP Plan on March 1, 2015, EBMUD would be in compliance if it had
15 cumulatively spent \$2,666,667 by June 30, 2016, \$4,666,667 by June 30, 2017, \$6,666,667
16 by June 30, 2018, \$8,666,667 by June 30, 2019, \$10,491,667 by June 30, 2020, etc.),
17 determined annually as of June 30th. Any amount of the Required Spend that is not spent in
18 any Fiscal Year shall be subject to the Stipulated Penalty in Paragraph 190(b).

19 30. Once the RTSP Plan is approved pursuant to Section XIX and any Dispute Resolution
20 (Section XXII) procedures have been completed, EBMUD shall implement the RTSP Plan
21 according to the approved schedules contained therein.

22 31. During the term of this Consent Decree, EBMUD may recommend to Plaintiffs for their
23 review and approval alternative uses of the Required Spend (but not the Required Spend
24 amount) that advance the Objectives of this Consent Decree in concert with, or in lieu of, the
25 RTSP. Such proposed uses may include use of some or all of the Required Spend to
26 eliminate High Priority Sources identified by the RTSP. A proposed use may include, but is
27 not limited to, the use of any amount of the Required Spend that is not spent in any given
28

1 Fiscal Year as a grant program to assist Satellites in eliminating High Priority Sources in
 2 lieu of being subject to the Stipulated Penalty in Paragraph 190(b). EBMUD shall give
 3 notice of any proposed alternative use of the Required Spend to all parties pursuant to
 4 Section XXVI (Notices) when it submits its proposal to Plaintiffs. The Satellites and
 5 Intervenor may submit comments to Plaintiffs on any such recommended alternative within
 6 30 Days of EBMUD's submittal. If EBMUD recommends alternative uses of the Required
 7 Spend, EBMUD shall continue to operate under the RTSP until such time, if any, as the
 8 recommended changes are approved pursuant to Section XIX and any Dispute Resolution
 9 (Section XXII) procedures have been completed, at which time EBMUD shall implement
 10 the alternative use of the Required Spend according to the approved schedules contained
 11 therein. Any alternative use of the Required Spend shall be considered a material
 12 modification subject to the requirements of Section XXIX (Modification).

13 **C. PUBLIC OUTREACH AND EDUCATION PROGRAM**

14 32. Within 180 Days of the Effective Date, EBMUD, with assistance from the Satellites, shall
 15 develop and submit to EPA for review and comment an education and outreach program
 16 plan to encourage Sewer Lateral owners in its service area to inspect and, if necessary,
 17 Repair or Rehabilitate their Sewer Laterals before the Regional or Local Ordinance
 18 mandates action. EBMUD shall develop the education and outreach program plan with
 19 guidance from public affairs/communications experts, whether in-house or consultants, and
 20 Satellite agencies shall use and/or customize the materials for their own outreach efforts.
 21 The plan will specifically consider the diversity of languages spoken in the EBMUD service
 22 area and whether some or all of the materials should be available in more than one language.
 23 The plan submitted to EPA shall include, at a minimum:

24 a. Key messages to be used to educate distinct audiences (e.g., property owners,
 25 homeowners' associations, real estate agents, civic groups, etc.) on the benefits of replacing
 26 Sewer Laterals, including the elimination of the environmental impacts of defective Sewer
 27 Laterals.

b. An overview of the legal requirements for property owners to maintain their Sewer Laterals, including a description of defective Sewer Laterals as violations of the Satellites' Local Ordinances and that defective Sewer Laterals may be subject to enforcement actions by the Satellites.

c. User-friendly descriptions of logistical and financial information, including information on grant or loan programs, that will be provided to property owners to assist them in 1) locating and evaluating contractors for testing their Sewer Lateral for defects, 2) choosing between repairing and replacing a defective Sewer Lateral, and 3) evaluating contractor-provided estimates.

d. Implementation strategies based on the estimated costs and benefits of using various communication tools to educate property owners about the benefits of Sewer Lateral replacement (e.g., agency websites, brochures, targeted mailings, social media, direct outreach, public meetings, existing public gatherings, etc.).

e. Methods for tracking the implementation of the education and outreach program and for recommending refinements based on the observed impact of the program.

D. ASSET MANAGEMENT AND INTERIM OPERATION

33. On July 14, 2011, after consultation with the Regional Water Board, EPA approved EBMUD's May 2011 Interceptor System Asset Management Work Plan ("ISAMWP"). The ISAMWP includes (a) schedules and reporting requirements for the inspection of EBMUD's entire Interceptor System within five years, (b) Interceptor System maintenance protocols, including recommendations for cleaning, and (c) schedules for the types of Interceptor System repairs and replacement that EBMUD shall undertake as needed based on the inspection results. EBMUD shall continue to implement the ISAMWP under this Decree according to the schedules approved therein, including, but not limited to, completion of the initial Interceptor System inspection by no later than June 30, 2015 (ISAMWP, Figure 9), with the goal of maximizing flow to the MWWTP. In addition, EBMUD shall work with the other Defendants to create Regional Standards for sewer installation, Rehabilitation, and

Repair and participate in submitting a group report of the recommended Regional Standards for EPA's review and approval by June 30, 2016, and for review, every five years thereafter.

34. Within 180 Days of the Effective Date, EBMUD shall submit to EPA and the Regional Water Board for review and comment a plan to enable bi-directional flow (dual operational mode) through the Pump Station Q Force Main. The plan shall include figures and descriptions of the Work to be done and a schedule with milestones and corresponding dates. Once EPA, after consultation with the Regional Water Board, has provided comments on the plan, EBMUD shall implement the plan. EBMUD shall complete the project within 6 years of the Effective Date.

E. COMPLIANCE WITH EFFLUENT LIMITATIONS

35. Until this Consent Decree is terminated, EBMUD shall comply with the following effluent limitations with respect to WWF Discharges:

a. Total Coliform Organisms: Discharges from the San Antonio Creek WWF shall not exceed 240 MPN/100 ml (when measured as the moving median average of 5-consecutive samples), nor shall any single sample exceed 10,000 MPN/100 ml. Discharges from the Oakport and Point Isabel WWFs shall not exceed a daily maximum of 240 MPN/100 ml. As used in this paragraph, "MPN" refers to the "most probable number" index.

b. Chlorine residual shall not exceed 0.0 mg/L. EBMUD may elect to use a continuous on-line monitoring system(s) for measuring flows, chlorine concentration and sodium bisulfate dosage, to prove that any chlorine residual exceedance is a false positive. If substantial evidence is provided, the Regional Water Board may conclude that a chlorine residual exceedance is a false positive and therefore not a violation. The documented presence of a stoichiometric excess of dechlorination agent is prima facie evidence of a false positive.

c. pH: the discharge must be within 6.5 to 8.5. If EBMUD continuously monitors pH, EBMUD shall be in compliance with the pH limitation provided that both of

the following conditions are satisfied: (i) the total time during which the pH values are outside the required range of 6.5 to 8.5 shall not exceed 1% of the total duration of WWF discharge during any calendar month and (ii) no individual excursion from the required range of pH values shall exceed 60 minutes.

36. EBMUD shall conduct sampling, analyses, and observations, and record and report results to the Regional Water Board as described in the Self-Monitoring Program attached to this Consent Decree as Appendix D.

37. Exceedances of effluent limitations, unless found by the Regional Water Board not to be a violation, shall result in the stipulated penalties prescribed in Paragraph 187 of Section XX of this Consent Decree.

F. FLOW MODEL CALIBRATION PLAN PREPARATION

38. EBMUD Submittal.

a. Within 240 Days of the Effective Date, EBMUD shall submit a Flow Model Calibration Plan to Plaintiffs for review and approval. At least 60 Days prior to this submittal, EBMUD shall submit a draft of the Plan to the Satellites, who shall submit any comments to EBMUD within 30 Days thereafter. EBMUD shall include, in the Flow Model Calibration Plan submitted to Plaintiffs for review and approval, Satellites' comments and EBMUD's response to the Satellites' comments.

b. The Flow Model Calibration Plan shall be consistent with the following requirements:

i. EBMUD shall monitor the frequency and volume of all discharges at each of the three WWFs and wet weather influent volume at the MWWTP;

ii. EBMUD shall collect and consider all available flow data, including data from permanent meters;

iii. EBMUD shall gather data on physical changes to the Regional Wastewater Collection and Transmission System, including, without limitation, the quantity of Repairs and Rehabilitations to Sewer Mains and Sewer Laterals, inflow

1 sources identified and corrected, and the Pump Station Q Force Main project set
2 forth in this Section VII;

3 iv. EBMUD shall monitor rainfall totals, duration and intensity as a
4 function of time, using a monitoring protocol and rain gauge density and placement
5 that is the state of the industry at the time;

6 v. Annually, EBMUD shall recalibrate the Flow Model by incorporating
7 (a) new data gathered (including any data gathered pursuant to the implementation of
8 a PEP) through April 15 of the current Calendar Year; and (b) physical changes to
9 the Regional Wastewater Collection and Transmission System through the end of the
10 prior Calendar Year. Flow Model recalibration shall be carried out in accordance
11 with current industry good practice. Annual recalibration shall specifically be carried
12 out such that (a) the modeled volume of I&I reaching the MWWTP during the prior
13 Wet Season is not less than the measured volume during the prior Wet Season and
14 (b) the modeled volume of I&I to and from each of the three WWFs during the prior
15 Wet Season is not less than the measured volume of I&I to and from each
16 corresponding WWF during the prior Wet Season, except in cases in which one or
17 more discharges occur from a WWF following its first Compliance WWF Output
18 Test, in which case each such discharge shall be used for recalibration regardless of
19 whether it occurred during the prior Wet Season. Flow Model recalibration shall not
20 be carried out in a manner that reduces the ability of the Flow Model to accurately
21 predict flow volumes from storms of a magnitude similar to the December 5, 1952
22 Storm. If any data gathered is not used in any Flow Model recalibration, EBMUD
23 shall provide Plaintiffs with a justification for why the data not used for the
24 recalibration in question would reduce the ability of the Flow Model to accurately
25 predict flow volumes from storms of a magnitude similar to the December 5, 1952
26 Storm; and

27 vi. EBMUD shall submit (as part of its Annual Report pursuant to the
28

“REPORTING” Section of this Decree) a Flow Model Calibration Report that (a) summarizes the data used to recalibrate the Flow Model, (b) describes in detail the Flow Model recalibration, and (c) compares the measured and modeled I&I hydrographs and volumes at each of the three WWFs and the MWWTP for (1) each wet weather event during the prior Wet Season, and (2) each wet weather event, regardless of when it occurred during the year, in which at least one discharge occurs from a WWF following its first Compliance WWF Output Test.

vii. EBMUD shall submit, (as part of its Annual Report pursuant to the “REPORTING” Section of this Decree), an Output Ratio based on the most recent Flow Model recalibration.

39. The review and approval of the Flow Model Calibration Plan shall be according to the “REVIEW AND APPROVAL OF DELIVERABLES” and “DISPUTE RESOLUTION” Sections of this Decree.

G. FLOW MODEL CALIBRATION PLAN IMPLEMENTATION

40. Once the Flow Model Calibration Plan is approved pursuant to the “REVIEW AND APPROVAL OF DELIVERABLES” Section of this Decree and any procedures pursuant to the “DISPUTE RESOLUTION” Section of this Decree have been completed, EBMUD shall implement the approved Flow Model Calibration Plan.

41. The Parties recognize that the Flow Model Calibration Plan must be sufficiently flexible to adapt to unforeseen circumstances (including, but not limited to, changes in technology). If EBMUD believes it is appropriate to materially modify any portion of the approved Flow Model Calibration Plan, it may seek to do so pursuant to the provisions of the “REVIEW AND APPROVAL OF DELIVERABLES” Section of this Decree. For purposes of this Paragraph, material modifications shall consist of changes that result in a reduction in the number of permanent flow monitors, and any alteration to key schedule milestones. EBMUD shall not implement any such material modification until it has consulted with the Satellites, and said modification is approved by EPA, after consultation with the Regional

Water Board (or any dispute is resolved pursuant to the “DISPUTE RESOLUTION” Section of this Decree). In the interim, EBMUD shall continue to implement the approved Flow Model Calibration Plan.

VIII. WORK – CITY OF ALAMEDA

A. IMPLEMENTATION OF EXISTING PROGRAM AND IMPROVEMENTS

42. On May 13, 2013, after consultation with the Regional Water Board, EPA conditionally approved the City of Alameda’s AMIP. For the duration of the Consent Decree, the City of Alameda shall implement the programs set forth in its SSMP and AMIP for controlling SSOs and reducing I&I. In addition, the City of Alameda shall implement the Work set forth in this Section to accomplish the goal of eliminating SSOs and further reduce I&I. The City shall revise its AMIP as necessary, so that it is consistent with the requirements of this Section, and to ensure that Repair and Rehabilitation projects continue to be adequately identified and planned for. On June 4, 2013, the United States Navy transferred 509 acres of the former Naval Air Station Alameda to the City of Alameda and will continue to transfer 369 acres of additional land to the City over the next 10 Years. This former Navy property is commonly referred to as “Alameda Point.” The Sewer Mains in Alameda Point are not included in the rate, mileage or other Work requirements in this Section; however, the City will Rehabilitate the existing Sewer Mains and Sewer Laterals in Alameda Point for any property or parcel that is developed, re-developed and/or reused in any way. This includes, for the duration of this Consent Decree, requiring the Rehabilitation of the existing Sewer Mains and Sewer Laterals in Alameda Point as a condition of the City approving any applicable City of Alameda building permit(s). “Development, redevelopment and/or reuse” shall not include necessary life-safety improvements (e.g., the installation of fire sprinklers, etc.) that are made to City owned property that is currently leased. Notwithstanding the fact that the Sewer Mains in Alameda Point are not included in the Work requirements for the City of Alameda in the paragraphs below, the City of Alameda shall: (1) respond to any Acute Defects that are identified in Alameda Point and (2) revise its hot spot cleaning

1 program to include areas in Alameda Point that have Sewer Mains with a history of SSOs or
 2 that are at risk for SSOs. Any Acute Defect or hot spot cleaning Work that is performed in
 3 Alameda Point by the City may be counted towards the City's Work requirements in
 4 Paragraphs 49, 50 and 51.

5 **B. I&I REDUCTION WORK**

6 43. Sewer Main and Maintenance Hole Rehabilitation

7 a. By June 30, 2016, the City of Alameda shall complete Collection System
 8 Rehabilitation of 41,184 feet of Sewer Main. Beginning on July 1, 2016, the City of
 9 Alameda shall complete, by the end of each Fiscal Year, Rehabilitation of no less than the
 10 feet of Sewer Main in Appendix E based on a cumulative total (i.e., 54,912 feet by June 30,
 11 2017; 68,640 feet by June 30, 2018; etc.) for the duration of the Consent Decree. The
 12 required rate of Rehabilitation excludes the Sewer Mains in Alameda Point. When the City
 13 Rehabilitates a Sewer Main, it shall also Rehabilitate, as needed, all Maintenance Holes
 14 associated with that Sewer Main and ensure that abandoned Sewer Laterals are not
 15 connected to that Sewer Main. Alameda shall maintain the Collection System and the I&I
 16 reductions achieved from prior Repair and Rehabilitation. The City shall consider the
 17 findings of the EBMUD RTSP described in EBMUD Work Section VII.B associated with
 18 Inflow and Rapid Infiltration when planning and scheduling Collection System Repair and
 19 Rehabilitation projects pursuant to this Paragraph, including, but not limited to, focusing
 20 Repair and Rehabilitation in areas of the Collection System with high peak wet weather
 21 flows, and shall update its Capital Improvement Plan accordingly.

22 b. For the first ten (10) Fiscal Years of this Consent Decree, the City of
 23 Alameda shall inspect, using CCTV or other equally effective method, and document
 24 condition assessment of its Collection System at an annual rate of no less than 10 percent
 25 (based on a three Fiscal Year rolling average, with the first average calculated after three
 26 Fiscal Years) of its Sewer Mains that are more than 10 Calendar Years old, or have not been
 27 inspected within 10 Calendar Years (no less than 73,920 feet of Sewer Mains per Fiscal
 28

Year). The required rate and percentage of inspection and condition assessment excludes the Sewer Mains in Alameda Point. Thereafter, the next scheduled inspection for any specific pipe will be based on the previous inspection and condition assessment result, including the consideration of existing information (such as prior Sewer Main CCTV inspections, sewer line cleaning results, SSO incidence, information concerning soil movement, Sewer Main construction material, and/or information suggesting Sewer Main corrosion risk) that indicates which Sewer Mains are at most critical risk of being in defective condition that could cause SSOs, especially SSOs to waters from Sewer Mains located adjacent to waterways. In no case, however, shall the City allow more than 20 years to elapse between CCTV inspection of any given Sewer Main. When the City inspects a Sewer Main, it shall also inspect all Maintenance Holes associated with that Sewer Main.

c. The City shall work with the other Defendants to create Regional Standards for sewer installation, Rehabilitation, and Repair and participate in submitting a group report on the recommended Regional Standards for EPA's review and approval by June 30, 2016, and for review, every five years thereafter.

44. Sewer Lateral Inspection and Repair or Rehabilitation

a. On March 8, 2012, EPA approved the City of Alameda's application to EBMUD for a determination that the City has a Local Ordinance that is no less stringent than the Regional Ordinance ("No Less Stringent Application"). The City of Alameda may ask to participate in EBMUD's Regional Sewer Lateral Program under the provisions of Paragraph 23.

b. If the City of Alameda applies to EBMUD under Paragraph 23 to participate in the Regional Sewer Lateral Program, the City shall:

i. Cooperate with EBMUD in the administration of the Amended Regional Ordinance pursuant to the terms of an agreement to be negotiated between EBMUD and the City of Alameda. At a minimum, the City shall include as part of its application process for building permits and approvals a requirement that the

1 applicant submit a valid Compliance Certificate.

2 ii. Provide to EBMUD the information required by and at the frequency
3 determined necessary by EBMUD for implementation of the Regional Sewer Lateral
4 Program. If the City implements a building permit process that requires permittees
5 to submit Compliance Certificates before being issued certificates of occupancy, the
6 City, to satisfy the requirements of this subparagraph, shall annually document, in
7 spreadsheet format, the building permits issued, the certificates of occupancy issued,
8 and whether a Compliance Certificate was submitted prior to issuance of the
9 certificate of occupancy.

10 c. If the City of Alameda does not join the Regional Sewer Lateral Program
11 within 180 Days of the Effective Date of the Consent Decree, the City, alternatively shall:

12 i. have 180 Days to enact all necessary amendments to the Local
13 Ordinance No. 3048. For the duration of the Consent Decree, during any period in
14 which the City is not a part of the Regional Sewer Lateral Program, not including the
15 180 Days after the Effective Date of the Consent Decree, the City's Local Ordinance
16 shall be no less stringent than the Regional Ordinance. The City shall notify EPA if it
17 proposes to make any substantive revisions to its Local Ordinance.

18 ii. implement its amended Local Ordinance and ensure property owners
19 comply with the Local Ordinance. The City shall continue to implement a building
20 permit process that requires permittees to submit Compliance Certificates before
21 being issued a building permit, and shall annually document, in spreadsheet format,
22 the building permits issued, and whether a Compliance Certificate was submitted
23 prior to issuance of the permit.

24 iii. within 90 Days of the Effective Date, submit for EPA's review and
25 comment a report on the number of Compliance Certificates issued under its Local
26 Ordinance each Fiscal or Calendar Year since its inception, an evaluation of the
27 City's annual certification rates, and a discussion of improvements to its Local
28

1 Ordinance or implementation program that could increase the number of Upper
2 Sewer Laterals that are certified per Fiscal Year. This Deliverable is not required if
3 the City of Alameda joins the Regional Sewer Lateral Program pursuant to
4 Paragraph 23.

5 d. Whether or not the City joins the Regional Sewer Lateral Program, the
6 following shall apply:

7 i. The City agrees to inspect and Repair or Rehabilitate, as necessary, all
8 Upper Sewer Laterals owned by the City of Alameda within a period of 10 Calendar
9 Years from the Effective Date.

10 ii. In the event that the City identifies a property owned by a Public
11 Entity or the State or federal government that has an identified defective Upper
12 Sewer Lateral, the City shall report the address of the property and the name of the
13 owner to the Plaintiffs as part of its Annual Report and provide a description of the
14 Upper Sewer Lateral defect.

15 45. Upper Sewer Laterals

16 a. Within 90 Days of identifying an Upper Sewer Lateral as defective, the City
17 of Alameda shall notify the affected owner in writing. The notice shall provide the owner
18 with all information necessary for prompt correction of the defect, including resources, a list
19 of sewer contractors used by the City who have agreed to do work on Sewer Laterals,
20 strategies to find reputable sewer contractors, and information about how to apply for any
21 grant or loan programs for which the owner may be eligible. The notice shall also provide a
22 discussion of the environmental and legal consequences of failing to correct the defect.

23 b. The City of Alameda shall assist EBMUD in the development, pursuant to
24 Paragraph 32 above, of an education and outreach program designed to encourage Upper
25 Sewer Lateral owners to inspect and, if necessary, Repair or Rehabilitate Upper Sewer
26 Laterals before owners are required to under the Regional or Local Ordinances.

27 46. Lower Laterals

1 a. For the duration of this Consent Decree, the City shall continue to
2 Rehabilitate all Lower Laterals whenever it Rehabilitates an associated Sewer Main.

3 b. If Lower Laterals in a particular area of the Collection System are a potential
4 source of excessive I&I, the City shall include such considerations in its planning and
5 scheduling of Collection System Rehabilitation projects pursuant to Paragraph 43(a).

6 c. During any period in which the City of Alameda is a Regional Sewer Lateral
7 Program Non-Participant, when an event occurs that triggers inspection of an Upper Sewer
8 Lateral pursuant to the City of Alameda's Local Ordinance, or the Amended Regional
9 Ordinance, the City of Alameda shall take one of the following actions with respect to the
10 corresponding Lower Sewer Lateral:

11 i. In areas where the Sewer Main and Lower Laterals have been
12 replaced since 1986 pursuant to the City of Alameda's Inflow & Infiltration
13 Correction Program and Cyclic Sewer Replacement Program, no action need be
14 taken solely as a result of a triggering event.

15 ii. Where the property owner is in possession of a valid Compliance
16 Certificate for the Upper Sewer Lateral, issued pursuant to the City's Local
17 Ordinance, no action need be taken solely as a result of a triggering event.

18 iii. In all other instances, if the Upper Sewer Lateral is found to be
19 defective, then it will be assumed that the Lower Lateral is also defective, and the
20 City shall include this in planning and scheduling Lower Sewer Lateral Repair or
21 Rehabilitation.

22 47. Inflow and Rapid Infiltration Identification and Reduction. In July 2011, after consultation
23 with the Regional Water Board, EPA approved the City of Alameda's Inflow Identification
24 and Reduction Plan. In lieu of further implementation of the Inflow Identification portions
25 of the Plan, the City shall cooperate with EBMUD's implementation of the RTSP. The City
26 shall continue to implement the Inflow reduction portions of the Plan, with revisions as
27 needed to ensure that the Plan specifies that:
28

1 a. The City of Alameda shall eliminate sources of Inflow and Rapid Infiltration
2 in the Collection System identified through the RTSP as follows:

3 i. The City shall eliminate High Priority Sources within twenty-four
4 (24) months of the annual December 31st formal notification, except as further
5 described below, or if Plaintiffs grant a requested time extension. A time extension
6 request shall include an explanation for why the City cannot eliminate the High
7 Priority Source within twenty-four (24) months and an explanation for why the
8 specific additional time that is being requested by the Satellite is appropriate. Time
9 extensions pursuant to this subparagraph may be considered non-material
10 modifications to this Consent Decree. If the City disagrees with EBMUD whether a
11 particular source is a High Priority Source, it shall meet and confer with EBMUD
12 within 45 Days of receiving EBMUD's notification to resolve the matter between the
13 two entities.

14 ii. The City shall identify the category of each High Priority Source as
15 Linear High Priority Source, a Non-Linear High Priority Source, or a Private High
16 Priority Source. The City shall summarize the categorization of its High Priority
17 Sources each Year in its Annual Report as described in the "ANNUAL
18 REPORTING REQUIREMENTS" Section. Once the City has identified a source of
19 Inflow and Rapid Infiltration as a Linear High Priority Source, a Non-Linear High
20 Priority Source, or a Private High Priority Source that designation cannot be changed
21 without review and approval by Plaintiffs.

22 iii. For Linear High Priority Sources, the City does not need to exceed
23 the feet of Sewer Main Rehabilitation per year required by Paragraph 43(a) to do the
24 Work indicated by EBMUD's notice(s).

25 iv. The length of the Collection System Rehabilitated pursuant to
26 subparagraph 47(a)(i) may be counted towards the City's Sewer Main Rehabilitation
27 requirement in Paragraph 43(a).
28

v. All other Inflow and Rapid Infiltration sources in the Collection System not identified by EBMUD as High Priority Sources shall be incorporated into the City's Capital Improvement Plan, within twenty-four (24) months from the date EBMUD provides notification to the City, in order to eliminate the sources of Inflow and Rapid Infiltration in the Collection System as expeditiously as possible.

b. Private High Priority Sources

i. For all sources that are identified by the City as Private High Priority Sources, the City shall within the twenty-four (24) months from EBMUD's notification:

(a) Notify the owner of the Private High Priority Source, with an identification of the physical location of the source and provide a description of the source and the defect; and

(b) Initiate all necessary administrative, civil, or criminal enforcement action(s) to eliminate the Private High Priority Source.

ii. The twenty-four (24) month deadline is not applicable if the owner of the Private High Priority Source is the State or federal government or a Public Entity other than the City. In such a case, the City shall notify the State or federal government or Public Entity of the identified Private High Priority Source, copying Plaintiffs, EBMUD, and the Intervenors on each such notice.

iii. For all other sources of Inflow and Rapid Infiltration (including illicit connections) not in the Collection System, the City shall notify property owners of sources of Inflow and Rapid Infiltration (including illicit connections), within 90 Days of confirming the identified sources and initiate all necessary administrative enforcement action(s) to eliminate the sources, including disconnection of all illicit connections, as expeditiously as possible.

48. EBMUD Modeling. To facilitate EBMUD's performance of its obligations under the "Flow Model Calibration Plan Preparation" and "Flow Model Calibration Plan Implementation"

1 paragraphs of the EBMUD Work, Section VII, the City shall provide, by May 1st of 2022
 2 and 2030 – and by July 15 of each other Year – information or data necessary to implement
 3 the Flow Model Calibration Plan, such as: (a) for the prior Calendar Year in 2022 and 2030
 4 (for other years for the prior Fiscal Year), the location and length of specific reaches of
 5 Rehabilitated Sewer Mains; (b) for the prior Calendar Year in 2022 and 2030 (for other
 6 years for the prior Fiscal Year), the location and type of corrected Inflow and Rapid
 7 Infiltration sources; (c) for the prior Calendar Year in 2022 and 2030 (for other years for the
 8 prior Fiscal Year), any operational or physical changes in the Satellite’s Collection System;
 9 and (d) for agencies not participating in the Regional Sewer Lateral Program, for the prior
 10 Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and
 11 address of all Sewer Laterals Repaired or Rehabilitated. In all Years, any flow data or
 12 rainfall data collected between April 15 of the prior Year and April 15 of the current Year
 13 shall be provided by July 15. For any data provided to EBMUD, the City shall also provide
 14 information on any known limitations of such data. The City shall not be required to provide
 15 any analysis of, or attorney work product related to, the information or data provided under
 16 this Paragraph.

17 **C. SSO WORK**

18 49. The City of Alameda shall continue to Repair Acute Defects as soon as possible, but no later
 19 than within one Year of identification.

20 50. The City of Alameda shall clean its entire Collection System by June 30, 2019 and control
 21 roots as necessary in locations where roots are encountered. Thereafter, the City of Alameda
 22 shall clean all non-grid Sewer Mains in its Collection System at least once every five (5)
 23 Years and all grid Sewer Mains in its Collection System at least once every ten (10) Years as
 24 those terms are defined and identified in Appendix G. The required rate of cleaning excludes
 25 the Sewer Mains in Alameda Point.

26 51. The City of Alameda shall continue to implement the hot spot cleaning program set forth in
 27 its AMIP. The hot spot cleaning program shall ensure that Sewer Mains with a history of
 28

SSOs or that are at risk for SSOs are included in the hot spot program, which shall consider risk factors such as pipe age, pipe size, materials of construction, pipe slope, known poor condition from CCTV inspection, food service establishments that may contribute to FOG-related SSOs, and excessive root intrusion, grease, or debris accumulation observed during prior cleaning.

52. The City of Alameda shall continue to implement its Pump Station Renovation Plan according to the schedule identified in Appendix A to that Plan to complete necessary repairs, renovations and upgrades to Pump Stations and Force Mains.

IX. WORK – CITY OF ALBANY

A. IMPLEMENTATION OF EXISTING PROGRAM AND IMPROVEMENTS

53. On May 13, 2013, after consultation with the Regional Water Board, EPA conditionally approved the City of Albany's AMIP. For the duration of the Consent Decree, the City shall implement the programs set forth in its SSMP and AMIP for controlling SSOs and reducing I&I. In addition, the City shall implement the Work set forth in this Section to accomplish the goal of eliminating SSOs and further reduce I&I. The City shall revise its AMIP as necessary, so that it is consistent with the requirements of this Section, and to ensure that Repair and Rehabilitation projects continue to be adequately identified and planned for.

B. I&I REDUCTION WORK

54. Sewer Main and Maintenance Hole Rehabilitation

a. By June 30, 2016, the City of Albany shall complete Collection System Rehabilitation of 17,118 feet of Sewer Main. Beginning on July 1, 2016, the City of Albany shall complete, by the end of each Fiscal Year, Rehabilitation of no less than the feet of Sewer Main in Appendix E based on a cumulative total (i.e., 22,824 feet by June 30, 2017; 28,530 feet by June 30, 2018, etc.) until all Sewer Mains in Appendix E are Rehabilitated. If the City seeks to perform alternative Work, the City must submit a request to Plaintiffs for review and approval that identifies the alternative Work that has been performed, or is proposed to be performed, and a demonstration, with a concurrence from EBMUD, that the

1 alternative Work will achieve an amount of I&I reduction that is equal to or greater than the
2 reduction that will be achieved from the number of feet set forth in Appendix E. The City
3 and Plaintiffs may at their discretion, and only if the parties agree, utilize a third party,
4 including but not limited to EBMUD, to assist in any issues that may arise in reviewing the
5 City's request. If the City so demonstrates, and EBMUD concurs, that alternative Work, that
6 has been performed or is proposed to be performed, will achieve an amount of I&I reduction
7 that is equal to or greater than the reduction that will be achieved from the number of feet set
8 forth in Appendix E, the Plaintiffs may agree to the proposed alternative Work as a non-
9 material modification to this Consent Decree. The Plaintiffs' decision as to whether to agree
10 to the proposed alternative Work shall not be subject to formal dispute resolution, but shall
11 be subject to informal dispute resolution under Paragraph 203. When the City Rehabilitates
12 a Sewer Main, it shall also Rehabilitate, as needed, all Maintenance Holes associated with
13 that Sewer Main and ensure that abandoned Sewer Laterals are not connected to that Sewer
14 Main. The City shall consider the findings of the EBMUD RTSP described in EBMUD
15 Work Section VII.B associated with Inflow and Rapid Infiltration when planning and
16 scheduling Collection System Repair and Rehabilitation projects pursuant to this Paragraph,
17 including, but not limited to, focusing Repair and Rehabilitation in areas of the Collection
18 System with high peak wet weather flows, and shall update its Capital Improvement Plan
19 accordingly.

20 b. For the duration of this Consent Decree, the City of Albany shall CCTV and
21 document condition assessment of its Collection System at an annual rate of no less than 10
22 percent (based on a three-Fiscal Year rolling average, with the first average calculated after
23 three Fiscal Years) of its sewer lines that are more than 10 Calendar Years old, or have not
24 been inspected within 10 Calendar Years (cumulatively totaling at least 16,896 feet of Sewer
25 Main per Fiscal Year). When the City inspects a Sewer Main, it shall also inspect all
26 Maintenance Holes associated with that Sewer Main.

27 c. The City shall work with the other Defendants to create Regional Standards
28

1 for sewer installation, Rehabilitation, and Repair and participate in submitting a group report
2 of the recommended Regional Standards for EPA's review and approval by June 30, 2016,
3 and for review, every five years thereafter.

4 55. Upper Sewer Lateral Inspection and Repair or Rehabilitation Program

5 a. On March 8, 2012, EPA approved the City of Albany's application to
6 EBMUD for a determination that the City has a Local Ordinance that is no less stringent
7 than the Regional Ordinance ("No Less Stringent Application"). Thereafter, the City of
8 Albany asked to participate in EBMUD's Regional Sewer Lateral Program. On April 10,
9 2013, EPA acknowledged the City's request to participate in the Regional Sewer Lateral
10 Program.

11 b. The City of Albany shall cooperate with EBMUD in the administration of
12 the Amended Regional Ordinance pursuant to the terms of the agreement between EBMUD
13 and Regional Sewer Lateral Program Participants. At a minimum, the City shall include as
14 part of its application process for building permits and approvals a requirement that the
15 applicant submit a valid Compliance Certificate.

16 c. The City of Albany shall provide to EBMUD the information required by and
17 at the frequency determined necessary by EBMUD for implementation of the Regional
18 Sewer Lateral Program. If the City implements a building permit process that requires
19 permittees to submit Compliance Certificates before being issued certificates of occupancy,
20 the City, to satisfy the requirements of this subparagraph, shall annually document, in
21 spreadsheet format, the building permits issued, the certificates of occupancy issued, and
22 whether a Compliance Certificate was submitted prior to issuance of the certificate of
23 occupancy.

24 d. The City agrees to inspect and Repair or Rehabilitate, as necessary, all Upper
25 Sewer Laterals owned by the City of Albany within a period of ten (10) Calendar Years
26 from the Effective Date.

27 e. In the event that the City identifies a property owned by a Public Entity, or a
28

1 State or federal government, that has an identified defective Upper Sewer Lateral, the City
2 shall report the address of the property and the name of the owner to the Plaintiffs as part of
3 its Annual Report and provide a description of the Sewer Lateral defect.

4 56. Upper Sewer Laterals

5 a. Within 90 Days of identifying an Upper Sewer Lateral as defective the City
6 of Albany shall notify the affected owner in writing. The notice shall provide the owner
7 with all information related to the Upper Sewer Lateral defect necessary for prompt
8 correction of the defect, including a list of contractors, and information about how to apply
9 for any grant or loan programs for which the owner may be eligible. The notice shall also
10 provide a discussion of the environmental and legal consequences of failure to correct the
11 defect.

12 b. The City of Albany shall assist EBMUD in the development, pursuant to
13 Paragraph 32 above, of an education and outreach program designed to encourage Upper
14 Sewer Lateral owners to inspect and, if necessary, Repair or Rehabilitate Upper Sewer
15 Laterals before owners are required to under the Regional or Local Ordinances.

16 57. Lower Laterals

17 a. For the duration of this Consent Decree, the City of Albany shall continue its
18 existing practice of, when Rehabilitating Sewer Mains, evaluating the condition of Lower
19 Laterals connected to those Sewer Mains and Rehabilitating defective Lower Laterals.

20 b. If Lower Laterals in a particular area of the Collection System are a potential
21 source of excessive I&I, the City of Albany shall include such considerations in its planning
22 and scheduling of Collection System Rehabilitation projects pursuant to Paragraph 54(a).

23 58. Inflow and Rapid Infiltration Identification and Reduction. On March 1, 2011, after
24 consultation with the Regional Water Board, EPA approved the City of Albany's Inflow
25 Identification and Reduction Plan. In lieu of further implementation of the Inflow
26 identification portions of the Plan, the City shall cooperate with EBMUD's implementation
27 of the RTSP. The City shall continue to implement the Inflow reduction portions of the
28

1 Plan, with revisions as needed to ensure that the Plan specifies that:

2 a. The City of Albany shall eliminate sources of Inflow and Rapid Infiltration in
3 the Collection System identified through the RTSP as follows:

4 i. The City shall eliminate High Priority Sources within twenty-four
5 (24) months of the December 31st formal notification, except as further described
6 below, or if Plaintiffs grant a requested time extension. A time extension request
7 shall include an explanation for why the City cannot eliminate the High Priority
8 Source within twenty-four (24) months and an explanation for why the specific
9 additional time that is being requested by the Satellite is appropriate. Time
10 extensions pursuant to this subparagraph may be considered non-material
11 modifications to this Consent Decree. If the City disagrees with EBMUD whether a
12 particular source is a High Priority Source, it shall meet and confer with EBMUD
13 within 45 Days of receiving EBMUD's notification to resolve the matter between the
14 two entities.

15 ii. The City shall identify the category of each High Priority Source as a
16 Linear High Priority Source, a Non-Linear High Priority Source, or a Private High
17 Priority Source. The City shall summarize the categorization of its High Priority
18 Sources each Year in its Annual Report as described in the "ANNUAL
19 REPORTING REQUIREMENTS" Section. Once the City has identified a source of
20 Inflow and Rapid Infiltration as a Linear High Priority Source, a Non-Linear High
21 Priority Source, or a Private High Priority Source that designation cannot be changed
22 without review and approval by Plaintiffs.

23 iii. For Linear High Priority Sources, the City does not need to exceed
24 the feet of Sewer Main Rehabilitation per year required by Paragraph 54(a) to do the
25 Work indicated by EBMUD's notice(s).

26 iv. The length of the Collection System Rehabilitated pursuant to
27 subparagraph 58(a)(i) may be counted towards the City's Sewer Main Rehabilitation
28

1 requirement in Paragraph 54(a).

2 v. All other Inflow and Rapid Infiltration sources in the Collection
3 System not identified by EBMUD as High Priority Sources shall be incorporated into
4 the City's Capital Improvement Plan, within twenty-four (24) months from the date
5 EBMUD provides notification to the City, in order to eliminate the sources of Inflow
6 and Rapid Infiltration in the Collection System as expeditiously as possible.

7 b. Private High Priority Sources.

8 i. For all sources that are identified by the City as Private High Priority
9 Sources, the City shall within the twenty-four (24) months from EBMUD's
10 notification:

11 (a) Notify the owner of the Private High Priority Source, with an
12 identification of the physical location of the source and provide a description
13 of the source and the defect; and

14 (b) Initiate all necessary administrative, civil, or criminal
15 enforcement action(s) to eliminate the Private High Priority Source.

16 ii. The twenty-four (24) month deadline is not applicable if the owner of
17 the Private High Priority Source is the State or federal government or a Public Entity
18 other than the City. In such a case, the City shall notify the State or federal
19 government or Public Entity of the identified Private High Priority Source, copying
20 Plaintiffs, EBMUD, and the Intervenors on each such notice.

21 iii. For all other sources of Inflow and Rapid Infiltration (including illicit
22 connections) not in the Collection System, the City shall notify property owners of
23 sources of Inflow and Rapid Infiltration (including illicit connections), within 90
24 Days of confirming the identified sources and initiate all necessary administrative
25 enforcement action(s) to eliminate the sources, including disconnection of all illicit
26 connections, as expeditiously as possible.

27 59. EBMUD Modeling. To facilitate EBMUD's performance of its obligations under the "Flow
28

Model Calibration Plan Preparation” and “Flow Model Calibration Plan Implementation” paragraphs of the EBMUD Work, Section VII, the City shall provide, by May 1st of 2022 and 2030 – and by July 15 of each other Year – information or data necessary to implement the Flow Model Calibration Plan, such as: (a) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and length of specific reaches of Rehabilitated Sewer Mains; (b) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and type of corrected Inflow and Rapid Infiltration sources; (c) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), any operational or physical changes in the Satellite’s Collection System; and (d) for agencies not participating in the Regional Sewer Lateral Program, for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and address of all Sewer Laterals Repaired or Rehabilitated. In all Years, any flow data or rainfall data collected between April 15 of the prior Year and April 15 of the current Year shall be provided by July 15. For any data provided to EBMUD, the City shall also provide information on any known limitations of such data. The City shall not be required to provide any analysis of, or attorney work product related to, the information or data provided under this Paragraph.

C. SSO WORK

60. The City of Albany shall continue to Repair Acute Defects as soon as possible, but no later than within one Year of identification.

61. The City of Albany shall clean its entire Collection System once every five (5) Fiscal Years (cumulatively totaling at least 33,264 feet of Sewer Main per Fiscal Year), and control roots as necessary in locations where roots are encountered. Sewer Mains that are greater than 15 inches in diameter may be cleaned based on condition assessment, which shall, at a minimum, take into consideration any information concerning the accumulation of FOG, sediment, and debris derived from CCTV inspection or cleaning history.

62. The City of Albany shall continue to implement the hot spot cleaning program set forth in its

1 AMIP.

2 **X. WORK – CITY OF BERKELEY**

3 **A. IMPLEMENTATION OF EXISTING PROGRAM AND IMPROVEMENTS**

4 63. On May 14, 2013, after consultation with the Regional Water Board, EPA conditionally
 5 approved the City of Berkeley's AMIP. For the duration of the Consent Decree, the City
 6 shall implement the programs set forth in its SSMP and AMIP for controlling SSOs and
 7 reducing I&I. In addition, the City shall implement the Work set forth in this Section to
 8 accomplish the goal of eliminating SSOs and further reduce I&I. The City shall revise its
 9 AMIP as necessary, so that it is consistent with the requirements of this Section, and to
 10 ensure that Repair and Rehabilitation projects continue to be adequately identified and
 11 planned for.

12 **B. I&I REDUCTION WORK**

13 64. Sewer Main and Maintenance Hole Rehabilitation

14 a. For twelve (12) Fiscal Years after the Effective Date, or until completion of
 15 the linear feet identified in Appendix E, the City of Berkeley shall pursue Collection System
 16 Rehabilitation at an average annual rate of no less than 1.6 percent of total feet of Sewer
 17 Mains (a cumulative total of at least 22,120 feet of Sewer Mains per Fiscal Year), based on a
 18 three-Fiscal Year rolling average, with the first average calculated after three complete
 19 Fiscal Years. If the City seeks to perform alternative Work, the City must submit a request
 20 to Plaintiffs for review and approval that identifies the alternative Work that has been
 21 performed, or is proposed to be performed, and a demonstration, with a concurrence from
 22 EBMUD, that the alternative Work will achieve an amount of I&I reduction that is equal to
 23 or greater than the reduction that will be achieved from the number of feet set forth in
 24 Appendix E. The City and Plaintiffs may at their discretion, and only if the parties agree,
 25 utilize a third party, including but not limited to EBMUD, to assist in any issues that may
 26 arise in reviewing the City's request. If the City so demonstrates, and EBMUD concurs, that
 27 alternative Work, that has been performed or is proposed to be performed, will achieve an
 28

1 amount of I&I reduction that is equal to or greater than the reduction that will be achieved
2 from the number of feet set forth in Appendix E, the Plaintiffs may agree to the proposed
3 alternative Work as a non-material modification to this Consent Decree. The Plaintiffs'
4 decision as to whether to agree to the proposed alternative Work shall not be subject to
5 formal dispute resolution, but shall be subject to informal dispute resolution under Paragraph
6 203. When the City Rehabilitates a Sewer Main, it shall also Rehabilitate, as needed, all
7 Maintenance Holes associated with that Sewer Main and ensure that abandoned Sewer
8 Laterals are not connected to that Sewer Main. The City shall consider the findings of the
9 EBMUD RTSP described in EBMUD Work Section VII.B associated with Inflow and Rapid
10 Infiltration when planning and scheduling Collection System Repair and Rehabilitation
11 projects pursuant to this Paragraph, including, but not limited to, focusing Repair and
12 Rehabilitation in areas of the Collection System with high peak wet weather flows, and shall
13 update its Capital Improvement Plan accordingly.

14 b. By June 30, 2020, the City of Berkeley shall complete the program it began
15 in 2011 of inspecting (using CCTV or other equally effective method) and assessing the
16 condition of its Sewer Mains that are more than ten (10) Calendar Years old and not
17 scheduled for rehabilitation in the next ten (10) Calendar Years. This program shall proceed
18 at an annual rate of no less than 10 percent of such Sewer Mains (no less than 79,200 feet of
19 Sewer Mains per Fiscal Year) based on a three-Fiscal Year rolling average with the first
20 average calculated after three complete Fiscal Years. Thereafter, inspection and condition
21 assessment for any specific pipe will be based on the previous inspection and condition
22 assessment result, including the consideration of existing information (such as prior Sewer
23 Main CCTV inspections, sewer line cleaning results, SSO incidence, information concerning
24 soil movement including location in areas of known soil instability as shown on the City's
25 hazard map (attached as Appendix F), Sewer Main construction material, and/or information
26 suggesting Sewer Main corrosion risk) that indicates which Sewer Mains are at most critical
27 risk of being in defective condition that could cause SSOs, especially SSOs to waters from
28

1 Sewer Mains located adjacent to waterways. In no case, however, shall the City allow more
 2 than 20 years to elapse between CCTV inspection of any given Sewer Main. When the City
 3 inspects a Sewer Main, it shall also inspect all Maintenance Holes associated with that
 4 Sewer Main.

5 c. The City shall work with the other Defendants to create Regional Standards
 6 for sewer installation, Rehabilitation, and Repair and participate in submitting a group report
 7 of the recommended Regional Standards for EPA's review and approval by June 30, 2016,
 8 and for review, every five years thereafter.

9 65. Upper Sewer Lateral Inspection and Repair or Rehabilitation

10 a. The City of Berkeley has enacted a Local Ordinance, and EPA has approved
 11 its No Less Stringent Application pursuant to procedures outlined in the Satellites SO and
 12 the EBMUD SO. The City has proposed to EBMUD an amended Local Ordinance intended
 13 to achieve the requirements of the Consent Decree, which is hereby approved. For the
 14 duration of the Consent Decree, the City's Local Ordinance shall be no less stringent than
 15 the EBMUD Regional Ordinance.

16 b. The City shall implement its amended Local Ordinance and ensure property
 17 owners comply with the Local Ordinance. The City shall continue to implement a building
 18 permit process that requires permittees to submit Compliance Certificates before being
 19 issued a building permit, and shall annually document, in spreadsheet format, the building
 20 permits issued, and whether a Compliance Certificate was submitted prior to issuance of the
 21 permit.

22 c. The City agrees to inspect and Repair or Rehabilitate, as necessary, all Upper
 23 Sewer Laterals owned by the City of Berkeley within a period of 10 Calendar Years from
 24 the Effective Date.

25 d. In the event that the City identifies an Upper Sewer Lateral owned by a
 26 Public Entity, or the State or federal government, that is a public nuisance under Berkeley
 27 Municipal Code Section 17.24.050, it shall report the address of the property and the name
 28

1 of the owner to the Plaintiffs as part of its Annual Report and provide a description of the
2 Upper Sewer Lateral defect.

3 66. Upper Sewer Laterals

4 a. Within 90 Days of the Effective Date, the City of Berkeley shall submit a
5 report for EPA's review and comment on the number of Compliance Certificates issued
6 under its Local Ordinance each Fiscal or Calendar Year since its inception in 2006, an
7 evaluation of the City's annual certification rates, and a discussion of improvements to its
8 Local Ordinance or implementation program that could increase the number of Upper Sewer
9 Laterals that are certified per Fiscal Year.

10 b. Within 90 Days of identifying an Upper Sewer Lateral as defective, the City
11 of Berkeley shall notify the affected owner in writing. The notice shall provide the owner
12 with all information necessary for prompt correction of the defect, including a list of sewer
13 contractors used by the City who have agreed to do work on Sewer Laterals, strategies to
14 find reputable sewer contractors and information about how to apply for any grant or loan
15 programs for which the owner may be eligible. The notice shall also provide a discussion of
16 the environmental and legal consequences of failing to correct the defect.

17 c. The City of Berkeley shall assist EBMUD in the development, pursuant to
18 Paragraph 32 above, of an education and outreach program designed to encourage Upper
19 Sewer Lateral owners to inspect and, if necessary, Repair or Rehabilitate Upper Sewer
20 Laterals before owners are required to under the Local Ordinance.

21 67. Lower Laterals

22 a. For the duration of this Consent Decree, the City of Berkeley shall continue
23 to Rehabilitate all active Lower Laterals whenever it Rehabilitates an associated Sewer
24 Main.

25 b. If Lower Laterals in a particular area of the Collection System are a potential
26 source of excessive I&I, the City of Berkeley shall include such considerations in its
27 planning and scheduling of Collection System Rehabilitation projects pursuant to Paragraph
28

1 64(a).

2 c. When an event occurs that triggers inspection or testing of an Upper Sewer
3 Lateral under the City's Local Ordinance (BMC Chapter 17.24), the City of Berkeley shall
4 take one of the following actions with respect to the corresponding Lower Sewer Lateral:

5 i. In areas where the Sewer Main and Lower Laterals have been
6 replaced since 1986 pursuant to the Sewer System Evaluation Study completed in
7 1985 by CDM Jordan/Montgomery which was prepared in response to Order No. 86-
8 17 issued by the California Regional Water Quality Control Board, San Francisco
9 Bay Region, and implementing plans adopted by the City of Berkeley, no action
10 need be taken solely as a result of the triggering event.

11 ii. In all other areas of the City of Berkeley, the City shall inspect the
12 corresponding Lower Lateral within 30 Days of notice of the triggering event. The
13 results of such inspections shall be used in planning and scheduling Sewer Main
14 Rehabilitation as set forth in Paragraph 64(a).

15 68. Inflow and Rapid Infiltration Identification and Reduction. On December 7, 2010, after
16 consultation with the Regional Water Board, EPA approved the City of Berkeley's Inflow
17 Identification and Reduction Plan. In lieu of further implementation of the Inflow
18 identification portions of the Plan, the City shall cooperate with EBMUD's implementation
19 of the RTSP. The City shall continue to implement the Inflow reduction portions of the
20 Plan, with revisions as needed to ensure that the Plan specifies that:

21 a. The City of Berkeley shall eliminate sources of Inflow and Rapid Infiltration
22 in the Collection System identified through the RTSP as follows:

23 i. The City shall eliminate High Priority Sources within twenty-four
24 (24) months of the December 31st formal notification, except as further described
25 below, or if Plaintiffs grant a requested time extension. A time extension request
26 shall include an explanation for why the City cannot eliminate the High Priority
27 Source within twenty-four (24) months and an explanation for why the specific
28

1 additional time that is being requested by the Satellite is appropriate. Time
2 extensions pursuant to this subparagraph may be considered non-material
3 modifications to this Consent Decree. If the City disagrees with EBMUD whether a
4 particular source is a High Priority Source, it shall meet and confer with EBMUD
5 within 45 Days of receiving EBMUD's notification to resolve the matter between the
6 two entities.

7 ii. The City shall identify the category of each High Priority Source as a
8 Linear High Priority Source, a Non-Linear High Priority Source, or a Private High
9 Priority Source. The City shall summarize the categorization of its High Priority
10 Sources each Year in its Annual Report as described in the "ANNUAL
11 REPORTING REQUIREMENTS" Section. Once the City has identified a source of
12 Inflow and Rapid Infiltration as a Linear High Priority Source, a Non-Linear High
13 Priority Source, or a Private High Priority Source that designation cannot be changed
14 without review and approval by Plaintiffs.

15 iii. For Linear High Priority Sources, the City does not need to exceed
16 the feet of Sewer Main Rehabilitation per year required by Paragraph 64(a) to do the
17 Work indicated by EBMUD's notice(s).

18 iv. The length of the Collection System Rehabilitated pursuant to
19 subparagraph 68(a)(i) may be counted towards the City's Sewer Main Rehabilitation
20 requirement in Paragraph 64(a).

21 v. All other Inflow and Rapid Infiltration sources in the Collection
22 System not identified by EBMUD as a High Priority Source shall be incorporated
23 into the City's Capital Improvement Plan, within twenty-four (24) months from the
24 date EBMUD provides notification to the City, in order to eliminate the sources of
25 Inflow and Rapid Infiltration in the Collection System as expeditiously as possible.

26 b. Private High Priority Sources.

27 i. For all sources that are identified by the City as Private High Priority
28

Sources, the City shall within the twenty-four (24) months from EBMUD's notification:

(a) Notify the owner of the Private High Priority Source, with an identification of the physical location of the source and provide a description of the source and the defect; and

(b) Initiate all necessary administrative, civil, or criminal enforcement action(s) to eliminate the Private High Priority Source.

ii. The twenty-four (24) month deadline is not applicable if the owner of the Private High Priority Source is the State or federal government or a Public Entity other than the City. In such a case, the City shall notify the State or federal government or Public Entity of the identified Private High Priority Source, copying Plaintiffs, EBMUD, and the Intervenors on each such notice.

iii. For all other sources of Inflow and Rapid Infiltration (including illicit connections) not in the Collection System, the City shall notify property owners of sources of Inflow and Rapid Infiltration (including illicit connections), within 90 Days of confirming the identified sources and initiate all necessary administrative enforcement action(s) to eliminate the sources, including disconnection of all illicit connections, as expeditiously as possible.

69. EBMUD Modeling. To facilitate EBMUD's performance of its obligations under the "Flow Model Calibration Plan Preparation" and "Flow Model Calibration Plan Implementation" paragraphs of the EBMUD Work, Section VII, the City shall provide, by May 1st of 2022 and 2030 – and by July 15 of each other Year – information or data necessary to implement the Flow Model Calibration Plan, such as: (a) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and length of specific reaches of Rehabilitated Sewer Mains; (b) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and type of corrected Inflow and Rapid Infiltration sources; (c) for the prior Calendar Year in 2022 and 2030 (for other years for the

prior Fiscal Year), any operational or physical changes in the Satellite's Collection System; and (d) for agencies not participating in the Regional Sewer Lateral Program, for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and address of all Sewer Laterals Repaired or Rehabilitated. In all Years, any flow data or rainfall data collected between April 15 of the prior Year and April 15 of the current Year shall be provided by July 15. For any data provided to EBMUD, the City shall also provide information on any known limitations of such data. The City shall not be required to provide any analysis of, or attorney work product related to, the information or data provided under this Paragraph.

C. SSO WORK

70. The City of Berkeley shall continue to Repair Acute Defects as soon as possible, but no later than within one Year of identification.

71. The City of Berkeley shall complete the cleaning of its entire Collection System, which began in 2010, by December 31, 2015. Thereafter, the City shall clean at least 269,280 unique and hot spot (i.e., repeat) feet of Sewer Main per Fiscal Year on a three-Fiscal Year rolling average, with the first average calculated after three complete Fiscal Years. The City will determine the appropriate combination of unique and hot spot feet cleaned as long as a cumulative total of 269,280 feet of Sewer Main is cleaned each Fiscal Year. Sewer Mains that are greater than 15 inches in diameter may be cleaned based on condition assessment, which shall, at a minimum, take into consideration any information concerning the accumulation of FOG, sediment, and debris derived from CCTV inspection or cleaning history. The City of Berkeley shall continue to implement the hot spot cleaning program set forth in its AMIP.

XI. WORK – CITY OF EMERYVILLE

A. IMPLEMENTATION OF EXISTING PROGRAM AND IMPROVEMENTS

72. On May 13, 2013, after consultation with the Regional Water Board, EPA conditionally approved the City of Emeryville's AMIP. For the duration of the Consent Decree, the City

1 shall implement the programs set forth in its SSMP and AMIP for controlling SSOs and
 2 reducing I&I. In addition, the City shall implement the Work set forth in this Section to
 3 accomplish the goal of eliminating SSOs and further reduce I&I. The City shall revise its
 4 AMIP as necessary, so that it is consistent with the requirements of this Section, and to
 5 ensure that Repair and Rehabilitation projects continue to be adequately identified and
 6 planned for.

7 **B. I&I REDUCTION WORK**

8 **73. Sewer Main and Maintenance Hole Rehabilitation**

9 a. The City of Emeryville shall implement the Collection System Rehabilitation
 10 program identified in the AMIP, which includes the complete Rehabilitation of
 11 approximately 6,300 linear feet by June 30, 2015, and the Repair of approximately 35
 12 discrete defects by June 30, 2017. When the City Rehabilitates a Sewer Main, it shall also
 13 Rehabilitate, as needed, all Maintenance Holes associated with that Sewer Main and ensure
 14 that abandoned Sewer Laterals are not connected to that Sewer Main. After the Sewer Main
 15 Rehabilitation identified in the AMIP has been completed, the City shall continue to Repair
 16 or Rehabilitate its Collection System based on condition assessment in order to maintain the
 17 Collection System and the I&I reductions achieved from prior Repair and Rehabilitation.
 18 The City shall consider the findings of the EBMUD RTSP described in EBMUD Work
 19 Section VII.B associated with Inflow and Rapid Infiltration when planning and scheduling
 20 Collection System Repair and Rehabilitation projects pursuant to this Paragraph, including,
 21 but not limited to, focusing Repair and Rehabilitation in areas of the Collection System with
 22 high peak wet weather flows, and shall update its Capital Improvement Plan accordingly.

23 b. For the duration of this Consent Decree, the City of Emeryville shall perform
 24 CCTV inspection and document condition assessment of all Sewer Mains in the Collection
 25 System on a ten (10) Fiscal Year cycle. The next round of CCTV inspection of the entire
 26 Collection System shall be completed by June 30, 2022. When the City inspects a Sewer
 27 Main, it shall also inspect all Maintenance Holes associated with that Sewer Main.
 28

1 c. The City shall work with the other Defendants to create Regional Standards
2 for sewer installation, Rehabilitation, and Repair and participate in submitting a group report
3 on the recommended Regional Standards for EPA's review and approval by June 30, 2016,
4 and for review, every five years thereafter.

5 74. Regional Sewer Lateral Program

6 a. On October 15, 2010, the City of Emeryville asked to participate in the
7 Regional Sewer Lateral Program. On March 1, 2011, EPA approved the City's request to
8 participate in the EBMUD Program, and the City has been cooperating with EBMUD in the
9 implementation of that Program since that time.

10 b. The City of Emeryville shall cooperate with EBMUD in the administration of
11 the Amended Regional Ordinance pursuant to the terms of the agreement between EBMUD
12 and Regional Sewer Lateral Program Participants. At a minimum, the City shall include as
13 part of its application process for building permits and approvals a requirement that the
14 applicant submit a valid Compliance Certificate.

15 c. The City of Emeryville shall provide to EBMUD the information required by
16 and at the frequency determined necessary by EBMUD for implementation of the Regional
17 Sewer Lateral Program. The information shall be in spreadsheet format and shall include
18 documentation of building permits that meet the remodel trigger in the Amended Regional
19 Ordinance. The information shall summarize the building permits issued, the status of the
20 building permit (i.e., when or if the building permit has been finalized), and whether a
21 Compliance Certificate for the Sewer Lateral was obtained prior to finalizing the building
22 permit.

23 d. The City agrees to inspect and Repair or Rehabilitate, as necessary, all Upper
24 Sewer Laterals owned by the City of Emeryville within a period of 10 Calendar Years from
25 the Effective Date.

26 e. In the event that the City identifies a property owned by a Public Entity or the
27 State or federal government that has an identified defective Upper Sewer Lateral, the City
28

1 shall report the address of the property and the name of the owner to the Plaintiffs as part of
2 its Annual Report, and provide a description of the Sewer Lateral defect.

3 75. Sewer Laterals

4 a. Within 90 Days of identifying a Sewer Lateral as defective, the City of
5 Emeryville shall notify the affected owner in writing. The notice shall provide the owner
6 with all information necessary for prompt correction of the defect, and information about
7 how to apply for any grant or loan programs for which the owner may be eligible. The
8 notice shall also provide a discussion of the environmental and legal consequences of failing
9 to correct the defect.

10 b. The City of Emeryville shall assist EBMUD in the development, pursuant to
11 Paragraph 32 above, of an education and outreach program designed to encourage Sewer
12 Lateral owners to inspect and, if necessary, Repair or Rehabilitate Sewer Laterals before
13 owners are required to under the Regional or Local Ordinances.

14 c. For the duration of the Consent Decree, the City of Emeryville shall continue
15 its existing practice of, when Rehabilitating Sewer Mains, evaluating the condition of Lower
16 Laterals connected to those Sewer Mains and Repairing or Rehabilitating defective Lower
17 Sewer Laterals.

18 d. On May 3, 2011, the City of Emeryville enacted an ordinance that requires a
19 property owner to show proof that the Sewer Lateral meets performance standards by
20 obtaining (or already holding) a valid Compliance Certificate upon transfer of title of the
21 property, prior to obtaining any building permit authorizing construction or remodel of the
22 property at a cost valuation in excess of \$100,000, and prior to obtaining approval from
23 EBMUD for a change in the size of the owner's water service. This ordinance is designed to
24 extend the application of the Regional Ordinance to Lower Sewer Laterals, and Compliance
25 Certificates issued by EBMUD under the Regional Ordinance for properties in Emeryville
26 shall include both the Upper Sewer Lateral and Lower Sewer Lateral. No later than 120
27 Days after EBMUD amends its Regional Ordinance as required in Paragraph 20 above, the
28

1 City of Emeryville shall enact amendments to its Local Ordinance sufficient to extend the
2 application of the Amended Regional Ordinance to Lower Sewer Laterals.

3 76. Inflow and Rapid Infiltration Identification and Reduction. On March 1, 2011, after
4 consultation with the Regional Water Board, EPA approved the City of Emeryville's Inflow
5 Identification and Reduction Plan as part of its AMIP. In lieu of further implementation of
6 the Inflow identification portions of the Plan, the City shall cooperate with EBMUD's
7 implementation of the RTSP. The City shall continue to implement the Inflow reduction
8 portions of the AMIP, with revisions as needed to ensure that the AMIP specifies that:

9 a. The City of Emeryville shall eliminate sources of Inflow and Rapid
10 Infiltration in the Collection System identified through the RTSP as follows:

11 i. The City shall eliminate High Priority Sources within twenty-four
12 (24) months of the December 31st formal notification, except as further described
13 below, or if Plaintiffs grant a requested time extension. A time extension request
14 shall include an explanation for why the City cannot eliminate the High Priority
15 Source within twenty-four (24) months and an explanation for why the specific
16 additional time that is being requested by the Satellite is appropriate. Time
17 extensions pursuant to this subparagraph may be considered non-material
18 modifications to this Consent Decree. If the City disagrees with EBMUD whether a
19 particular source is a High Priority Source, it shall meet and confer with EBMUD
20 within 45 Days of receiving EBMUD's notification to resolve the matter between the
21 two entities.

22 ii. The City shall determine whether a High Priority Source is a Private
23 High Priority Source or not. The City shall summarize the categorization of its High
24 Priority Sources each Year in its Annual Report as described in the "ANNUAL
25 REPORTING REQUIREMENTS" Section. Once the City has identified a source of
26 Inflow and Rapid Infiltration as a Private High Priority Source that designation
27 cannot be changed without review and approval by Plaintiffs.
28

1 iii. All other Inflow and Rapid Infiltration sources in the Collection
2 System not identified by EBMUD as High Priority Sources shall be incorporated into
3 the City's Capital Improvement Plan, within twenty-four (24) months from the date
4 EBMUD provides notification to the City, in order to eliminate the sources of Inflow
5 and Rapid Infiltration in the Collection System as expeditiously as possible.

6 b. Private High Priority Sources.

7 i. For all sources that are identified by EBMUD as Private High Priority
8 Sources, the City shall within the twenty-four (24) months from EBMUD's
9 notification:

10 (a) Notify the owner of the Private High Priority Source, with an
11 identification of the physical location of the source and provide a description
12 of the source and the defect; and

13 (b) Initiate all necessary administrative, civil, or criminal
14 enforcement action(s) to eliminate the Private High Priority Source.

15 ii. The twenty-four (24) month deadline is not applicable if the owner of
16 the Private High Priority Source is the State or federal government or a Public Entity
17 other than the City. In such a case, the City shall notify the State or federal
18 government or Public Entity of the identified Private High Priority Source, copying
19 Plaintiffs, EBMUD, and the Intervenors on each such notice.

20 iii. For all other sources of Inflow and Rapid Infiltration (including illicit
21 connections) not in the Collection System, the City shall notify property owners of
22 sources of Inflow and Rapid Infiltration (including illicit connections), within 90
23 Days of confirming the identified sources and initiate all necessary administrative
24 enforcement action(s) to eliminate the sources, including disconnection of all illicit
25 connections, as expeditiously as possible.

26 77. EBMUD Modeling. To facilitate EBMUD's performance of its obligations under the "Flow
27 Model Calibration Plan Preparation" and "Flow Model Calibration Plan Implementation"

paragraphs of the EBMUD Work, Section VII, the City shall provide, by May 1st of 2022 and 2030 – and by July 15 of each other Year – information or data necessary to implement the Flow Model Calibration Plan, such as: (a) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and length of specific reaches of Rehabilitated Sewer Mains; (b) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and type of corrected Inflow and Rapid Infiltration sources; (c) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), any operational or physical changes in the Satellite’s Collection System; and (d) for agencies not participating in the Regional Sewer Lateral Program, for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and address of all Sewer Laterals Repaired or Rehabilitated. In all Years, any flow data or rainfall data collected between April 15 of the prior Year and April 15 of the current Year shall be provided by July 15. For any data provided to EBMUD, the City shall also provide information on any known limitations of such data. The City shall not be required to provide any analysis of, or attorney work product related to, the information or data provided under this Paragraph.

C. SSO WORK

78. The City of Emeryville shall continue to Repair Acute Defects as soon as possible, but no later than within one Year of identification.

79. The City of Emeryville completed the cleaning of its entire collection system in 2012.

a. The City of Emeryville shall clean all trunk sewers designated by ID prefixes: 20-000, 21-000 and 22-000 in the Collection System every five (5) Fiscal Years starting July 1, 2017.

b. The City of Emeryville shall clean all other sewers in the Collection System every ten (10) Fiscal Years starting July 1, 2022.

80. The City of Emeryville shall continue to implement the hot spot cleaning program set forth in its AMIP.

XII. WORK – CITY OF OAKLAND

A. IMPLEMENTATION OF EXISTING PROGRAM AND IMPROVEMENTS

81. On December 28, 2012, after consultation with the Regional Water Board, EPA conditionally approved the City of Oakland’s AMIP. For the duration of the Consent Decree, the City shall implement the programs set forth in its SSMP and AMIP for controlling SSOs and reducing I&I. The City shall implement the Work set forth in this Section to accomplish the goal of eliminating SSOs and further reduce I&I. The City shall revise its AMIP as necessary, so that it is consistent with the requirements of this Section, and to ensure that Repair and Rehabilitation projects continue to be adequately identified and planned for.

B. I&I REDUCTION WORK

82. Work Under Regional Water Board Cease and Desist Order. The City of Oakland is subject to the Regional Water Board’s Cease and Desist Order No. 93-134, as amended by Order No. R2-2009-0087 (“Oakland CDO”). The Oakland CDO requires specified sewer projects to be completed by June 30, 2014, to reduce I&I. In addition, the CDO requires the City of Oakland to spend \$2,500,000 per Fiscal Year for the next five (5) Fiscal Years. After the Effective Date of this Consent Decree, the staff of the Regional Water Board will bring to the Regional Water Board for consideration an order (“Rescission Order”) to rescind the Oakland CDO and allow the remaining Oakland CDO work to be completed under the terms of this Consent Decree. If the City is not in compliance with the Oakland CDO, the Regional Water Board staff may defer bringing the Rescission Order to the Board until such time as the City is in compliance. If the Regional Water Board does not adopt the Rescission Order, the City of Oakland shall continue to comply with the Oakland CDO. In either case, the money spent under the CDO shall be part of the Sewer Main Rehabilitation discussed in Paragraph 83(a), below.

83. Sewer Main and Maintenance Hole Rehabilitation.

a. Between January 1, 2014 and June 30, 2016, the City of Oakland shall

1 rehabilitate 158,400 feet of Sewer Main. Beginning on July 1, 2016, the City of Oakland
2 shall complete, by the end of each Fiscal Year, Rehabilitation of no less than 63,360 feet of
3 Sewer Main as identified in Appendix E based on a cumulative total (i.e., 221,760 feet by
4 June 30, 2017; 285,120 feet by June 30, 2018; 348,480 feet by June 30, 2019; etc.) for the
5 duration of the Consent Decree. When the City rehabilitates a Sewer Main, it shall also
6 Rehabilitate, as needed, all Maintenance Holes associated with the Sewer Main and ensure
7 that abandoned Sewer Laterals are not connected to that Sewer Main.

8 i. Effective July 1, 2016, the City shall prioritize those Sewer Mains for
9 Rehabilitation that are located within the Sub-Basins specified in Appendix H. The
10 City may modify Appendix H by substituting alternative Sub-Basins or portions of
11 Sub-Basins in order to increase the rate of I&I reduction, if the total feet of Sewer
12 Mains to be Rehabilitated in Appendix E is not reduced and the City receives written
13 concurrence from EBMUD prior to the modification. Such a modification of
14 Appendix H may be considered a non-material modification to this Consent Decree.

15 ii Any Sewer Main Rehabilitation done after July 1, 2016, in
16 accordance with requirements of paragraphs 82, 83, 87 or 91, and located in the Sub-
17 Basins identified in Appendix H, shall count toward the requirements of this
18 paragraph 83(a).

19 iii. If all Sewer Mains in the Sub-Basins in Appendix H are Rehabilitated
20 before the end of this Consent Decree, the City shall continue Sewer Main
21 Rehabilitation pursuant to Paragraph 83(a) until it completes Rehabilitation of the
22 total feet of Sewer Mains identified in Appendix E (i.e., 1,393,920 feet).

23 b. Additional 5,280 Feet of Sewer Main Rehabilitation. In addition to the Work
24 required under Paragraph 83(a), beginning on July 1, 2014, the City shall complete, by the
25 end of each Fiscal Year, Rehabilitation of no less than 5,280 feet of Sewer Main, anywhere
26 within the City's Collection System, based on a cumulative total (i.e., 5,280 feet by June 30,
27 2015; 10,560 feet by June 30, 2016; 15,840 feet by June 30, 2017; etc.) for the duration of
28

1 the Consent Decree.

2 c. For the duration of this Consent Decree, the City of Oakland shall inspect,
3 using CCTV or other equally effective methods, and document condition assessment of, its
4 Collection System at an annual rate of no less than 10 percent of its Sewer Mains per Fiscal
5 Year (at least 485,760 feet of Sewer Mains per Fiscal Year) on a cumulative basis (i.e.,
6 242,880 feet by June 30, 2014; 728,640 feet by June 30, 2015; 1,214,400 feet by June 30,
7 2016; etc.). When the City inspects a Sewer Main, it shall also inspect all Maintenance
8 Holes associated with that Sewer Main.

9 d. The City shall work with the other Defendants to create Regional Standards
10 for sewer installation, Rehabilitation, and Repair and participate in submitting a group report
11 of the recommended Regional Standards for EPA's review and approval by June 30, 2016,
12 and for review, every five years thereafter.

13 **84. Sewer Lateral Inspection and Repair or Rehabilitation Program**

14 a. On July 28, 2011, EPA approved the City's request to participate in the
15 EBMUD Regional Sewer Lateral Program beginning January 16, 2012. The City has been
16 cooperating with EBMUD in the implementation of that program since that time.

17 b. The City of Oakland shall cooperate with EBMUD in the administration of
18 the Regional Sewer Lateral Program pursuant to the terms of the agreement among
19 Defendants. At a minimum, the City shall include as part of its application process for
20 building permits and approvals for construction or remodeling projects in excess of
21 \$100,000 a requirement that the applicant submit a valid Compliance Certificate.

22 c. The City of Oakland shall continue providing to EBMUD the information
23 required by and at the frequency reasonably determined necessary by EBMUD for
24 implementation of the Regional Ordinance program. The City of Oakland has implemented
25 a building permit process that requires permittees to submit Compliance Certificates before
26 being issued certificates of occupancy for construction or remodeling projects in excess of
27 \$100,000. The City, to satisfy the requirements of this subparagraph, shall document, in
28

1 spreadsheet format, the building permits issued during the Fiscal Year, the certificates of
2 occupancy issued, and whether a Compliance Certificate was submitted prior to issuance of
3 the certificate(s) of occupancy.

4 d. The City agrees to inspect and Repair or Rehabilitate, as necessary, all Sewer
5 Laterals owned by the City of Oakland identified in Appendix H.1 within a period of ten
6 (10) Calendar Years from the Effective Date.

7 e. In the event that the City identifies a property owned by a Public Entity or the
8 State or federal government that has an identified defective Sewer Lateral, the City shall
9 report the address of the property and the name of the owner to the Plaintiffs as part of its
10 Annual Report, and provide a description of the Sewer Lateral defect.

11 85. Sewer Laterals

12 a. Within 90 Days of identifying a Sewer Lateral as defective the City of
13 Oakland shall notify the affected owner in writing. The notice shall provide the owner with
14 all information necessary for prompt correction of the defect, including a list of contractors,
15 and information about how to apply for any grant or loan programs for which the owner may
16 be eligible. The notice shall also provide a discussion of the environmental and legal
17 consequences of failing to correct the defect.

18 b. The City of Oakland shall assist EBMUD in the development, pursuant to
19 Paragraph 32 above, of an education and outreach program encouraging Sewer Lateral
20 owners to inspect and, if necessary, Repair or Rehabilitate Sewer Laterals before owners are
21 required to under the Regional or Local Ordinances.

22 86. Lower Laterals

23 a. The City of Oakland shall continue its existing practice of, when
24 Rehabilitating Sewer Mains, evaluating the condition of Lower Laterals connected to those
25 Sewer Mains and Rehabilitating or requiring Rehabilitation of defective Lower Laterals.

26 b. If Lower Laterals in a particular area of the Collection System are a potential
27 source of excessive I&I, the City of Oakland shall include such considerations in its
28

1 planning and scheduling of Collection System Rehabilitation.

2 87. Inflow and Rapid Infiltration Identification and Reduction. On March 1, 2011, after
3 consultation with the Regional Water Board, EPA approved the City of Oakland's Inflow
4 Identification and Reduction Plan (IIRP). The IIRP was subsequently included in the City's
5 AMIP. In lieu of further implementation of the Inflow identification portions of the IIRP,
6 the City shall cooperate with EBMUD's implementation of the RTSP. The City shall
7 continue to implement the AMIP, with revisions as needed to ensure conformity with this
8 Paragraph. The City of Oakland shall eliminate all sources of Inflow and Rapid Infiltration
9 in the Collection System identified through the RTSP as follows:

10 a. The City shall, at its sole discretion, determine which sources of Inflow and
11 Rapid Infiltration are High Priority Sources and, by December 31st of each Year, the City
12 shall submit a formal notification to Plaintiffs, with copies to all other Parties, that shall
13 include:

14 i. A determination of which sources of Inflow and Rapid Infiltration,
15 identified by EBMUD pursuant to Paragraph 28(b), that the City designated as High
16 Priority Sources. This shall be in the form of a table that identifies a list of all of the
17 sources of Inflow and Rapid Infiltration identified by EBMUD in that year and
18 which of those sources have been designated by the City to be High Priority Sources;

19 ii. Identification by the City of the category of each designated High
20 Priority Source as a Linear High Priority Source, a Non-Linear High Priority Source,
21 or a Private High Priority Source. Once the City has designated a source of Inflow
22 and Rapid Infiltration as a Linear High Priority Source, a Non-Linear High Priority
23 Source, or a Private High Priority Source that designation cannot be changed without
24 review and approval by Plaintiffs.

25 iii. The Non-Linear High Priority Source plan as described in Paragraph
26 87(d).

27 b. The City shall eliminate High Priority Sources within twenty-four (24)
28

months of the December 31st formal notification to Plaintiffs, except as further described below, or if Plaintiffs grant a requested time extension. A time extension request shall include an explanation for why the City cannot eliminate the High Priority Source within twenty-four (24) months and an explanation for why the specific additional time that is being requested is appropriate. Time extensions pursuant to this subparagraph may be considered non-material modifications to this Consent Decree.

c. Linear High Priority Sources

For Linear High Priority Sources, the City does not need to Rehabilitate more than 63,360 feet of Sewer Main in any Fiscal Year as required by Paragraph 83(a), or to Rehabilitate more than 5,280 feet of Sewer Main in any Fiscal Year as required by Paragraph 83(b), to comply with Paragraph 87(a).

d. Non-Linear High Priority Sources

i. As part of the December 31st formal notification described in Paragraph 87(a), above, the City shall submit a Non-Linear High Priority Source Plan, for Plaintiffs' review and comment, that contains:

- A. A list of the Non-Linear High Priority Sources designated by the City and the estimated cost of the Work that is necessary to eliminate the designated Non-Linear High Priority Sources;
- B. An explanation of why those sources of Inflow and Rapid Infiltration were determined by the City to be Non-Linear High Priority Sources;
- C. A cumulative list of the Non-Linear High Priority Sources the City has designated and the date the City expects to complete the Work to eliminate each Non-Linear High Priority Source;
- D. An explanation of how the elimination of the designated Non-Linear High Priority Source will help achieve an adequate reduction of Inflow and Rapid Infiltration to comply with the next

Mid-Course Check-In WWF Output Test or Compliance WWF Output Test under the Consent Decree; and

E. A showing of the City's substantial continuous improvement toward the necessary Inflow and Rapid Infiltration reductions as assumed by the Flow Model.

ii. The Non-Linear High Priority Source plan may address any source of Inflow and Rapid Infiltration identified by EBMUD, regardless of when it was identified.

iii. If the aggregate estimated cost to eliminate the Non-Linear High Priority Sources selected in a Fiscal Year equals or exceeds the costs in the table below, the City shall take actions to eliminate the Non-Linear High Priority Source(s) no later than the corresponding deadline in the table. The appropriate deadline shall begin on December 31st of each Year.

Aggregated Cost to Eliminate Non-Linear High Priority Sources	Deadline to Eliminate Non-Linear High Priority Sources (from December 31st)
Less than \$3,000,000	24 months
\$3,000,000 - \$3,999,999	36 months
\$4,000,000 - \$5,000,000	48 months
Over \$5,000,000	60 months

iv. As part of the Work required under Paragraph 87, the City shall give first priority to eliminating defects in Sub-Basins 80-011 and 80-111 of the City's Collection System.

e. Private High Priority Sources

i. For all sources that are designated by the City as Private High Priority Sources, the City shall within twenty-four (24) months of making the designation:

A. Notify the owner of the Private High Priority Source within 90 Days, with an identification of the physical location and a description of the source and the defect;

B. Notify the owner that they are responsible to eliminate said source; and

C. Initiate all necessary administrative, civil, or criminal enforcement action(s) to eliminate the Private High Priority Source.

ii. The twenty-four (24) month deadline is not applicable if the owner of the Private High Priority Source is the State or federal government or a Public Entity other than the City. In such a case, the City shall notify the State or federal government or Public Entity of the identified Private High Priority Source, copying Plaintiffs, EBMUD and the Intervenors on each such notice.

iii. For all other sources of private Inflow and Rapid Infiltration (including illicit connections) not in the Collection System, the City shall:

A. Notify the owner of the source within 90 Days, with an identification of the physical location and a description of the source and the defect; and

B. Initiate all necessary administrative enforcement action(s) to eliminate the source of Inflow and Rapid Infiltration (including illicit connections) not in the Collection System, as expeditiously as possible.

f. No presumption or inference shall arise, either positively or negatively, in arbitration or dispute resolution, from the fact a particular source of Inflow or Rapid Infiltration is identified by EBMUD pursuant to Paragraph 28(b), and is not designated by the City pursuant to Paragraphs 87(a)-(e) as a High Priority Source to be eliminated. This prohibition of presumption or inference does not limit Plaintiffs, an arbitrator, or the Court from concluding that such a source should be eliminated to achieve the Consent Decree's performance criteria.

88. EBMUD Modeling. To facilitate EBMUD's performance of its obligations under the "Flow Model Calibration Plan Preparation" and "Flow Model Calibration Plan Implementation"

paragraphs of the EBMUD Work, Section VII, the City shall provide, by May 1st of 2022 and 2030 – and by July 15 of each other Year – information or data necessary to implement the Flow Model Calibration Plan, such as: (a) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and length of specific reaches of Rehabilitated Sewer Mains; (b) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and type of corrected Inflow and Rapid Infiltration sources; (c) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), any operational or physical changes in the Satellite’s Collection System; and (d) for agencies not participating in the Regional Sewer Lateral Program, for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and address of all Sewer Laterals Repaired or Rehabilitated. In all Years, any flow data or rainfall data collected between April 15 of the prior Year and April 15 of the current Year shall be provided by July 15. For any data provided to EBMUD, the City shall also provide information on any known limitations of such data. The City shall not be required to provide any analysis of, or attorney work product related to, the information or data provided under this Paragraph.

C. SSO WORK

89. On November 30, 2010, after consultation with the Regional Water Board, EPA approved the City of Oakland’s Sanitary Sewer Overflow Response Plan, which was subsequently included in its AMIP. The City of Oakland shall continue to implement its AMIP. The City of Oakland shall continue to ensure that agency staff and responders are adequately trained to perform the procedures outlined in its AMIP, and to retain appropriate records and evaluate on a Fiscal Year basis agency staff’s and responders’ adherence to the AMIP as approved. In addition, the City of Oakland shall implement the following SSO elimination measures:

a. Capacity Assurance. The City of Oakland shall monitor the water level in Maintenance Holes at the following locations:

- i. San Pablo at 60th Street
- ii. San Pablo at 62nd Street
- iii. Stanford Avenue at Gaskill Street
- iv. 27th Street at Vernon Street
- v. Harrison Street at 27th Avenue
- vi. Grand Avenue at Harrison Street
- vii. 19th Street at Jackson Street
- viii. Park Boulevard at Spruce Street
- ix. 18th Avenue at 4th Avenue
- x. Maybelle Avenue at Masterson Street
- xi. 76th Avenue at Garfield Avenue
- xii. Trestle Glen at Creed Road.

b. In the event that the City at any of the locations in subparagraph 89(a): (i) experiences an SSO caused by lack of capacity; (ii) determines that the water level reaches within one (1) foot of the Maintenance Hole rim due to a lack of capacity, except during a rain event that is greater than the December 5, 1952 Storm; or (iii) has reason to believe a capacity related SSO is likely to occur, the City shall implement improvements to address the capacity deficiency within twenty-four (24) months of the SSO, the date when the water level reached within one (1) foot of the Maintenance Hole rim, or the event triggering the likelihood of an SSO. If the City has reason to believe an SSO is likely to occur, the City shall respond to prevent the SSO from occurring.

c. The City shall utilize a water level sensing device in order to determine the water levels in the Maintenance Holes in subparagraph 89(a). The water level sensing device shall monitor on a continuous basis and send an alarm when: (i) the water level reaches one (1) foot of the Maintenance Hole rim, triggering the Work requirements in subparagraph 89(b) and (ii) the water level reaches three (3) feet of the Maintenance Hole rim, in order to assist the City in preventing SSOs. The City shall make available to Plaintiffs, upon their

1 request, monitoring data gathered pursuant to this paragraph within fourteen (14) Days of
2 such request.

3 d. Oakland shall ensure that any improvements completed pursuant to this
4 Paragraph do not cause other capacity-related bottlenecks. Regardless of whether the City
5 experiences an SSO in these locations, or believes an SSO is likely to occur, the City shall
6 consider the potential capacity deficiency of these locations as a factor in prioritizing these
7 lines in upcoming capital improvement projects. Assessment may be discontinued for any
8 location where a Sewer Main is replaced by a larger capacity Sewer Main and the City
9 assesses the location for at least two (2) Wet Weather Seasons following such replacement
10 and there is no evidence of a potential capacity deficiency.

11 90. Sewer Main Inspection After SSO. In addition to the Sewer Main inspection requirements
12 set forth in Paragraph 83(c) above (I&I Reduction Work), for any SSO caused by conditions
13 in a Sewer Main, including FOG-related SSOs, the City of Oakland shall CCTV inspect
14 immediately downstream of the SSO location for purposes of determining the cause of the
15 SSO.

16 91. Acute Defects. The City of Oakland shall continue to Repair Acute Defects as soon as
17 possible, but no later than within one Year of identification.

18 92. Sewer Main Cleaning

19 a. The City of Oakland shall complete the cleaning of its entire Collection
20 System program, which began in 2010, by June 30, 2018. By June 30, 2014, the City will
21 have cleaned 1,900,800 feet of Sewer Mains. Beginning July 1, 2014, the City shall clean its
22 remaining Sewer Mains at the rate of 739,200 feet per Fiscal Year on a cumulative basis
23 (i.e., 2,640,000 feet by June 30, 2015; 3,379,200 feet by June 30, 2016; etc.).

24 b. Beginning July 1, 2018, and for the duration of the Consent Decree, the City
25 shall clean at least 971,520 feet of Sewer Main per Fiscal Year on a cumulative basis (i.e.,
26 971,520 feet by June 30, 2019; 1,943,040 by June 30, 2020; etc.). The City will determine
27 which sewers to clean as long as a cumulative total of 971,520 feet of Sewer Main is cleaned
28

1 each Fiscal Year. The cleaning frequency shall prevent the buildup of debris, roots, grease,
2 or other material.

3 c. Large trunk lines fifteen (15) inches or greater in diameter may be cleaned
4 based on the results of condition assessment, which shall, at a minimum, take into
5 consideration any information concerning the accumulation of FOG and debris derived from
6 CCTV inspection or cleaning history.

7 d. The City of Oakland shall revise its hot spot cleaning program to ensure that
8 Sewer Mains with a history of SSOs or that are at risk for SSOs are included in the program.
9 For inclusion in the program, the City shall consider risk factors such as pipe age, pipe size,
10 materials of construction, pipe slope, known poor condition from CCTV inspection, food
11 service establishments that may contribute to FOG-related SSOs, and excessive root
12 intrusion/grease/debris accumulation observed during cleaning. To the extent that the City
13 does not have this information, it shall collect it during cleaning and CCTV inspection, and
14 record it in its GIS. The City shall also add a location to its hot spot list if more than one
15 SSO occurs within a 3-Year period at that location. Hot spot locations shall be cleaned at
16 least annually, or more frequently based on information from previous cleanings or
17 inspections. If an additional SSO occurs in the 3-Year period following inclusion on the hot
18 spot list, the frequency of cleaning shall be increased. If no SSOs occur in a 3-Year period,
19 the City may remove the location from its hot spot list.

20 e. Root Cleaning. The City of Oakland shall treat Sewer Mains to control
21 excessive roots in the Collection System for the duration of the Consent Decree. For the first
22 three Fiscal Years, the City of Oakland shall treat a minimum rate of 264,000 feet of Sewer
23 Mains per Fiscal Year on a cumulative basis (i.e., 264,000 feet by June 30, 2014; 528,000
24 feet by June 30, 2015; and 792,000 feet by June 30, 2016; etc.). By December 31, 2016, the
25 City shall submit an evaluation of its root control program to EPA for review and approval.
26 The evaluation shall consider the need to treat additional or fewer Sewer Mains to address
27 results from cleaning and CCTV. The evaluation shall propose refinements to the City's root
28

control program in order to ensure excessive roots in the Collection System are controlled. The City of Oakland shall not treat less than 264,000 feet of Sewer Mains on a cumulative basis without approval from EPA, after consultation with the Regional Board. Any proposal to treat less than 264,000 feet of Sewer Mains shall be made in Oakland's Annual Report as a proposed modification to its AMIP. The proposal, if approved, shall be a non-material modification subject to the requirements of Section XXIX (Modification).

93. FOG Control. The City shall continue to work with EBMUD in the implementation of the EBMUD Regional Fats, Oils and Grease (FOG) Control Program, and coordinate EBMUD's FOG activities within the City. The City shall refer FOG-related SSOs or excessive buildup of grease to EBMUD for investigation. If a food service establishment is determined to be contributing to FOG-related SSOs and does not implement recommendations made by EBMUD, the City shall take actions necessary to ensure that the food service establishment adequately controls FOG.

94. Pump Station Performance and Assessment. On March 14, 2011, EPA approved the City Oakland's Pump Station Reliability Plan. The City shall complete improvements described in the Plan by October 15, 2022.

XIII. WORK – CITY OF PIEDMONT

A. IMPLEMENTATION OF EXISTING PROGRAM AND IMPROVEMENTS

95. On May 13, 2013, after consultation with the Regional Water Board, EPA conditionally approved the City of Piedmont's AMIP. For the duration of the Consent Decree, the City shall implement the programs set forth in its SSMP and AMIP for controlling SSOs and reducing I&I. In addition, the City shall implement the Work set forth in this Section to accomplish the goal of eliminating SSOs and further reduce I&I. The City shall revise its AMIP as necessary, so that it is consistent with the requirements of this Section, and to ensure that Repair and Rehabilitation projects continue to be adequately identified and planned for.

B. I&I REDUCTION WORK

1 96. Sewer Main and Manhole Rehabilitation

2 a. Since 1995, the City of Piedmont has Rehabilitated 66% (approximately 33.5
3 miles) of its Collection System. For the duration of this Consent Decree, the City of
4 Piedmont shall continue to pursue Collection System Rehabilitation at an average rate of no
5 less than 1.15 percent of total Sewer Main miles per Fiscal Year (at least 3,062 feet of Sewer
6 Mains per Fiscal Year), based on a three-Fiscal Year rolling average, with the first average
7 calculated after three complete Fiscal Years, until all Sewer Mains in Appendix E are
8 Rehabilitated. Thereafter, the City shall continue to Rehabilitate its Collection System based
9 on condition assessment in order to maintain the Collection System and the I&I reductions
10 achieved from prior Repair and Rehabilitation. When the City Rehabilitates a Sewer Main, it
11 shall also Rehabilitate, as needed, Manholes associated with that Sewer Main and ensure
12 that abandoned Sewer Laterals are not connected to that Sewer Main. The City shall
13 consider the findings of the EBMUD RTSP described in EBMUD Work, Section VII,
14 associated with Inflow and Rapid Infiltration when planning and scheduling Collection
15 System Repair and Rehabilitation projects pursuant to this Paragraph, including, but not
16 limited to, focusing Repair and Rehabilitation in areas of the Collection System with high
17 peak wet weather flows, and shall update its Capital Improvement Plan accordingly.

18 b. For the first ten (10) Fiscal Years of this Consent Decree, the City of
19 Piedmont shall CCTV and document condition assessment of its Collection System at an
20 annual rate of no less than 26,800 feet of Sewer Mains per Fiscal Year, based upon a three-
21 Fiscal Year rolling average, with the first average calculated after three complete Fiscal
22 Years. Thereafter, the next scheduled inspection for any specific pipe will be based on the
23 previous inspection result and condition assessment, including the consideration of pipes
24 that are believed to be critical (i.e., higher risk for SSOs or pipe failure), such as Sewer
25 Mains located adjacent to waterways; however, no Sewer Main shall be inspected less
26 frequently than every 20 Years. When the City inspects a Sewer Main, it shall also inspect
27 all Manholes associated with that Sewer Main.
28

1 c. The City shall work with the other Defendants to create Regional Standards
2 for sewer installation, Rehabilitation, and Repair and participate in submitting a group report
3 of the recommended Regional Standards for EPA's review and approval by June 30, 2016,
4 and for review, every five years thereafter.

5 97. Sewer Lateral Inspection and Repair or Rehabilitation Program

6 a. On October 15, 2010, the City of Piedmont asked to participate in the
7 Regional Sewer Lateral Program. EBMUD approved the City's request to participate, and
8 on March 9, 2011, the City adopted an ordinance formalizing the City's participation. The
9 City has been cooperating with EBMUD in the implementation of that program since that
10 time.

11 b. The City of Piedmont shall cooperate with EBMUD in the administration of
12 the Regional Sewer Lateral Program pursuant to the terms of the agreement between
13 EBMUD and the Regional Sewer Lateral Program Participants. At a minimum, the City
14 shall include as part of its application process for building permits and approvals, a
15 requirement that the applicant submit a valid Compliance Certificate.

16 c. The City of Piedmont shall provide to EBMUD the information required by
17 and at the frequency determined necessary by EBMUD for implementation of the Regional
18 Sewer Lateral Program. If the City implements a building permit process that requires
19 permittees to submit Compliance Certificates before being issued certificates of occupancy,
20 the City, to satisfy the requirements of this subparagraph, shall annually document, in
21 spreadsheet format, the building permits issued, the certificates of occupancy issued, and
22 whether a Compliance Certificate was submitted prior to issuance of the certificate of
23 occupancy.

24 d. The City agrees to inspect and Repair or Rehabilitate, as necessary, all Upper
25 Sewer Laterals owned by the City of Piedmont within a period of 10 Calendar Years from
26 the Effective Date.

27 e. In the event that the City identifies a property owned by a Public Entity or the
28

1 State or federal government that has an identified defective Sewer Lateral, the City shall
 2 report the address of the property and the name of the owner to the Plaintiffs as part of its
 3 Annual Report, and provide a description of the Sewer Lateral defect.

4 98. Sewer Laterals

5 a. Within 90 Days of identifying a Sewer Lateral as defective, the City of
 6 Piedmont shall notify the affected owner in writing. The notice shall provide the owner with
 7 all information necessary for prompt correction of the defect, including a list of contractors,
 8 and information about how to apply for any grant or loan programs for which the owner may
 9 be eligible. The notice shall also provide a discussion of the environmental and legal
 10 consequences of failing to correct the defect.

11 b. The City of Piedmont shall assist EBMUD in the development, pursuant to
 12 Paragraph 32 above, of an education and outreach program designed to encourage Sewer
 13 Lateral owners to inspect and, if necessary, Repair or Rehabilitate Sewer Laterals before
 14 owners are required to under the Regional or Local Ordinances.

15 99. Lower Laterals. The City of Piedmont shall continue its existing practice of, when
 16 rehabilitating Sewer Mains, evaluating the condition of Lower Laterals connected to those
 17 Sewer Mains and Rehabilitating or requiring Rehabilitation of defective Lower Laterals.

18 100. Inflow and Rapid Infiltration Identification and Reduction. In 2010, after consultation
 19 with the Regional Water Board, EPA approved the City of Piedmont's Inflow Identification
 20 and Reduction Plan. In lieu of further implementation of the Inflow identification portions
 21 of the Plan, the City shall cooperate with EBMUD's implementation of the RTSP. The City
 22 shall continue to implement the Inflow reduction portions of the Plan, with revisions as
 23 needed to ensure that the Plan specifies that:

24 a. The City of Piedmont shall eliminate sources of Inflow and Rapid Infiltration
 25 in the Collection System identified through the RTSP as follows:

26 i. The City shall eliminate High Priority Sources within twenty-four
 27 (24) months of the December 31st formal notification, except as further described
 28

1 below, or if Plaintiffs grant a requested time extension. A time extension request
2 shall include an explanation for why the City cannot eliminate the High Priority
3 Source within twenty-four (24) months and an explanation for why the specific
4 additional time that is being requested by the Satellite is appropriate. Time
5 extensions pursuant to this subparagraph may be considered non-material
6 modifications to this Consent Decree. If the City disagrees with EBMUD whether a
7 particular source is a High Priority Source, it shall meet and confer with EBMUD
8 within 45 Days of receiving EBMUD's notification to resolve the matter between the
9 two entities.

10 ii. The City shall identify the category of each High Priority Source as a
11 Linear High Priority Source, a Non-Linear High Priority Source, or a Private High
12 Priority Source. The City shall summarize the categorization of its High Priority
13 Sources each Year in its Annual Report as described in the "ANNUAL
14 REPORTING REQUIREMENTS" Section. Once the City has identified a source of
15 Inflow and Rapid Infiltration as a Linear High Priority Source, a Non-Linear High
16 Priority Source, or a Private High Priority Source that designation cannot be changed
17 without review and approval by Plaintiffs.

18 iii. For Linear High Priority Sources, the City does not need to exceed
19 the feet of Sewer Main Rehabilitation per year required by Paragraph 96(a) to do the
20 Work indicated by EBMUD's notice(s).

21 iv. The length of the Collection System Rehabilitated pursuant to
22 subparagraph 100(a)(i) may be counted towards the City's Sewer Main
23 Rehabilitation requirement in Paragraph 96(a).

24 v. All other Inflow and Rapid Infiltration sources in the Collection
25 System not identified by EBMUD as High Priority Sources shall be incorporated into
26 the City's Capital Improvement Plan, within twenty-four (24) months from the date
27 EBMUD provides notification to the City, in order to eliminate the sources of Inflow
28

1 and Rapid Infiltration in the Collection System as expeditiously as possible.

2 b. Private High Priority Sources

3 i. For all sources that are identified by the City as Private High Priority
4 Sources, the City shall within the twenty-four (24) months from EBMUD's
5 notification:

6 (a) Notify the owner of the Private High Priority Source, with an
7 identification of the physical location of the source and provide a description
8 of the source and the defect; and

9 (b) Initiate all necessary administrative, civil, or criminal
10 enforcement action(s) to eliminate the Private High Priority Source.

11 ii. The twenty-four (24) month deadline is not applicable if the owner of
12 the Private High Priority Source is the State or federal government or a Public Entity
13 other than the City. In such a case, the City shall notify the State or federal
14 government or Public Entity of the identified Private High Priority Source, copying
15 Plaintiffs, EBMUD, and the Intervenors on each such notice.

16 iii. For all other sources of Inflow and Rapid Infiltration (including illicit
17 connections) not in the Collection System, the City shall notify property owners of
18 sources of Inflow and Rapid Infiltration (including illicit connections), within 90
19 Days of confirming the identified sources and initiate all necessary administrative
20 enforcement action(s) to eliminate the sources, including disconnection of all illicit
21 connections, as expeditiously as possible.

22 101. EBMUD Modeling. To facilitate EBMUD's performance of its obligations under the
23 "Flow Model Calibration Plan Preparation" and "Flow Model Calibration Plan
24 Implementation" paragraphs of the EBMUD Work, Section VII, the City shall provide, by
25 May 1st of 2022 and 2030 – and by July 15 of each other Year – information or data
26 necessary to implement the Flow Model Calibration Plan, such as: (a) for the prior Calendar
27 Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and length of
28

specific reaches of Rehabilitated Sewer Mains; (b) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and type of corrected Inflow and Rapid Infiltration sources; (c) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), any operational or physical changes in the Satellite's Collection System; and (d) for agencies not participating in the Regional Sewer Lateral Program, for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and address of all Sewer Laterals Repaired or Rehabilitated. In all Years, any flow data or rainfall data collected between April 15 of the prior Year and April 15 of the current Year shall be provided by July 15. For any data provided to EBMUD, the City shall also provide information on any known limitations of such data. The City shall not be required to provide any analysis of, or attorney work product related to, the information or data provided under this Paragraph.

C. SSO WORK

102. The City of Piedmont shall continue to Repair Acute Defects as soon as possible, but no later than within one Year of identification.

103. The City of Piedmont shall clean its entire Collection System once every five Fiscal Years (an average of 53,700 feet of Sewer Main per Fiscal Year) based upon a three-Fiscal Year rolling average with the first average calculated after three complete Fiscal Years, and control roots as necessary in locations where roots are encountered. After the fifth Fiscal Year, Sewer Mains that are greater than 15 inches in diameter may be cleaned based on condition assessment, which shall, at a minimum, take into consideration any information concerning the accumulation of FOG, sediment, and debris derived from CCTV inspection or cleaning history.

104. The City of Piedmont shall continue to implement the hot spot cleaning program set forth in its AMIP.

XIV. WORK – STEGE SANITARY DISTRICT

A. IMPLEMENTATION OF EXISTING PROGRAM AND IMPROVEMENTS

1 105. On May 14, 2013, after consultation with the Regional Water Board, EPA conditionally
2 approved the District's AMIP. For the duration of the Consent Decree, the District shall
3 implement the programs set forth in its SSMP and AMIP for controlling SSOs and reducing
4 I&I. In addition, the District shall implement the Work set forth in this Section to
5 accomplish the goal of eliminating SSOs and further reduce I&I. The District shall revise its
6 AMIP as necessary, so that it is consistent with the requirements of this Section, and to
7 ensure that Repair and Rehabilitation projects continue to be adequately identified and
8 planned for.

9 **B. I&I REDUCTION WORK**

10 106. Reserved.

11 107. Sewer Main and Maintenance Hole Rehabilitation

12 a. By June 30, 2016, the District shall complete Collection System
13 Rehabilitation of 23,680 feet of Sewer Main. Beginning on July 1, 2016, the District shall
14 complete, by the end of each Fiscal Year, Rehabilitation of no less than the feet of Sewer
15 Main in Appendix E based on a cumulative total (i.e., 34,040 feet by June 30, 2017; 44,707
16 feet by June 30, 2018; etc.) for the duration of the Consent Decree. When the District
17 Rehabilitates a Sewer Main, it shall also Rehabilitate, as needed, all Maintenance Holes
18 associated with that Sewer Main and ensure that abandoned Sewer Laterals are not
19 connected to that Sewer Main. The District shall consider the findings of the EBMUD
20 RTSP described in EBMUD Work Section VII.B associated with Inflow and Rapid
21 Infiltration when planning and scheduling Collection System Repair and Rehabilitation
22 projects pursuant to this Paragraph, including, but not limited to, focusing Repair and
23 Rehabilitation in areas of the Collection System with high peak wet weather flows, and shall
24 update its Capital Improvement Plan accordingly.

25 b. For the duration of this Consent Decree, the District shall CCTV and
26 document condition assessments of its Collection System at an average annual rate of no
27 less than 10 percent of its Sewer Mains that are more than 10 years old, or have not been
28

1 inspected within 10 years based on a cumulative total of 77,616 feet per Fiscal Year (i.e.,
2 38,808 feet by June 30, 2014, 116,424 feet by June 30, 2015, 194,040 feet by June 30, 2016;
3 etc.). When the District inspects a Sewer Main, it shall also inspect all Maintenance Holes
4 associated with that Sewer Main.

5 c. The District shall work with the other Defendants to create Regional
6 Standards for sewer installation, Rehabilitation, and Repair and participate in submitting a
7 group report of the recommended Regional Standards for EPA's review and approval by
8 June 30, 2016, and for review, every five years thereafter.

9 108. Regional Sewer Lateral Inspection and Repair or Rehabilitation Program

10 a. On October 12, 2010, the District opted to participate in the Regional Sewer
11 Lateral Program, and has been cooperating with EBMUD in the implementation of that
12 program since that time.

13 b. The District shall continue to provide EBMUD the information required by
14 and at the frequency determined necessary by EBMUD for the implementation of the
15 Regional Ordinance program.

16 c. Within 120 Days after the Effective Date, the District shall make written
17 requests for cooperation to the Cities of El Cerrito and Richmond, and the County of Contra
18 Costa, all of which are permitting authorities within EBMUD's service area, but are not
19 named as Defendants in these consolidated actions ("Non-Defendant Permitting Agencies").
20 In these written requests, the District shall ask the Non-Defendant Permitting Agencies to
21 include as part of the application process for building permits and approvals a requirement
22 that the applicant submit a valid Compliance Certificate.

23 d. In the event that the District identifies a property owned by a Public Entity or
24 the State or federal government that has an identified defective Upper Sewer Lateral, the
25 District shall report the address of the property and the name of the owner to the Plaintiffs as
26 part of its Annual Report, and provide a description of the Sewer Lateral defect.

27 109. Sewer Laterals

1 a. Within 30 Days of identifying a Sewer Lateral as defective, the District shall
2 notify the affected owner in writing. The notice shall provide the owner with all information
3 necessary for prompt correction of the defect, including a list of contractors, and information
4 about how to apply for any grant or loan programs for which the owner may be eligible. The
5 notice shall also provide a discussion of the environmental and legal consequences of failure
6 to correct the defect.

7 b. The District shall assist EBMUD in the development, pursuant to Paragraph
8 32 above, of an education and outreach program designed to encourage Sewer Lateral
9 owners to inspect and, if necessary, Repair or Rehabilitate Sewer Laterals before owners are
10 required to under the Regional or Local Ordinances.

11 110. Lower Laterals. The District's Ordinances state that the property owner is the owner of
12 the Lower Lateral and has full responsibility for its operation and maintenance. On June 9,
13 2011, the District enacted a Local Ordinance which extends EBMUD's Regional Ordinance
14 to apply to Lower Laterals. Unless the property owner already has a valid Compliance
15 Certificate, the property owner is required under the ordinance to obtain a Compliance
16 Certificate from EBMUD (a) prior to transferring title to the residential, commercial, or
17 industrial structure, (b) prior to obtaining any permit or other approval needed for the
18 construction or significant modification of such structure at a cost in excess of \$100,000, or
19 (c) prior to obtaining approval from EBMUD for an increase or decrease in size of the
20 owner's water service. No later than 120 Days after EBMUD amends its Regional
21 Ordinance as required in Paragraph 20 above, the District shall enact amendments to its
22 Local Ordinance sufficient to extend the application of the Amended Regional Ordinance to
23 Lower Laterals.

24 111. Inflow and Rapid Infiltration Identification and Reduction. On December 6, 2010, after
25 consultation with the Regional Water Board, EPA approved the District's Inflow
26 Identification and Reduction Plan. In lieu of further implementation of the Inflow
27 Identification portions of the Plan, the District shall cooperate with EBMUD's
28

1 implementation of the RTSP. The District shall continue to implement the Inflow reduction
2 portions of the Plan, with revisions as needed to ensure that the Plan specifies that:

3 a. The District shall eliminate sources of Inflow and Rapid Infiltration in the
4 Collection System identified through the RTSP as follows:

5 i. The District shall eliminate High Priority Sources within twenty-four
6 (24) months of the December 31st formal notification, except as further described
7 below, or if Plaintiffs grant a requested time extension. A time extension request
8 shall include an explanation for why the District cannot eliminate the High Priority
9 Source within twenty-four (24) months and an explanation for why the specific
10 additional time that is being requested by the Satellite is appropriate. Time
11 extensions pursuant to this subparagraph may be considered non-material
12 modifications to this Consent Decree. If the District disagrees with EBMUD whether
13 a particular source is a High Priority Source, it shall meet and confer with EBMUD
14 within 45 Days of receiving EBMUD's notification to resolve the matter between the
15 two entities.

16 ii. The District shall identify the category of each High Priority Source
17 as a Linear High Priority Source, a Non-Linear High Priority Source, or a Private
18 High Priority Source. The District shall summarize the categorization of its High
19 Priority Sources each Year in its Annual Report as described in the "ANNUAL
20 REPORTING REQUIREMENTS" Section. Once the District has identified a source
21 of Inflow and Rapid Infiltration as a Linear High Priority Source, a Non-Linear High
22 Priority Source, or a Private High Priority Source that designation cannot be changed
23 without review and approval by Plaintiffs.

24 iii. For Linear High Priority Sources, the District does not need to
25 exceed the feet of Sewer Main Rehabilitation per year required by Paragraph 107(a)
26 to do the Work indicated by EBMUD's notice(s).

27 iv. The length of the Collection System Rehabilitated pursuant to
28

1 subparagraph 111(a)(i) may be counted towards the District's Sewer Main
2 Rehabilitation requirement in Paragraph 107(a).

3 v. All other Inflow and Rapid Infiltration sources in the Collection
4 System not identified by EBMUD as High Priority Sources shall be incorporated into
5 the District's Capital Improvement Plan, within twenty-four (24) months from the
6 date EBMUD provides notification to the District, in order to eliminate the sources
7 of Inflow and Rapid Infiltration in the Collection System as expeditiously as
8 possible.

9 b. Private High Priority Sources

10 i. For all sources that are identified by the District as Private High
11 Priority Sources, the District shall within the twenty-four (24) months from
12 EBMUD's notification:

13 (a) Notify the owner of the Private High Priority Source, with an
14 identification of the physical location of the source and provide a description
15 of the source and the defect; and

16 (b) Initiate all necessary administrative, civil, or criminal
17 enforcement action(s) to eliminate the Private High Priority Source.

18 ii. The twenty-four (24) month deadline is not applicable if the owner of
19 the Private High Priority Source is the State or federal government or a Public Entity
20 other than the District. In such a case, the District shall notify the State or federal
21 government or Public Entity of the identified Private High Priority Source, copying
22 Plaintiffs, EBMUD, and the Intervenors on each such notice.

23 iii. For all other sources of Inflow and Rapid Infiltration (including illicit
24 connections) not in the Collection System, the District shall notify property owners
25 of sources of Inflow and Rapid Infiltration (including illicit connections), within 90
26 Days of confirming the identified sources and initiate all necessary administrative
27 enforcement action(s) to eliminate the sources, including disconnection of all illicit
28

connections, as expeditiously as possible.

112. EBMUD Modeling. To facilitate EBMUD’s performance of its obligations under the “Flow Model Calibration Plan Preparation” and “Flow Model Calibration Plan Implementation” paragraphs of the EBMUD Work, Section VII, the District shall provide, by May 1st of 2022 and 2030 – and by July 15 of each other Year – information or data necessary to implement the Flow Model Calibration Plan, such as: (a) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and length of specific reaches of Rehabilitated Sewer Mains; (b) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and type of corrected Inflow and Rapid Infiltration sources; (c) for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), any operational or physical changes in the Satellite’s Collection System; and (d) for agencies not participating in the Regional Sewer Lateral Program, for the prior Calendar Year in 2022 and 2030 (for other years for the prior Fiscal Year), the location and address of all Sewer Laterals Repaired or Rehabilitated. In all Years, any flow data or rainfall data collected between April 15 of the prior Year and April 15 of the current Year shall be provided by July 15. For any data provided to EBMUD, the District shall also provide information on any known limitations of such data. The District shall not be required to provide any analysis of, or attorney work product related to, the information or data provided under this Paragraph.

C. SSO WORK

113. Capacity Assurance. The District shall monitor the water level in Maintenance Holes during rain events at the following locations:

- i. Kearney Street and Conlon Avenue
- ii. Blake Street and Elm Street
- iii. Liberty Street and Lincoln Avenue
- iv. Coventry Road and Lenox Road
- v. Donal Avenue and Elm Street

- vi. Fairmount Avenue and Kearney Street
- vii. Behrens Street and B Street
- viii. Pomona Avenue and Ward Avenue
- ix. Rincon Road and Kerr Avenue

In the event that the District determines that the water level reaches within one (1) foot of the Maintenance Hole rim during a rain event that is less than or equivalent to the December 5, 1952 Storm in any of these locations, experiences a capacity related SSO in any of these locations, or has reason to believe an SSO is likely to occur, the District shall implement improvements within one (1) Calendar Year of the rain and/or SSO event to address the capacity deficiency. The District shall utilize a water level monitoring method that accurately captures the highest water level experienced in the Maintenance Hole during a rain event. This may include, but is not limited to the following methods: coating the wall of the Maintenance Hole with chalk to indicate the maximum water level during the rain event, or installing a water pressure sensor in the Maintenance Hole that is calibrated to accurately measure water level reached in the Maintenance Hole. A visual inspection during the rain event shall not be used as the sole monitoring method at any location. The District shall ensure that the improvements do not cause other capacity related bottlenecks. Regardless of whether the District experiences an SSO in these locations, or believes an SSO is likely to occur, the District shall consider the potential capacity deficiency in any of these locations as a factor in prioritizing these lines in upcoming capital improvement projects. Assessment may be discontinued for any location where a Sewer Main is replaced by a larger capacity Sewer Main, after the District assesses the location for at least two Wet Weather Seasons following such replacement and there is no evidence of a potential capacity deficiency.

114. Sewer Main Inspection After SSOs. In addition to the sewer main inspection requirements set forth in Paragraph 107(b) above, the District shall continue to CCTV inspect downstream, and upstream as necessary, of SSO locations, for purposes of determining the cause of the SSO, including FOG-related SSOs, subsequent to any SSO that

1 the District determines is caused by conditions in Sewer Mains.

2 115. Acute Defects. The District shall continue to Repair Acute Defects as soon as possible,
3 but no later than within one Year of identification. For purposes of this Paragraph, an Acute
4 Defect is defined as a failure in a Sewer Main in need of an urgent response to address an
5 imminent risk of an SSO with a structural damage severity index (DSI) rating of 500 or
6 greater obtained through CCTV inspection and condition assessment.

7 116. Sewer Main Cleaning. The District shall clean a total of at least 211,200 feet of Sewer
8 Mains per Fiscal Year, including repeats, and Sewer Mains less than eighteen (18) inches in
9 diameter shall be cleaned at least once every five (5) years. Sewer Mains eighteen (18)
10 inches or greater in diameter shall be cleaned on a ten (10) year or less cycle, unless an
11 initial condition assessment indicates cleaning is not required, which shall, at a minimum,
12 take into consideration any information concerning the accumulation of FOG, sediment, and
13 debris derived from CCTV inspection or cleaning history.

14 117. Root Control. The District shall continue its root control program of chemically treating
15 with foam a minimum of 40,000 feet of Sewer Mains annually on a three-year rolling
16 average to control excessive roots. This minimum amount may be reduced as lines are
17 Rehabilitated or CCTV assessment indicates there are no longer excessive roots requiring
18 treatment. The District may propose and provide a basis for reductions of the minimum
19 amount as part of an Annual Report submitted pursuant to Section XVIII, for EPA review
20 and approval, after consultation with the Regional Water Board.

21 118. Hot Spot Cleaning. The District shall continue its hot spot program of a minimum of
22 100,000 feet of lines cleaned annually, including repeat cleanings, at a six-month or less
23 interval. This minimum amount may be reduced as Sewer Mains are Rehabilitated, or if the
24 District experiences no SSOs in specific Sewer Mains for a consecutive three-year period
25 and assessment indicates cleaning is not required in successive cleaning cycles. The District
26 will propose and provide a basis for reductions of the minimum amount of hot spot cleaning
27 as part of the Annual Report submitted pursuant to Section XVIII for EPA review and
28

comment, after consultation with the Regional Water Board.

119. FOG Control. The District shall continue to work with EBMUD in the implementation of the East Bay Regional Fats, Oils and Grease (FOG) Control Program and coordinate EBMUD's FOG activities within the District. The District shall refer FOG-related SSOs to EBMUD for investigation. If a food service establishment is determined to be contributing to FOG-related SSOs and does not implement recommendations made by EBMUD, the District shall take all necessary actions to ensure that the food service establishment adequately controls FOG.

120. SSO Prevention and Outreach.

a. The District shall continue to participate in the Underground Service Alert (USA) North damage prevention service that is designed to protect underground facilities in Northern California.

b. The District shall continue outreach to inform plumbers, contractors and utility companies of the need for care and protection when working on or around the sanitary sewer system. The District shall provide the information through informational letters, pre-construction meetings, field meetings, direct phone calls, and direct mailings. The District shall reach out to plumbers and contractors working on Sewer Laterals to prevent the discharge of debris, such as roots, into the Sewer Mains. For those contractors working for the District, the District shall ensure that such contractors are bound, contractually, to locate and avoid damaging the Districts sewer lines when performing work on or around the sanitary sewer system.

c. The District shall continue public education efforts to inform its residents how their actions can help prevent SSOs, through targeted outreach, newsletters, website, and pamphlets distributed at public events and at its permit counter.

XV. PERFORMANCE EVALUATION AND WORK PLAN REVISION PROCESS

A. PERFORMANCE EVALUATION PLAN PREPARATION AND APPROVAL

121. Joint-Defense-Group-Privileged Steps

1 a. The purpose of the Joint-Defense-Group-Privileged Steps is for Defendants
2 to prepare a PEP for submission to Plaintiffs.

3 b. No later than April 1, 2020, EBMUD shall prepare and submit to the
4 Satellites a draft PEP.

5 c. No later than one month after the Satellites' receipt of the draft PEP from
6 EBMUD, each Satellite shall provide its comments on the PEP, if any, to EBMUD.

7 d. If any Satellite has comments on the draft PEP and requests a meeting of the
8 Defendants, EBMUD shall, within one month after receipt of the comment(s), host a
9 meeting of all Defendants. The purpose of the meeting shall be to respond to comments and
10 attempt to build consensus around the draft PEP.

11 e. No later than one month after the meeting (or the comment deadline if no
12 meeting is requested), EBMUD shall submit to Plaintiffs its final PEP.

13 122. The review and approval of the PEP shall be according to the "REVIEW AND
14 APPROVAL OF DELIVERABLES" and "DISPUTE RESOLUTION" Sections of this
15 Decree.

16 123. No later than 180 Days prior to the second Mid-Course Check-In WWF Output Test
17 required by Paragraph 133.2, Defendants shall review and propose revisions to the PEP as
18 appropriate in light of new information gathered during Decree implementation up to that
19 point. Review and approval of any proposed revisions to the PEP shall be according to the
20 "REVIEW AND APPROVAL OF DELIVERABLES" and "DISPUTE RESOLUTION"
21 Sections of this Decree.

22 **B. PERFORMANCE EVALUATION PLAN IMPLEMENTATION**

23 124. Once the PEP has been approved pursuant to the "REVIEW AND APPROVAL OF
24 DELIVERABLES" Section of this Decree and any procedures pursuant to the "DISPUTE
25 RESOLUTION" Section of this Decree have been completed, the PEP will be ready for
26 implementation. If a Mid-Course Check-In WWF Output Test performed pursuant to
27 Section XVI(A) of this Decree for a WWF shows the Work required by this Decree is not
28

1 expected to eliminate discharges during a December 5, 1952 Storm from that WWF by the
2 date prescribed by this Decree, EBMUD shall implement – and the Satellites shall cooperate
3 with EBMUD’s implementation of – the approved PEP for that WWF by the next Wet
4 Season or, if Defendants have made a request pursuant to the next paragraph and are unable
5 to begin PEP implementation by the next Wet Season because EPA has not acted on the
6 request by September 1 of the Year in which the request is made, by the following Wet
7 Season.

8 125. If the Defendants fail to meet the Mid-Course Check-In WWF Output Test required by
9 Paragraph 133.1 by a factor of no more than 20 percent (for example, for a required
10 benchmark of 50%, if the actual Output Ratio does not exceed 60%), or the Mid-Course
11 Check-In WWF Output Test required by Paragraph 133.2 by a factor of no more than 10
12 percent (for example; for a required benchmark of 50%, if the actual Output Ratio does not
13 exceed 55%), Defendants may submit a written request to Plaintiffs no later than August 1
14 of the year in which the Mid-Course Check-In WWF Output Test is performed for
15 permission to continue or modify the Work without implementing the PEP. Any such
16 request shall include all data and information needed to demonstrate why implementation of
17 the PEP would not increase the likelihood that Defendants will meet the deadlines set forth
18 in Paragraph 16 of Section VI (Work – General) for each WWF in light of special
19 circumstances or proposed modifications to the Work or both. Any decision by Plaintiffs
20 with respect to such a request shall not be subject to dispute under Section XXII (Dispute
21 Resolution).

22 126. The Satellites shall provide EBMUD with access, as needed, to their Collection Systems
23 to perform EBMUD’s obligations under the PEP. The Satellites shall coordinate with
24 EBMUD to share information, as needed, from their GIS systems and reports on Work
25 completed to date.

26 127. The Parties recognize that the PEP must be sufficiently flexible to adapt to unforeseen
27 circumstances (including, but not limited to changes in technology). If Defendants believe it
28

is appropriate to materially modify any portion of the approved PEP before or during the course of its implementation, they may seek to do so pursuant to the provisions of the “REVIEW AND APPROVAL OF DELIVERABLES” Section of this Decree. For purposes of this Paragraph, material modifications include, without limitation, changes that result in a reduction in the number of flow monitoring locations, and any alteration to key schedule milestones. Defendants shall not implement any such material modification until said modification is approved by EPA, after consultation with the Regional Water Board (or any dispute is resolved pursuant to the “DISPUTE RESOLUTION” Section of this Decree). In the interim, Defendants shall continue to implement the approved PEP.

C. REVISED WORK PLAN PREPARATION AND APPROVAL

128. The Revised Work Plan (RWP) provisions of this Decree shall apply only in the event Defendants are obligated under this Decree to implement the approved PEP.

129. Joint-Defense-Group-Privileged Steps

a. The purpose of the Joint-Defense-Group-Privileged Steps is for Defendants to prepare and propose to Plaintiffs a single RWP signed on behalf of all Defendants.

b. No later than seven months after the end of the second complete Wet Season of PEP implementation, EBMUD shall prepare and submit to the Satellites one or more draft RWPs.

c. No later than two months after the Satellites’ receipt of the draft RWP, each Satellite shall provide to all Defendants either (i) notice of the Satellite’s staff’s intent to recommend to the Satellite’s governing body that it authorize staff to sign EBMUD’s draft RWP, (ii) notice of the Satellite’s staff’s intent to recommend to the Satellite’s governing body that it authorize staff to sign one or more other Satellite’s draft RWP(s), or (iii) an alternative draft RWP. A Satellite’s alternative draft RWP may incorporate by reference portions of any other draft RWP.

d. At any time it becomes apparent that Defendants agree on a single RWP, Defendants shall within three months sign that RWP and submit it to Plaintiffs for review

1 and approval. Defendants' signatures shall be duly authorized.

2 e. If there are competing RWPs, EBMUD shall, within one month after receipt
3 of the alternative draft RWPs, host a meeting of all Defendants. The purpose of the meeting
4 shall be to attempt to build consensus and minimize the number of RWPs submitted to
5 arbitration (as provided below).

6 f. No later than one month after the meeting hosted by EBMUD, each
7 Defendant shall provide to the other Defendants either (i) notice of the Defendant's staff's
8 intent to recommend to the Defendant's governing body that it authorize staff to sign a
9 specified draft RWP previously produced or (ii) a revised draft RWP.

10 g. If there are still competing RWPs, Defendants shall submit them to a private
11 arbitrator selected by Defendants for confidential review no later than three months after
12 Defendants' receipt of all documents contemplated by the preceding paragraph. Each
13 Defendant's submittal shall be accompanied by an opening brief and a declaration affirming
14 that the accompanying draft RWP was submitted to the other Defendants at least 45 Days
15 prior to submittal to the arbitrator. Responsive briefs shall be submitted within one month
16 thereafter. Within 30 Days of submission of the responsive briefs, the arbitrator shall hold a
17 confidential hearing with Defendants. After the hearing, the arbitrator shall first determine
18 which among the competing RWPs are Effective RWPs. If there is only one Effective
19 RWP, within 30 Days of the hearing, Defendants shall submit that RWP to Plaintiffs for
20 review and approval. If there is more than one Effective RWP, the arbitrator shall choose
21 one of them based on criteria specified by Defendants, and Defendants shall submit that
22 RWP to Plaintiffs for review and approval within 30 Days of the hearing.

23 130. Any RWP shall be reviewed and approved by Plaintiffs according to the "REVIEW
24 AND APPROVAL OF DELIVERABLES" and "DISPUTE RESOLUTION" Sections of this
25 Consent Decree.

26 **D. REVISED WORK PLAN IMPLEMENTATION**

27 131. Each Defendant shall implement the Work assigned to it in the approved RWP according
28

to the schedules set forth therein. In the event a Defendant refuses or is determined by a court to be unable to perform the Work required of it under an approved RWP, EPA may, at its option, after consultation with the Regional Water Board, (a) seek an order from the Court requiring performance; (b) revoke its approval of the RWP; or (c) modify the approved RWP to address the Defendant's refusal or inability to perform.

132. The Parties recognize that the RWP must be sufficiently flexible to adapt to unforeseen circumstances (including, but not limited to changes in technology). If Defendants believe it is appropriate to materially modify any portion of the approved RWP before or during the course of its implementation, they may seek to do so pursuant to the provisions of the "MODIFICATION" Section of this Decree. For purposes of this Paragraph, material modifications shall include, without limitation, changes that result in any alteration to key schedule milestones. Defendants shall not implement any such material modification until said modification is approved by the Court. In the interim, Defendants shall continue to implement the Work.

XVI. WWF OUTPUT TESTS

A. MID-COURSE CHECK-IN WWF OUTPUT TESTS

133.0. The purpose of the Mid-Course Check-In WWF Output Tests is to demonstrate that the Work being performed by the Defendants under this Decree is yielding WWF discharge reductions sufficient to meet the deadlines for WWF discharge elimination set forth in Paragraph 16. Defendants will perform Mid-Course Check-In WWF Output Tests twice, in 2022 and 2030, as described below.

133.1. Prior to September 30, 2022, EBMUD shall perform the first Mid-Course Check-In WWF Output Test – using the information specified in Paragraph 38.b.v. – by comparing the Three-Year-Average Output Ratio for the San Antonio Creek, Point Isabel and Oakport WWFs to the benchmarks of 43%, 53% and 65%, respectively, and submit the WWF Output Test results and the corresponding Flow Model Calibration Report, to the Plaintiffs for review and approval pursuant to Section XIX (Review and Approval of Deliverables) of this

Consent Decree.

133.2. Prior to September 30, 2030, EBMUD shall perform the second Mid-Course Check-In WWF Output Test – using the information specified in Paragraph 38.b.v. – by comparing the Three-Year-Average Output Ratio for the Point Isabel and Oakport WWFs to the benchmarks of 18% and 31%, respectively, and submit the WWF Output Test results and the corresponding Flow Model Calibration Report to the Plaintiffs for review and approval pursuant to Section XIX (Review and Approval of Deliverables) of this Consent Decree.

133.3. Defendants shall implement a Performance Evaluation Plan (“PEP”) – pursuant to Section XV (“PERFORMANCE EVALUATION AND WORK PLAN REVISION PROCESS”) – for any WWF that exceeds the applicable benchmark during a Mid-Course Check-In WWF Output Test.

B. COMPLIANCE WWF OUTPUT TESTS

134.0. The purpose of the Compliance WWF Output Tests is to demonstrate that Defendants have achieved the elimination of WWF discharges. Defendants will perform three Compliance WWF Output Tests, one for each WWF, as described below.

134.1. Prior to December 15, 2028, EBMUD shall perform a Compliance WWF Output Test for the San Antonio Creek WWF – using the information specified in Paragraph 38.b.v. – and submit the WWF Output Test results and the corresponding Flow Model Calibration Report to the Plaintiffs for review and approval pursuant to Section XIX (Review and Approval of Deliverables) of this Consent Decree. If the Output Ratio is 0% and the Plaintiffs approve the submittal, that WWF shall be deemed in “Interim Compliance” with the applicable discharge elimination deadline in Paragraph 16.

134.2. Prior to December 15, 2034, EBMUD shall perform a Compliance WWF Output Test for the Point Isabel WWF – using the information specified in Paragraph 38.b.v. – and submit the WWF Output Test results and the corresponding Flow Model Calibration Report to the Plaintiffs for review and approval pursuant to Section XIX (Review and Approval of Deliverables) of this Consent Decree. If the Output Ratio is 0% and the Plaintiffs approve

1 the submittal, that WWF shall be deemed in “Interim Compliance” with the applicable
2 discharge elimination deadline in Paragraph 16.

3 134.3. Prior to December 15, 2036, EBMUD shall perform a Compliance WWF Output Test
4 for the Oakport WWF – using the information specified in Paragraph 38.b.v. – and submit
5 the WWF Output Test results and the corresponding Flow Model Calibration Report to the
6 Plaintiffs for review and approval pursuant to Section XIX (Review and Approval of
7 Deliverables) of this Consent Decree. If the Output Ratio is 0% and the Plaintiffs approve
8 the submittal, that WWF shall be deemed in “Interim Compliance” with the applicable
9 discharge elimination deadline in Paragraph 16.

10 134.4. After the compliance deadline specified in Paragraph 16 of Section VI (Work – General)
11 for a WWF has passed, if the Output Ratio for that WWF in any subsequent report by
12 EBMUD (pursuant to Section XVIII – Annual Reporting Requirements) exceeds 0%
13 (making the WWF a “Lapsed WWF”), Defendants shall conduct all investigations and
14 analyses needed to provide an explanation for the Lapse. Within 365 Days of any such
15 report, Defendants shall complete said investigations and analyses and provide Plaintiffs
16 with a copy to Intervenors with a detailed description of the additional Work required
17 (which may include but shall not be limited to Sewer Main Rehabilitation, Inflow and Rapid
18 Infiltration reduction Work, Sewer Lateral Work, storage or any combination of the
19 foregoing or other measures) to return the Lapsed WWF’s Output Ratio to 0%, and the
20 proposed schedule to complete such Work (collectively, the “Lapsed WWF Correction
21 Process”). Upon EPA approval of the additional Work after consultation with the Regional
22 Water Board, Defendants shall perform all such additional Work under the approved
23 schedule.

24 134.5. After the compliance deadline specified in Paragraph 16 of Section VI (Work – General)
25 at a WWF has passed, if that WWF experiences an actual discharge, then, within 90 Days of
26 that discharge:

27 a. EBMUD shall determine whether the discharge was due to operator error or
28

1 mechanical or electrical failure;

2 b. If the discharge was due to operator error or mechanical or electrical failure,
3 EBMUD shall report to Plaintiffs with a copy to Intervenors a description of the failure, an
4 explanation of the reasons why EBMUD believes the Flow Model does not need to be
5 recalibrated, and the steps that have been and will be taken to prevent recurrence of the
6 operator error or mechanical or electrical failure;

7 c. If the discharge was not due to operator error or mechanical or electrical
8 failure and EBMUD determines that the Flow Model as calibrated during the most recent
9 annual recalibration in accordance with the Flow Model Calibration Plan predicts the
10 measured discharge volume for the discharge in question (within a reasonable margin of
11 variability under industry-standard modeling practices), EBMUD shall report to Plaintiffs
12 with a copy to Intervenors a description of its determination for review and approval
13 pursuant to Section XIX (Review and Approval of Deliverables) of this Consent Decree;

14 d. If the discharge was not due to operator error or mechanical or electrical
15 failure and the Flow Model as calibrated during the most recent annual recalibration in
16 accordance with the Flow Model Calibration Plan does not predict the measured discharge
17 volume for the discharge in question (within a reasonable margin of variability under
18 industry-standard modeling practices), EBMUD shall (i) recalibrate the Flow Model in
19 accordance with the Flow Model Calibration Plan until it predicts the measured discharge
20 volume for the discharge in question (within a reasonable margin of variability under
21 industry-standard modeling practices) and only use rainfall and flow monitoring data for the
22 365 Days prior to the actual discharge and 7 Days thereafter, including rainfall and flow
23 monitoring data from the storm that caused the actual discharge, (ii) after recalibration,
24 calculate the Output Ratio, (iii) submit the Output Ratio and the details of the recalibration
25 process in a Flow Model Calibration Report to the Plaintiffs, with a copy to Intervenors, for
26 review and approval pursuant to Section XIX (Review and Approval of Deliverables) of this
27 Consent Decree; and (iv) if the Output Ratio is greater than 0% and the Plaintiffs approve
28

the submittal, commence the Lapsed WWF Correction Process described in the preceding Paragraph 134.4, which Process shall be completed by the next Annual Report deadline.

XVII. URBAN RUNOFF DIVERSION PROJECT

135. EBMUD shall implement the Urban Runoff Diversion Project (“Project”) described in Appendix C to this Consent Decree in compliance with the approved plans and schedules for such Project and other terms of this Consent Decree. EBMUD shall submit its plan for the Project to the Plaintiffs for review and approval pursuant to Section XIX (Review and Approval of Deliverables) of this Consent Decree in accordance with the schedules set forth in Appendix C. If EBMUD determines that, due to forces beyond EBMUD’s control (including the failure to successfully negotiate and enter into necessary contractual agreements despite making all reasonable and prudent efforts to do so), it cannot, or will be substantially impaired in its ability to, implement the Project required under this Section, Defendants shall propose an alternative project that yields similar environmental benefits. Within 90 Days of such determination Defendants shall submit to Plaintiffs an alternative mitigation project proposal in accordance with Section XIX (Review and Approval of Deliverables). Any such alternative mitigation project shall be a material modification to this Decree subject to the requirements of Section XXIX (Modification).

136. All plans and reports prepared by EBMUD pursuant to the requirements of this Section of the Consent Decree and required to be submitted to EPA shall be publicly available from EBMUD without charge.

137. EBMUD shall certify, as part of the plan submitted to the Plaintiffs for the Project, that as of the date of lodging of this Consent Decree, EBMUD is not otherwise required by law to perform the Project described in the plan, that EBMUD is unaware of any other person who is required by law to perform the Project, and that EBMUD will not use any Project, or portion thereof, to satisfy any obligations that it may have under other applicable requirements of law in effect as of the date of lodging.

138. Within forty-five (45) Days following commissioning of the Project (the date the Project

1 becomes operational following the completion of startup testing) required under this
2 Consent Decree, EBMUD shall submit to the Plaintiffs a report that documents the date that
3 the Project was fully operational as outlined in Appendix C.

4 **XVIII. ANNUAL REPORTING REQUIREMENTS**

5 **A. TIMING**

6 139. By September 30th of each Fiscal Year (except as provided in the final sentence of each
7 of Paragraphs 149 and 150), each Defendant shall submit to Plaintiffs, with a copy to
8 Intervenors, an annual progress report ("Annual Report") covering the period July 1st
9 through June 30th of the prior Fiscal Year.

10 **B. CONTENTS**

11 140. EBMUD shall include in the first Annual Report all of the information required by
12 Section VI of the EBMUD SO (Annual Reporting Requirements) for the period July 1, 2013
13 to June 30, 2014. Each Satellite shall include in the first Annual Report all of the
14 information required by Section XIII of the Satellite SO (Annual Reporting Requirements)
15 for the period January 1, 2013 to June 30, 2014. All subsequent Annual Reports for each
16 Defendant shall include a summary discussion of each of the following for the period from
17 July 1 through June 30 of the prior Fiscal Year:

18 **C. FOR EACH DEFENDANT:**

19 141. A list of all Deliverables submitted to Plaintiffs and a description of the Work performed
20 pursuant to all Deliverables submitted to Plaintiffs and approved or commented on by EPA,
21 as well as a list of Deliverables submitted to Plaintiffs but not yet approved or commented
22 on by EPA.

23 142. A description of any known noncompliance by that Defendant with this Consent Decree
24 during the reporting period.

25 143. Any recommended changes to the Work required of that Defendant by this Consent
26 Decree, including any proposed material modifications to any Deliverable.

27 144. A Sanitary Sewer Overflow Report that includes the location of SSOs; the start and end
28

1 date and time of each SSO; the SSO volume including gross volume, amount recovered, and
 2 amount not recovered; the destination of each SSO; the probable cause(s) of the SSOs; the
 3 location(s) of repeat SSOs; a list of any SSOs at locations where the Sewer Main had been
 4 Rehabilitated in the previous ten (10) Fiscal Years; and a description of measures taken to
 5 help prevent these SSOs in the future.

6 145. If a Satellite makes a request to begin or cease participating in EBMUD's Regional
 7 Sewer Lateral Program, it shall provide an update on its request and describe any progress in
 8 adopting necessary Local Ordinance revisions. When the Satellite makes the necessary
 9 Local Ordinance revisions to cease participation in EBMUD's Regional Sewer Lateral
 10 Program, the Satellite shall thereafter report on its implementation of its Sewer Lateral
 11 Program, including the information required of Berkeley by subparagraph 157(b)(i)(A).

12 **D. FOR EBMUD ONLY:**

13 146. Regional Sewer Lateral Program.

14 a. Inspection and Repair or Rehabilitation:

15 i. the number and percent of properties that trigger actions to test Sewer
 16 Laterals pursuant to the Regional Ordinance (title transfers, construction or remodel
 17 of structures, changes in the size of water meters) for the reporting period and as a
 18 cumulative total;

19 ii. the number of Compliance Certificates issued in the reporting period
 20 and as a cumulative total;

21 iv. the number of Condition Assessment Plans and Corrective Action
 22 Plans received;

23 v. compliance and enforcement information including the number and
 24 percent of property owners failing to comply with the Regional Ordinance, a
 25 representative description of any notifications sent to property owners who fail to
 26 comply with the Regional Ordinance, a description and the number of any
 27 administrative, civil or criminal enforcement actions taken for non-compliance with
 28

1 the Regional Ordinance;

2 iii. analysis of compliance data to identify trends and compare the
3 projected and actual certification rates, which shall include an explanation of any
4 shortfall in the projected certification rates; and

5 vi. a description of any program changes identified that are expected to
6 improve the issuance rate of Compliance Certificates.

7 b. Education and Outreach: a description of activities to implement an education
8 and outreach program and an evaluation of the effectiveness of the program in accelerating
9 voluntary Repair or Rehabilitation of Sewer Laterals; an evaluation of the effectiveness of
10 the program in making logistical and financial information available to property owners who
11 elect or are required to Repair or Rehabilitate Sewer Laterals; and a description of any
12 program changes identified that are expected to improve results.

13 147. Asset Management and Interim Operation: EBMUD shall describe activities to inspect,
14 maintain, and schedule repairs to or rehabilitation of portions of EBMUD's Interceptor
15 System, including those necessary to comply with the requirements of the ISAMWP.

16 148. Pump Station Q Force Main Improvements: EBMUD shall describe activities to enable
17 bi-directional flow (dual operational mode) through the Pump Station Q Force Main.

18 149. Flow Model Calibration: EBMUD shall submit a Flow Model Calibration Report that
19 provides a summary of the data used to recalibrate the Flow Model and explains the Flow
20 Model recalibration process as described in Paragraph 38(b)(vi) & (vii). Notwithstanding
21 Paragraphs 139 and 140, in all Years other than 2022 and 2030, the information required by
22 this Paragraph 149 shall be submitted by December 15, rather than September 30.

23 150. WWF Output Ratios and Output Test Results: EBMUD shall report for each of the
24 WWFs (a) the Output Ratio as of April 15 of the year in which the Annual Report is due,
25 (b) the Three-Year-Average Output Ratio, and (c) a graphic representation comparing the
26 actual Output Ratio for each year to date to the anticipated Output Ratio for each year of the
27 Consent Decree. EBMUD shall also describe: (1) whether the Output Ratio is consistent
28

1 with a rate of WWF Output Ratio reduction that will result in compliance with the
2 benchmarks in Section XVI (“WWF OUTPUT TESTS”), (2) whether the Work completed
3 in the Fiscal Year, including Sewer Main Repair or Rehabilitation, Sewer Lateral Repair or
4 Rehabilitation, and Inflow and Rapid Infiltration source elimination, resulted in the
5 anticipated I&I reductions, (3) observations of trends and the likelihood of meeting the
6 benchmarks or discharge elimination deadlines, and (4) whether changes to any assumptions
7 in the Flow Model are anticipated for the coming Fiscal Year. EBMUD shall also report the
8 results of any WWF Output Tests performed during the reporting period. Notwithstanding
9 Paragraphs 139 and 140, in all Years other than 2022 and 2030, the information required by
10 this Paragraph 150 shall be submitted by December 15, rather than September 30.

11 151. Performance Evaluation Plan: EBMUD shall describe activities to develop a PEP; if
12 required, activities to implement a Performance Evaluation Plan; and any other information
13 required by the approved Performance Evaluation Plan.

14 152. Revised Work Plan: EBMUD shall describe activities to develop any and all Revised
15 Work Plans; activities to implement the Revised Work Plans, if required; and any other
16 information required by the approved Revised Work Plans.

17 153. Regional Standards: a description of the activities to develop – and, beginning in 2017,
18 the extent of compliance with – Regional Standards.

19 154. RTSP: EBMUD shall provide a summary of the activities that were conducted in order
20 to implement the RTSP and to identify and characterize sources of Inflow and Rapid
21 Infiltration as required by the RTSP Plan as approved by the EPA. The summary shall
22 include, but not be limited to, the following:

- 23 a. all the information required to be reported by the RTSP Plan;
- 24 b. a description of any proposed substantive modifications to the RTSP Plan, as
25 approved by EPA;
- 26 c. the areas that EBMUD evaluated during the reporting period, and the areas
27 that EBMUD plans to evaluate in the coming reporting period;
- 28

d. a summary of the results of any regional data analysis and field investigations;

e. the length (e.g., feet or miles) of the Collection System that was examined through field investigations and the type(s) of field investigation (e.g., smoke testing, flow monitoring, etc.) that was utilized for the length examined;

f. a summary of any modifications in the type of field investigation methods utilized by EBMUD, including techniques EBMUD implemented to identify and prioritize areas with high I&I;

g. a cumulative list of all sources of Inflow and Rapid Infiltration identified by EBMUD, the estimated I&I reduction from each source, the date that EBMUD notified the Satellite responsible for each source, a unique identifier for each source, the location of each source, and in any Satellite collection system, except Oakland's, whether each source is a High Priority Source;

h. the costs spent in the reporting period to implement the Required Spend, and after June 30, 2016, the cumulative total.

155. Urban Runoff Diversion Project. EBMUD shall provide the Plaintiffs with annual updates concerning the progress of the Project, including information about Project downtime, the volume diverted, and its environmental benefits.

E. FOR BERKELEY ONLY:

156. AMIP Implementation. The City shall summarize implementation of its AMIP. The summary shall include any proposed revisions to the AMIP not addressed below, along with any accompanying changes to its financial plan.

157. I&I Reduction Work. The City shall summarize its Work to reduce I&I in its service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the following:

a. Sewer Main and Maintenance Hole Rehabilitation

i. Rehabilitation: all Sewer Main and Maintenance Hole Rehabilitation

activities completed, including:

- A. the average annual rate of Sewer Main Rehabilitation based on a three-Fiscal Year rolling average, the number of feet of Sewer Mains Rehabilitated, and the cumulative total feet of Sewer Main Rehabilitated since the Effective Date;
- B. the number of Maintenance Holes associated with Rehabilitated Sewer Mains and the number of Maintenance Holes Rehabilitated;
- C. the number of abandoned Sewer Laterals found to be connected to the Sewer Main and the number of abandoned Sewer Laterals disconnected from the Sewer Main;
- D. if the City did not achieve its Rehabilitation requirement in Paragraph 64(a), an explanation of why it did not achieve the Rehabilitation requirement and a description of what changes to the Work will be made in order to correct the deficiency and achieve the Rehabilitation requirement in the subsequent Fiscal Years;
- E. the Rehabilitation budget and dollars spent on Sewer Main Rehabilitation;
- F. the Collection System Rehabilitation projects targeted to be completed in the next Fiscal Year; and
- G. an explanation of any revisions that were made to the Capital Improvement Plan or the financial plan associated with future Repair and Rehabilitation projects, including what revisions, if any, were made based on information from the EBMUD RTSP.

ii. Inspections: inspection and condition assessment activities completed, including:

- A. the rate of Sewer Main inspection and documented condition

assessment;

- B. the total feet of Sewer Main inspected with completed condition assessment and the cumulative total feet of Sewer Main inspected with completed condition assessment since the Effective Date;
- C. if the City conducts inspections of Sewer Mains using a method other than CCTV, the City shall identify the method, explain how that method is as equally effective as CCTV and identify the total feet of Sewer Main that was inspected using that method;
- D. the number of Maintenance Holes inspected; and
- E. if the City did not achieve its inspection and condition assessment requirement in 64(b), an explanation of why it did not achieve the inspection and condition assessment requirement and a description of what changes to the Work will be made in order to correct the deficiency and achieve the inspection and condition assessment requirement in subsequent Fiscal Years.

iii. Regional Standards: a description of the activities to develop – and, beginning in 2017, the extent of compliance with – Regional Standards.

b. Sewer Lateral Inspection and Repair or Rehabilitation

i. Sewer Laterals

- A. Inspection and Repair or Rehabilitation: the number of triggering actions to inspect Upper Sewer Laterals pursuant to the applicable Local Ordinance; the number of defective Upper Sewer Laterals found in that Fiscal Year; the number and percent of Upper Sewer Laterals Rehabilitated that Fiscal Year; the cumulative total of Upper Sewer Laterals Rehabilitated since the Local Ordinance was adopted; the number and percent of Upper Sewer Laterals Repaired that Fiscal Year; the cumulative total of Upper Sewer

1 Laterals Repaired since the Local Ordinance was adopted; a
2 comparison of the actual number of Upper Sewer Laterals
3 Repaired or Rehabilitated to the projected Upper Sewer Lateral
4 Repaired or Rehabilitation rates; an explanation of any shortfall
5 (e.g., due to an unusually inactive real estate market, etc.); the
6 failure rate of Upper Sewer Laterals in testing; the number of
7 Compliance Certificates issued; the number and percent of
8 property owners who fail to comply with the Local Ordinance; a
9 representative description of any notifications sent to property
10 owners who fail to comply with the Local Ordinance; a
11 description and the number of any administrative, civil or criminal
12 enforcement actions taken for non-compliance with the Local
13 Ordinance; the address and name of the owner of any property
14 owned by a Public Entity, or the State or federal government, that
15 has an identified defective Upper Sewer Lateral (including the
16 address of the property, name of the owner, and description of the
17 defect); the number of City-owned Upper Sewer Laterals
18 inspected, Repaired or Rehabilitated and the cumulative number
19 of City-owned Upper Sewer Laterals inspected, Repaired or
20 Rehabilitated from the Effective Date; the number of City-owned
21 Upper Sewer Laterals that remain to be inspected, Repaired or
22 Rehabilitated; and a description of any changes needed to improve
23 the issuance rate of Compliance Certificates;

24 B. Education and Outreach: a description of activities to implement
25 the education and outreach program within the City and an
26 evaluation of the effectiveness of the program in accelerating
27 voluntary Repair or Rehabilitation of Upper Sewer Laterals; an
28

1 evaluation of the effectiveness of the program in making logistical
 2 and financial information available to property owners who elect
 3 or are required to Repair or Rehabilitate Upper Sewer Laterals;
 4 and a description of any program changes identified that are
 5 expected to improve results.

6 ii. Lower Laterals: the number of Lower Laterals Repaired or
 7 Rehabilitated and/or reconnected associated with Sewer Main Rehabilitation; the
 8 number of Lower Lateral inspections performed not associated with Sewer Main
 9 Rehabilitation; a summary of the results of the Lower Lateral inspections; and
 10 whether the Sewer Main Work is scheduled and/or has been conducted for any areas
 11 of the Collection System in which Lower Laterals have failed inspection.

12 c. Inflow and Rapid Infiltration Identification and Elimination:

13 i. a description of the City's cooperation with EBMUD's
 14 implementation of the RTSP;

15 ii. Linear High Priority Sources

16 A. a cumulative list of all Linear High Priority Sources, including the
 17 date that the City eliminated or plans to eliminate the source, and
 18 EBMUD's unique identifier;

19 B. the number of feet of Linear High Priority Sources eliminated in
 20 the Fiscal Year, and the cumulative total feet of Linear High
 21 Priority Sources eliminated since EPA's approval of the RTSP;

22 C. the number of feet of Linear High Priority Sources that the City
 23 counted towards its Sewer Main Rehabilitation requirement in
 24 subparagraph 64(a);

25 D. for those Linear High Priority Sources that were not eliminated
 26 within twenty-four (24) months, an explanation of why the Linear
 27 High Priority Sources were not eliminated and a description of the
 28

actions that will be taken in order to eliminate the Linear High Priority Sources.

iii. Non-Linear High Priority Sources

- A. a cumulative list of all Non-Linear High Priority Sources, including the date that the City eliminated or plans to eliminate the source, and EBMUD's unique identifier;
- B. the number of Non-Linear High Priority Sources eliminated in the Fiscal Year, and the cumulative number of Non-Linear High Priority Sources eliminated since EPA's approval of the RTSP;
- C. for those Non-Linear High Priority Sources that were not eliminated within twenty-four (24) months, an explanation of why the Non-Linear High Priority Sources were not eliminated and a description of the actions that will be taken in order to eliminate the Non-Linear High Priority Sources.

iv. For sources of Inflow and Rapid Infiltration in the Collection System that are not identified as High Priority, the date that the City incorporated each source into its Capital Improvement Plan, and EBMUD's unique identifier;

v. Sources of Inflow and Rapid Infiltration not in the Collection System

- A. a cumulative list of all Private High Priority Sources, including the date that the City notified or plans to notify each owner of a source,
- B. the date of any administrative, civil, or criminal enforcement actions initiated by City to eliminate the source, the status of the enforcement actions to eliminate the source, and EBMUD's unique identifier;
- C. for all other sources of Inflow and Rapid Infiltration (including illicit connections) not in the Collection System and not owned by

the City, the date that the City notified each owner of the source, the date of any administrative enforcement actions initiated by the City, the status of the administrative enforcement to eliminate the source, and EBMUD's unique identifier.

158. SSO Reduction Work. The City shall summarize its Work to reduce SSOs in its service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the following:

a. a description of the activities to Repair Acute Defects, including the number of Acute Defects found; the number of Acute Defects Repaired; and for Acute Defects that were not Repaired within twelve (12) months from identification, provide an explanation of why they were not Repaired and describe the actions or a schedule to Repair the Defects as soon as possible;

b. the feet of Sewer Main cleaned and percent of feet of Sewer Main in the City's Collection System cleaned as part of the routine and hot spot cleaning programs, reporting both unique footage and total footage (i.e., including repeat cleanings); and

c. the feet of Sewer Mains in the hot spot cleaning program and the range of cleaning frequencies.

F. FOR ALAMEDA, ALBANY, AND PIEDMONT ONLY:

159. AMIP Implementation. Each Satellite shall summarize implementation of each element of its AMIP not addressed below. The summary shall include any proposed revisions to the AMIP, along with any accompanying changes to its financial plan.

160. I&I Reduction Work. Each Satellite shall summarize its Work to reduce I&I in its service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the following:

a. Main Line and Maintenance Hole Rehabilitation

i. Rehabilitation: all Sewer Main and Maintenance Hole Rehabilitation activities completed, including:

- A. for Piedmont, the average annual rate of Sewer Main Rehabilitation based on a three-Fiscal Year rolling average, the feet of Sewer Mains Rehabilitated, and the cumulative total feet of Sewer Main Rehabilitated since the Effective Date;
 - B. for Alameda and Albany, the number of feet of Sewer Mains Rehabilitated and the cumulative total feet of Sewer Main Rehabilitated since the Effective Date;
 - C. the number of Maintenance Holes associated with Rehabilitated Sewer Mains and the number of Maintenance Holes Rehabilitated;
 - D. the number of abandoned Sewer Laterals found to be connected to the Sewer Main and the number of abandoned Sewer Laterals disconnected from the Sewer Main;
 - E. if any Satellite did not achieve its Rehabilitation requirement in Paragraph 43(a) (Alameda), 54(a) (Albany) or 96(a) (Piedmont), an explanation of why it did not achieve the Rehabilitation requirement and a description of what changes to the Work will be made in order to correct the deficiency and achieve the Rehabilitation requirement in the subsequent Fiscal Years;
 - F. the Rehabilitation budget and dollars spent on Sewer Main Rehabilitation;
 - G. the Collection System Rehabilitation projects targeted to be completed in the next Fiscal Year; and
 - H. an explanation of any revisions that were made to the Capital Improvement Plan or the financial plan associated with future Repair and Rehabilitation projects, including what revisions, if any, were made based on information from the EBMUD RTSP.
- ii. Inspections: inspection and condition assessment activities completed,

including:

- A. the total feet of Sewer Main inspected with completed condition assessment and the cumulative total feet of Sewer Main inspected with completed condition assessment since the Effective Date;
- B. if any Satellite conducts inspections of Sewer Mains using a method other than CCTV, the Satellite shall identify the method, explain how that method is as equally effective as CCTV and identify the total feet of Sewer Main that was inspected using that method;
- C. the number of Maintenance Holes inspected; and
- D. if any Satellite did not achieve its inspection and condition assessment requirement in Paragraph 43(b) (Alameda), 54(b) (Albany), or 96(b) (Piedmont), an explanation of why it did not achieve the inspection and condition assessment requirement and a description of what changes to the Work will be made in order to correct the deficiency and achieve the inspection and condition assessment requirement in subsequent Fiscal Years.

iii. Regional Standards: a description of the activities to develop – and, beginning in 2017, the extent of compliance with – Regional Standards.

b. Sewer Lateral Inspection and Repair or Rehabilitation

i. Sewer Laterals: a description of activities and materials used to notify property owners of defective Sewer Laterals including:

- A. the number of Sewer Laterals identified as defective outside the triggering actions to test Sewer Laterals pursuant to the Amended Regional Ordinance;
- B. the number of property owners notified that their Sewer Laterals are defective;

- C. a copy of a representative notice that was sent to property owners notifying them that their Sewer Lateral is defective;
- D. a description and the number of any administrative, civil or criminal enforcement actions taken against property owners for defective Sewer Laterals;
- E. the number of City-owned Sewer Laterals; the number of City-owned Sewer Laterals inspected and Repaired or Rehabilitated and the cumulative number of City-owned Sewer Laterals inspected and Repaired or Rehabilitated from the Effective Date;
- F. the address and name of the owner of any property owned by a Public Entity, or the State or federal government, that has an identified defective Sewer Lateral, including a description of the defect; and
- G. a summary of the City's assistance to EBMUD in the development of a Sewer Lateral education and outreach program.

ii. Lower Sewer Laterals: the number of Lower Sewer Laterals Repaired or Rehabilitated and/or reconnected in association with Sewer Main Rehabilitation; the number of Lower Sewer Lateral inspections performed not associated with Sewer Main Rehabilitation; a summary of the results of the Lower Sewer Lateral inspections; and whether the Sewer Main Work is scheduled and/or has been conducted for any areas of the Collection System in which Lower Sewer Laterals have failed inspection.

c. Inflow and Rapid Infiltration Identification and Elimination:

i. a description of the City's cooperation with EBMUD's implementation of the RTSP;

ii. Linear High Priority Sources

A. a cumulative list of all Linear High Priority Sources, including the

- 1 date that the City eliminated or plans to eliminate the source, and
2 EBMUD's unique identifier;
- 3 B. the number of feet of Linear High Priority Sources eliminated in
4 the Fiscal Year, and the cumulative total feet of Linear High
5 Priority Sources eliminated since EPA's approval of the RTSP;
- 6 C. the number of feet of Linear High Priority Sources that the City
7 counted towards its Sewer Main Rehabilitation requirement in
8 subparagraph 43(a) (Alameda); 54(a) (Albany), and 96(a)
9 (Piedmont);
- 10 D. for those Linear High Priority Sources that were not eliminated
11 within twenty-four (24) months, an explanation of why the Linear
12 High Priority Sources were not eliminated and a description of the
13 actions that will be taken in order to eliminate the Linear High
14 Priority Sources.
- 15 iii. Non-Linear High Priority Sources
- 16 A. a cumulative list of all Non-Linear High Priority Sources,
17 including the date that the City eliminated or plans to eliminate
18 the source, and EBMUD's unique identifier;
- 19 B. the number of Non-Linear High Priority Sources eliminated in the
20 Fiscal Year, and the cumulative number of Non-Linear High
21 Priority Sources eliminated since EPA's approval of the RTSP;
- 22 C. for those Non-Linear High Priority Sources that were not
23 eliminated within twenty-four (24) months, an explanation of why
24 the Non-Linear High Priority Sources were not eliminated and a
25 description of the actions that will be taken in order to eliminate
26 the Non-Linear High Priority Sources.
- 27 iv. For sources of Inflow and Rapid Infiltration in the Collection System
28

that are not identified as High Priority, the date that the City incorporated each source into its Capital Improvement Plan, and EBMUD's unique identifier;

- v. Sources of Inflow and Rapid Infiltration not in the Collection System
 - A. a cumulative list of all Private High Priority Sources, including the date that the City notified or plans to notify each owner of a source,
 - B. the date of any administrative, civil, or criminal enforcement actions initiated by City to eliminate the source, the status of the enforcement actions to eliminate the source, and EBMUD's unique identifier;
 - C. for all other sources of Inflow and Rapid Infiltration (including illicit connections) not in the Collection System and not owned by the City, the date that the City notified each owner of the source, the date of any administrative enforcement actions initiated by the City, the status of the administrative enforcement to eliminate the source, and EBMUD's unique identifier.

161. SSO Reduction Work. Each Satellite shall summarize its Work to reduce SSOs in its service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the following:

- a. a description of the activities to Repair Acute Defects, including the number of Acute Defects found; the number of Acute Defects Repaired; and for Acute Defects that were not Repaired within twelve (12) months from identification, provide an explain why they were not Repaired and describe the actions or a schedule to Repair the Defects as soon as possible;
- b. for Alameda, the information required in Paragraph 161(a) for any Acute Defects in Alameda Point;

c. the feet of Sewer Main cleaned and percent of feet of Sewer Main in the City's Collection System cleaned as part of the routine and hot spot cleaning programs, reporting both unique footage and total footage (i.e., including repeat cleanings);

d. the feet of pipe in the hot spot cleaning program and the range of cleaning frequencies;

e. for Alameda, the information required in Paragraph 161(c) for feet of Sewer Mains in the hot spot cleaning program in Alameda Point;

f. for Alameda, a description of Repairs, renovations, and upgrades of its pump stations and force mains for the reporting Fiscal Year, and a description of projects to be completed in the next Fiscal Year; and

g. for Alameda, during any reporting period during which the City is a Regional Sewer Lateral Program Non-Participant, provide the information required by Paragraph 157(b).

G. FOR EMERYVILLE ONLY:

162. AMIP Implementation. Emeryville shall summarize implementation of each element of its AMIP not addressed below. The summary shall include any proposed revisions to the AMIP, along with any accompanying changes to its financial plan, and an explanation of how those revisions are consistent with the Work in the Consent Decree.

163. I&I Reduction Work. Emeryville shall summarize its Work to reduce I&I in its service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the following:

a. Sewer Main and Maintenance Hole Repair and Rehabilitation

i. Rehabilitation: all Sewer Main and Maintenance Hole Repair or Rehabilitation activities completed, including:

A. the feet of Sewer Main Rehabilitated and number of Repairs;

B. the number of Maintenance Holes associated with Rehabilitated

1 Sewer Mains and the number of Maintenance Holes Repaired or
2 Rehabilitated;

- 3 C. if the City did not achieve its Rehabilitation requirement in
4 Paragraph 73(a), an explanation of why it did not achieve the
5 Rehabilitation requirement and a description of what changes to
6 the Work will be made in order to correct the deficiency and
7 achieve the Rehabilitation requirement in subsequent Fiscal
8 Years;
- 9 D. the Rehabilitation budget and dollars spent on Sewer Main
10 Rehabilitation; and
- 11 E. the Collection System Repair or Rehabilitation projects targeted to
12 be completed in the next Fiscal Year, if any.

13 ii. Inspections: inspection and condition assessment activities
14 completed in the reporting year, including:

- 15 A. the rate of Sewer Main inspection and documented condition
16 assessment;
- 17 B. the total feet of Sewer Main inspected with completed condition
18 assessment and the cumulative total feet of Sewer Main inspected
19 with completed condition assessment since the Effective Date;
- 20 C. if the City conducts inspections of Sewer Mains using a method
21 other than CCTV, the City shall identify the method, explain how
22 that method is as equally effective as CCTV and identify the total
23 feet of Sewer Main that was inspected using that method;
- 24 D. the number of Maintenance Holes inspected; and
- 25 E. if the City did not achieve its inspection and condition assessment
26 requirement in Paragraph 73(b), an explanation of why it did not
27 achieve the inspection and condition assessment requirement and
28

1 a description of what changes to the Work will be made in order
2 to achieve the inspection and condition assessment requirement in
3 subsequent Fiscal Years.

4 iii. Regional Standards: a description of the activities to develop – and,
5 beginning in 2017, the extent of compliance with – Regional Standards.

6 b. Sewer Lateral Inspection and Repair or Rehabilitation

7 i. Sewer Laterals: a description of activities to notify property owners
8 of defective Sewer Laterals, including the number of Sewer Laterals identified as
9 defective; the number of property owners notified that their Sewer Laterals are
10 defective; and a copy of a representative notice that was sent to property owners
11 notifying them that their Sewer Lateral is defective; a description and the number of
12 any administrative, civil or criminal enforcement actions taken against property
13 owners for defective Sewer Laterals; the number of Emeryville-owned Sewer
14 Laterals; the number of Emeryville-owned Sewer Laterals inspected and Repaired or
15 Rehabilitated and the cumulative number of Emeryville-owned Sewer Laterals
16 inspected and Repaired or Rehabilitated from the Effective Date; and the address and
17 name of the owner of any property owned by a Public Entity, or the State or federal
18 government, that has an identified defective Sewer Lateral, including a description of
19 the defect and a summary of the City's assistance to EBMUD in the development of
20 a Sewer Lateral education and outreach program.

21 ii. Lower Sewer Laterals: the number of Lower Laterals Repaired or
22 Rehabilitated and reconnected in conjunction with the Rehabilitated Sewer Mains.

23 c. Inflow and Rapid Infiltration Identification and Elimination:

24 i. a description of the City's cooperation with EBMUD's
25 implementation of the RTSP;

26 ii. Linear High Priority Sources

27 A. a cumulative list of all Linear High Priority Sources, including the
28

1 date that the City eliminated or plans to eliminate the source, and
2 EBMUD's unique identifier;

3 B. the number of feet of Linear High Priority Sources eliminated in
4 the Fiscal Year, and the cumulative total feet of Linear High
5 Priority Sources eliminated since EPA's approval of the RTSP;

6 C. the number of feet of Linear High Priority Sources that the City
7 counted towards its Sewer Main Rehabilitation requirement in
8 subparagraph 73(a);

9 D. for those Linear High Priority Sources that were not eliminated
10 within twenty-four (24) months, an explanation of why the Linear
11 High Priority Sources were not eliminated and a description of the
12 actions that will be taken in order to eliminate the Linear High
13 Priority Sources.

14 iii. Non-Linear High Priority Sources

15 A. a cumulative list of all Non-Linear High Priority Sources,
16 including the date that the City eliminated or plans to eliminate
17 the source, and EBMUD's unique identifier;

18 B. the number of Non-Linear High Priority Sources eliminated in the
19 Fiscal Year, and the cumulative number of Non-Linear High
20 Priority Sources eliminated since EPA's approval of the RTSP;

21 C. for those Non-Linear High Priority Sources that were not
22 eliminated within twenty-four (24) months, an explanation of why
23 the Non-Linear High Priority Sources were not eliminated and a
24 description of the actions that will be taken in order to eliminate
25 the Non-Linear High Priority Sources.

26 iv. For sources of Inflow and Rapid Infiltration in the Collection System
27 that are not identified as High Priority, the date that the City
28

incorporated each source into its Capital Improvement Plan, and
EBMUD's unique identifier;

v. Sources of Inflow and Rapid Infiltration not in the Collection System

A. a cumulative list of all Private High Priority Sources, including
the date that the City notified or plans to notify each owner of a
source,

B. the date of any administrative, civil, or criminal enforcement
actions initiated by City to eliminate the source, the status of the
enforcement actions to eliminate the source, and EBMUD's
unique identifier;

C. for all other sources of Inflow and Rapid Infiltration (including
illicit connections) not in the Collection System and not owned by
the City, the date that the City notified each owner of the source,
the date of any administrative enforcement actions initiated by the
City, the status of the administrative enforcement to eliminate the
source, and EBMUD's unique identifier.

164. SSO Reduction Work. Emeryville shall summarize its Work to prevent SSOs in its
service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the
following:

a. a description of the activities to Repair Acute Defects, including the number
of Acute Defects found; the number of Acute Defects Repaired; and for Acute Defects that
were not Repaired within twelve (12) months from identification, provide an explanation
why they were not Repaired and describe the actions or a schedule to Repair the Defects as
soon as possible;

b. the feet of Sewer Main cleaned and percent of feet of Sewer Main cleaned as
part of the routine and hot spot cleaning programs, reporting both unique footage and total
footage (i.e., including repeat cleanings) for: (1) trunk sewers designated by ID prefixes: 20-

000, 21-000 and 22-000 in the City's Collection System and (2) all other Sewer Main in the City's Collection System;

c. the feet of Sewer Main in the hot spot cleaning program and the range of cleaning frequencies.

H. FOR OAKLAND ONLY:

165. AMIP Implementation. The City shall summarize implementation of each element of its AMIP. The summary shall include any proposed revisions to the AMIP, including, but not limited to, revisions to maintenance, construction and Rehabilitation schedules, along with any associated changes to its financial plan, and an explanation of how those revisions are consistent with its obligations under the Consent Decree.

166. I&I Reduction Work. The City shall summarize its Work to reduce I&I in its service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the following:

a. Sewer Main and Maintenance Hole Rehabilitation

i. Rehabilitation: all Sewer Main and Maintenance Hole Repair and Rehabilitation activities completed, including:

A. pursuant to subparagraph 83(a), the number of feet of Sewer Main Rehabilitated, and the cumulative total feet of Sewer Main Rehabilitated since the Effective Date;

B. pursuant to subparagraph 83(b), the number of feet of Sewer Main Rehabilitated, and the cumulative total feet of Sewer Main Rehabilitated since the Effective Date;

C. the number of Maintenance Holes associated with Rehabilitated Sewer Mains and the number of Maintenance Holes Rehabilitated;

D. a statement that the City did not reconnect any abandoned Sewer Laterals that the City found to be connected to the Sewer Main;

E. if the City did not achieve its Rehabilitation requirement in

Paragraph 83(a), or 83(b), provide an explanation of why it did not achieve the Rehabilitation requirement and a description of what changes to the Work will be made in order to correct the deficiency and achieve the Rehabilitation requirement in subsequent Fiscal Years;

F. the Rehabilitation budget and dollars spent on Sewer Main Rehabilitation;

G. the Sewer Mains targeted to be Rehabilitated in the next Fiscal Year; and

H. an explanation of any revisions that were made to Appendix H, or the financial plan associated with future Sewer Main Repair and Rehabilitation, including what revisions, if any, were made based on information from the EBMUD RTSP.

ii. Inspections: inspection and condition assessment activities completed, including:

A. the total feet of Sewer Main inspected with completed condition assessment and the cumulative total feet of Sewer Main inspected with completed condition assessment since the Effective Date;

B. if the City conducts inspections of Sewer Mains using a method other than CCTV, the City shall identify the method, explain how that method is as equally effective as CCTV and identify the total feet of Sewer Main that was inspected using that method;

C. the number of Maintenance Holes inspected; and

D. if the City did not achieve its inspection and condition assessment requirement in Paragraph 83, an explanation of why it did not achieve the inspection and condition assessment requirement and a description of what changes to the Work will be made in order to correct the deficiency and achieve the inspection and condition assessment requirement in subsequent Fiscal Years.

iii. Regional Standards: a description of the activities to develop – and, beginning in 2017, the

1 extent of compliance with – Regional Standards.

2
3 b. Sewer Lateral Inspection and Repair or Rehabilitation

4 i. Sewer Laterals: a description of the activities taken and materials used
5 to notify property owners of defective Sewer Laterals, including:

6 A. the number of Sewer Laterals identified as defective;

7 B. the number of property owners notified that their Sewer Laterals
8 are defective;

9 C. a copy of a representative notice that was sent to property owners
10 notifying them that their Sewer Lateral is defective;

11 D. a description and the number of any administrative enforcement
12 actions taken against property owners for defective Sewer
13 Laterals;

14 E. the number of Oakland-owned Sewer Laterals inspected and
15 Repaired or Rehabilitated and the cumulative number of Oakland-
16 owned Sewer Laterals inspected and Repaired or Rehabilitated
17 from the Effective Date;

18 F. the address and name of the owner of any property owned by a
19 Public Entity, or the State or federal government, that has an
20 identified defective Sewer Lateral, including a description of the
21 defect; and

22 G. a summary of the City's assistance to EBMUD in the
23 development of a Sewer Lateral education and outreach program.

24 ii. Lower Sewer Laterals: the number of Lower Sewer Laterals
25 connected to the Rehabilitated Sewer Mains and the number of Lower Sewer
26 Laterals Repaired or Rehabilitated.

27 c. Inflow and Rapid Infiltration Identification and Elimination:

- 1 i. a description of the City's cooperation with EBMUD's
- 2 implementation of the RTSP;
- 3 ii. Linear High Priority Sources
- 4 A. a cumulative list of all sources designated as Linear High Priority
- 5 Sources, including the date that the City designated each source,
- 6 the date that the City eliminated or plans to eliminate the source,
- 7 and EBMUD's unique identifier;
- 8 B. the number of feet of Linear High Priority Sources eliminated in
- 9 the Fiscal Year, and the cumulative total feet of Linear High
- 10 Priority Sources eliminated since EPA's approval of the RTSP;
- 11 C. the number of feet of Linear High Priority Sources in Sub-Basins
- 12 in Appendix H that the City counted towards its Sewer Main
- 13 Rehabilitation requirement in subparagraph 83(a);
- 14 D. the number of feet of Linear High Priority Sources that the City
- 15 counted towards its Sewer Main Rehabilitation requirement in
- 16 subparagraph 83(b);
- 17 E. for those Linear High Priority Sources that were not eliminated
- 18 within twenty-four (24) months, an explanation of why the Linear
- 19 High Priority Sources were not eliminated and a description of the
- 20 actions that will be taken in order to eliminate the Linear High
- 21 Priority Sources.
- 22 iii. Non-Linear High Priority Sources
- 23 A. a cumulative list of all sources designated as Non-Linear High
- 24 Priority Sources, including the date that the City designated each
- 25 source, the date that the City eliminated or plans to eliminate the
- 26 source, and EBMUD's unique identifier;
- 27 B. for those Non-Linear High Priority Sources that were not
- 28

eliminated pursuant to subparagraph 87(c), an explanation of why the Non-Linear High Priority Sources were not eliminated and a description of the actions that will be taken in order to eliminate the Non-Linear High Priority Sources.

- iv. Sources of Inflow and Rapid Infiltration not in the Collection System
 - A. a cumulative list of all sources designated as Private High Priority Sources, including EBMUD's unique identifier, the date that the City designated each source, the date that the City notified or plans to notify each owner of the Private High Priority Source, and the date any administrative, civil, or criminal enforcement actions were initiated to eliminate the source and the status of the enforcement actions to eliminate the source;
 - B. for all other sources of Inflow and Rapid Infiltration (including illicit connections) not in the Collection System, the date that the City notified each owner of the source, the date any administrative enforcement actions were initiated and the status of the administrative enforcement to eliminate the source.

167. SSO Reduction Work. The City shall summarize its Work to reduce SSOs in its service area in the reporting Fiscal Year, describe the success of the Work at preventing blockages and SSOs, and describe any changes to be made to the Work to further reduce blockages and SSOs. The summary shall include, but not be limited to, the following:

- a. Capacity Assurance: a description of the activities performed in order to monitor the locations in Paragraph 89(a) during rain events, including:
 - i. the highest water level in relation to the Maintenance Hole that was observed in the reporting Fiscal Year;
 - ii. the identification of any capacity-related SSO or instance of the water level reaching within one (1) foot of the Maintenance Holes rim due to a

1 lack of capacity and whether the event(s) occurred during a rain event
2 that was greater than the December 5, 1952 Storm;

3 iii. a description of all activity the City performed to prevent an SSO from
4 occurring at a location where the City had reason to believe a capacity-
5 related SSO was likely to occur;

6 iv. a description of activities to address locations that do not have sufficient
7 capacity;

8 v. a list of sewer segments improved pursuant to Paragraph 89(b) including
9 the date the capacity was improved, and certification that any improved
10 Sewer Main has sufficient capacity; and

11 vi. the identification of any capacity-related SSOs and the SSO date and
12 location.

13 b. Inspections: a statement that Oakland completed CCTV inspections
14 downstream of each SSO location;

15 c. Acute Defects: a description of the activities to Repair Acute Defects,
16 including:

17 i. the number of Acute Defects found;

18 ii. the number of Acute Defects Repaired; and

19 iii. for Acute Defects that were not Repaired within one Year, provide an
20 explanation why they were not Repaired on time and describe the actions that will be
21 taken and/or the schedules that will be established in order to Repair the Defects as
22 soon as possible;

23 d. Sewer Main Line Cleaning: a description of activities conducted under its
24 sewer cleaning program, including:

25 i. the feet of Sewer Main cleaned once during the Fiscal Year (i.e.,
26 unique feet) and the cumulative unique feet of Sewer Main cleaned
27 since the Effective Date;
28

- 1 ii. the feet of Sewer Main cleaned more than once during the Fiscal Year
2 and the cumulative total feet of Sewer Main cleaned more than once
3 in a Fiscal Year. The length of a segment of Sewer Main in this
4 subparagraph 167(d)(ii) is counted once regardless of the number of
5 times it is cleaned;
- 6 iii. the total feet of Sewer Main cleaned during the reporting Fiscal Year,
7 including repeat cleanings, and the cumulative total feet of Sewer
8 Main cleaned. For this subparagraph, the cumulative total of Sewer
9 Main cleaned shall start at zero on January 1, 2010 and be reset to
10 zero on July 1, 2018. The length of each segment of Sewer Main is
11 multiplied by the number of times it is cleaned;
- 12 iv. By June 30, 2018, a statement that Oakland has cleaned its entire
13 Collection System, once this goal is achieved.
- 14 e. Root Cleaning: a description of the activities conducted under Oakland's root
15 control program, including the feet of Sewer Main treated for root control cumulatively and
16 in each Fiscal Year beginning July 1, 2013;
- 17 f. Hot Spot Cleaning: description of activities conducted under its hot spot
18 program, including feet of Sewer Main in the hot spot cleaning program and the range of
19 cleaning frequencies for Sewer Main in the hot spot cleaning program;
- 20 g. FOG: a description of activities to control FOG in the Collection System; a
21 list of any SSOs that were thought to be associated with FOG or excessive buildup of grease,
22 a list of FOG locations referred to EBMUD for investigation, and any actions that were
23 taken against food service establishments related to inadequate FOG controls;
- 24 h. Pump Stations: a description of pump station renovations and upgrades
25 required by the Pump Station Reliability Plan during the previous Fiscal Year and a
26 description of projects to be completed in the following Fiscal Year.

27 168. Reserved.
28

I. FOR THE STEGE SANITARY DISTRICT ONLY:

169. AMIP Implementation. The District shall summarize implementation of each element of its AMIP not addressed below. The summary shall include any proposed revisions to the AMIP, along with any accompanying changes to its financial plan.

170. I&I Reduction Work. The District shall summarize its Work to reduce I&I in its service area in the reporting Fiscal Year. The summary shall include, but not be limited to, the following:

a. Sewer Main and Maintenance Hole Rehabilitation

i. Rehabilitation: all Sewer Main and Maintenance Hole Repair and Rehabilitation activities completed, including:

- A. the number of feet of Sewer Main Rehabilitated, and the cumulative total feet of Sewer Main Rehabilitated since the Effective Date;
- B. the number of Maintenance Holes Rehabilitated associated with Rehabilitated Sewer Mains and the number of Maintenance Holes Rehabilitated;
- C. the number of abandoned Sewer Laterals found to be connected to the Sewer Main and the number of abandoned Sewer Laterals disconnected from the Sewer Main;
- D. if the District did not achieve its Rehabilitation requirement in Paragraph 107(a), an explanation of why it did not achieve the Rehabilitation requirement and a description of what changes to the Work will be made in order to correct the deficiency and achieve the Rehabilitation requirement in subsequent Fiscal Years;
- E. the Rehabilitation budget and dollars spent on Sewer Main Rehabilitation;

1 F. the Collection System Rehabilitation projects targeted to be
2 completed in the next Fiscal Year; and

3 G. an explanation of any revisions that were made to the Capital
4 Improvement Plan or the financial plan associated with future
5 Repair and Rehabilitation projects, including what revisions, if
6 any, that were made based on information from the EBMUD
7 RTSP.

8 ii. Inspections: inspection and condition assessment activities completed,
9 including:

- 10 A. the rate of Sewer Main inspection and condition assessment;
11 B. the total feet of Sewer Main inspected with completed condition
12 assessment and the cumulative total feet of Sewer Main inspected
13 with completed condition assessment since the Effective Date;
14 C. if the District conducts inspection of Sewer Mains using a method
15 other than CCTV, the District shall identify the method, explain
16 how that method is as equally effective as CCTV and identify the
17 total feet of Sewer Main that was inspected using that method;
18 D. the number of Maintenance Holes associated with Sewer Mains
19 that were inspected and the number of Maintenance Holes
20 inspected;
21 E. if the District did not achieve its inspection and condition
22 assessment requirement in Paragraph 107(b), an explanation of
23 why it did not achieve the inspection and condition assessment
24 requirement and a description of what changes to the Work will
25 be made in order to correct the deficiency and achieve the
26 inspection and condition assessment requirement in subsequent
27 Fiscal Years; and
28

F. the Collection System inspection and condition assessment Work to be completed in the next Fiscal Year.

iii. Regional Standards: a description of the activities to develop – and, beginning in 2017, the extent of compliance with – Regional Standards.

b. Sewer Lateral Inspection and Repair or Rehabilitation

i. Sewer Laterals: a description of activities and materials to notify property owners of defective Sewer Laterals, including:

A. the number of Sewer Laterals identified as defective outside of the triggering actions to test Sewer Laterals pursuant to the Amended Regional Ordinance;

B. the number of property owners notified that their Sewer Laterals are defective;

C. a copy of a representative notice that was sent to property owners notifying them that their Sewer Lateral is defective;

D. a description and the number of any administrative, civil or criminal enforcement actions taken against property owners for defective Sewer Laterals;

E. the number of District-owned and Non-Defendant Permitting Agency-owned Sewer Laterals, the number of District-owned and Non-Defendant Permitting Agency-owned Sewer Laterals inspected and Repaired or Rehabilitated and the cumulative number of District-owned and Non-Defendant Permitting Agency-owned Sewer Laterals inspected and Repaired or Rehabilitated from the Effective Date;

F. the address and name of the owner of any property owned by a Public Entity, or the State or federal government, that has an identified defective Sewer Lateral, including a description of the

1 defect; and

2 G. a summary of the District's assistance to EBMUD in the
3 development of a Sewer Lateral education and outreach program.

4 c. Inflow and Rapid Infiltration Identification and Elimination:

5 i. a description of the District's cooperation with EBMUD's
6 implementation of the RTSP;

7 ii. Linear High Priority Sources

8 A. a cumulative list of all Linear High Priority Sources, including the
9 date that the District eliminated or plans to eliminate the source,
10 and EBMUD's unique identifier;

11 B. the number of feet of Linear High Priority Sources eliminated in
12 the Fiscal Year, and the cumulative total feet of Linear High
13 Priority Sources eliminated since EPA's approval of the RTSP;

14 C. the number of feet of Linear High Priority Sources that the
15 District counted towards its Sewer Main Rehabilitation
16 requirement in subparagraph 107(a);

17 D. for those Linear High Priority Sources that were not eliminated
18 within twenty-four (24) months, an explanation of why the Linear
19 High Priority Sources were not eliminated and a description of the
20 actions that will be taken in order to eliminate the Linear High
21 Priority Sources.

22 iii. Non-Linear High Priority Sources

23 A. a cumulative list of all Non-Linear High Priority Sources,
24 including the date that the District eliminated or plans to eliminate
25 the source, and EBMUD's unique identifier;

26 B. the number of Non-Linear High Priority Sources eliminated in the
27 Fiscal Year, and the cumulative number of Non-Linear High
28

1 Priority Sources eliminated since EPA's approval of the RTSP;
 2 C. for those Non-Linear High Priority Sources that were not
 3 eliminated within twenty-four (24) months, an explanation of why
 4 the Non-Linear High Priority Sources were not eliminated and a
 5 description of the actions that will be taken in order to eliminate
 6 the Non-Linear High Priority Sources.

7 iv. For sources of Inflow and Rapid Infiltration in the Collection System that
 8 are not identified as High Priority, the date that the District
 9 incorporated each source into its Capital Improvement Plan, and
 10 EBMUD's unique identifier;

11 v. Sources of Inflow and Rapid Infiltration not in the Collection System
 12 A. a cumulative list of all Private High Priority Sources, including
 13 the date that the District notified or plans to notify each owner of a
 14 source,
 15 B. the date of any administrative, civil, or criminal enforcement
 16 actions initiated by District to eliminate the source, the status of
 17 the enforcement actions to eliminate the source, and EBMUD's
 18 unique identifier;
 19 C. for all other sources of Inflow and Rapid Infiltration (including
 20 illicit connections) not in the Collection System and not owned by
 21 the District, the date that the District notified each owner of the
 22 source, the date of any administrative enforcement actions
 23 initiated by the District, the status of the administrative
 24 enforcement to eliminate the source, and EBMUD's unique
 25 identifier.

26 171. SSO Reduction Work. The District shall summarize its Work to reduce SSOs in its
 27 service area, describe the success of the Work at preventing blockages and SSOs, and
 28

1 describe any changes to be made to further reduce blockages and SSOs. The summary shall
2 include, but not be limited to, the following:

3 a. Capacity Assurance: a description of activities performed in order to monitor
4 the locations in Paragraph 113 during rain events, including:

5 i. the highest water level in relation to the Maintenance Hole that was
6 observed in the reporting Fiscal Year;

7 ii. identify if there was an SSO or the water level reaches within one (1)
8 foot of the Maintenance Holes rim and whether the event(s) occurred during a rain
9 event that was greater than the December 5, 1952 Storm;

10 iii. a description of all activity the District performed to prevent an SSO
11 from occurring at a location that the District had reason to believe an SSO was likely
12 to occur;

13 iv. a list of sewer segments improved pursuant to Paragraph 113,
14 including the date the capacity was improved, and certification that any improved
15 Sewer Main has sufficient capacity; and

16 v. the identification of any capacity-related SSOs and the SSO date and
17 location.

18 b. Inspections: a certification that the District completed CCTV inspections
19 downstream of each SSO location under Paragraph 114;

20 c. Acute Defects: a description of the activities to Repair Acute Defects under
21 Paragraph 115, including:

22 i. the number of Acute Defects found;

23 ii. the number of Acute Defects Repaired; and

24 iii. for Acute Defects that were not Repaired within twelve (12) months,
25 provide an explanation why they were not Repaired on time and describe the actions
26 that will be taken and/or the schedules that will be established in order to Repair the
27 Defects as soon as possible;
28

d. Sewer Main Cleaning: a description of activities conducted under its sewer cleaning program pursuant to Paragraph 116, including the feet of Sewer Main cleaned and percent of feet of Sewer Main in the District's Collection System cleaned that are: (i) less than eighteen (18) inches in diameter and (ii) eighteen inches or greater in diameter as part of the routine and hot spot cleaning programs, reporting both unique footage and total footage (i.e., including repeat cleanings);

e. Root Cleaning: a description of the activities conducted under its root control program pursuant to Paragraph 117, including the feet of Sewer Main treated for root control (i.e., unique feet) reported as an annual total feet and the cumulative total of feet treated for root control since the Effective Date;

f. Hot Spot Cleaning: description of activities conducted under its hot spot program pursuant to Paragraph 118, including feet of Sewer Mains in the hot spot cleaning program, the range of cleaning frequencies for pipe in the hot spot cleaning program, feet of hot spot pipe cleaned once or more during the reporting Fiscal Year (i.e., unique feet), the total feet of hot spot cleaning during the reporting Fiscal Year, including repeat cleanings;

g. FOG: a description of activities to control FOG in the Collection System pursuant to Paragraph 119 and a list of any SSOs that were thought to be associated with FOG or excessive buildup of grease and that were investigated; and any actions that were taken against food service establishments related to inadequate FOG controls;

h. SSO Prevention and Outreach: a report on the measures it has taken pursuant to Paragraph 120.

J. MISCELLANEOUS

172. If the Annual Report documents that any of the obligations subject to stipulated penalties may not have been complied with, and a Defendant takes the position that potentially applicable stipulated penalties should not be assessed, that Defendant may include in the Annual Report an explanation as to why Plaintiffs should forego collecting such penalties; provided, however, that not including such information does not prejudice the Defendant

1 from providing such or additional information to Plaintiffs or the Court in the “Dispute
2 Resolution” Section of this Consent Decree.

3 173. Each Annual Report shall be signed by an official of the Defendant submitting it and
4 shall include the following certification:

5 “I certify under penalty of law that this document and its attachments were prepared either
6 by me personally or under my direction or supervision in a manner designed to ensure that
7 qualified and knowledgeable personnel properly gathered and presented the information
8 contained therein. I further certify, based on my personal knowledge or on my inquiry of
9 those individuals immediately responsible for obtaining the information, that to the best of
10 my knowledge and belief the information is true, accurate and complete. I am aware that
11 there are significant penalties for submitting false information, including the possibility of
12 fines and imprisonment for knowing and willful submission of a materially false statement.”

13 174. The reporting requirements of this Consent Decree do not relieve any Defendant of any
14 reporting obligations required by the CWA or the California Water Code, or their
15 implementing regulations, or by any other federal, State, or local law, regulation, permit, or
16 other requirement.

17 175. The Defendants may prepare a single consolidated Annual Report (provided it complies
18 with the foregoing requirements) or may prepare separate or smaller group reports, as they
19 may choose. To the extent separate Annual Reports are prepared in a given Fiscal Year,
20 they shall follow similar formats for ease of comparison.

21 176. Once Defendants have been performing the Work under the Consent Decree for a period
22 of ten (10) Calendar Years or more from the Effective Date, one or more Defendants may
23 submit a written request to Plaintiffs for authorization to prepare future biennial reports
24 satisfying the requirements of this Section. EPA may, after consultation with the Regional
25 Water Board, grant or refuse such a request in its sole discretion, which shall not be subject
26 to Dispute Resolution. EPA shall confirm its decision in writing, and shall serve its decision
27 on all Parties. If, at any time after EPA grants such a request, EPA deems it necessary to
28

1 receive reports annually, EPA shall notify Defendants in writing, and Defendants shall
 2 thereafter submit reports on an annual basis. Actions taken by EPA pursuant to this
 3 Paragraph shall not be considered modifications and shall not be subject to the requirements
 4 of Section XXIX (Modifications).

5 **XIX. REVIEW AND APPROVAL OF DELIVERABLES**

6 177. A Defendant shall submit any plan, report, or other item that it is required to submit for
 7 approval pursuant to this Consent Decree to Plaintiffs. EPA may, after consultation with the
 8 Regional Water Board (a) approve the Deliverable, in whole or in part, (b) approve the
 9 Deliverable upon specified conditions, (c) disapprove the Deliverable, in whole or in part,
 10 providing comments identifying deficiencies and directing the Defendant to modify the
 11 Deliverable, in whole or in part; or (d) any combination of the above. EPA shall use its best
 12 efforts to timely respond to any Deliverable as provided for by this Paragraph. Consistent
 13 with the requirements of Section XXVI (Notices), when a Defendant submits a Deliverable
 14 to EPA for review and approval, the Defendant shall concurrently provide the Intervenor
 15 with a copy of the Deliverable. Intervenor shall have no more than 30 Days from receipt of
 16 any Deliverable to provide comments on the Deliverable to EPA and the Regional Water
 17 Board. If Intervenor provide timely comments on a Deliverable, EPA will consult with
 18 Intervenor before making a decision as to whether and/or how to approve the Deliverable.
 19 If Intervenor do not intend to comment on a Deliverable, they will provide notice to EPA
 20 and the Regional Water Board as soon as practicable after receipt of the Deliverable.

21 178. Within 45 Days of receiving EPA's written comments, unless a longer period of time is
 22 agreed to by EPA in writing, the Defendant shall either: (a) alter the submission consistent
 23 with EPA's written comments and provide the submission to EPA for approval, or (b)
 24 submit the matter for dispute resolution under Section XXII of this Decree. Upon receipt of
 25 EPA's final approval of the submission, or upon completion of the submission pursuant to
 26 dispute resolution, the Defendant shall implement the approved submission.

27 179. If a Deliverable is approved pursuant to this Section, the Defendant shall take all actions
 28

required by the Deliverable, in accordance with the schedules and requirements of the Deliverable as approved. If the Deliverable is conditionally approved or approved only in part, the Defendant shall, upon written direction of EPA, take all actions required by the approved Deliverable that EPA determines are technically severable from any disapproved portions, subject to the Defendant's right to dispute only the specified conditions or the disapproved portions, under Section XXII (Dispute Resolution).

180. If the Deliverable is disapproved in whole or in part pursuant to this Section, the Defendant shall, within 60 Days or such other time as the Plaintiffs and that Defendant agree to in writing, correct all deficiencies and resubmit the Deliverable, or disapproved portion thereof, for approval in accordance with the preceding Paragraphs. Alternatively, the Defendant may invoke the Dispute Resolution Section of this Decree.

181. If a resubmitted Deliverable, or portion thereof, is disapproved in whole or in part, EPA may again require the Defendant to correct any deficiencies in accordance with the preceding Paragraphs, subject to the Defendant's right to invoke Dispute Resolution.

XX. STIPULATED PENALTIES

A. DEFENDANTS SHALL BE LIABLE FOR STIPULATED PENALTIES TO PLAINTIFFS FOR THE FOLLOWING VIOLATIONS OF THIS CONSENT DECREE AS SPECIFIED BELOW:

182. Failure to Commission Urban Runoff Diversion Project. For each Day EBMUD fails to commission the Urban Runoff Diversion Project as set forth in Section XVII or Appendix C, stipulated penalties may be assessed against EBMUD as follows:

<u>Period of Noncompliance</u>	<u>Penalty Per Violation</u>
More than 30 Days	\$1000 per Day

183. Failure to Operate the Urban Runoff Diversion Project in Accordance with Approved Plan. If EBMUD fails to operate the Project in accordance with the approved plan, and in accordance with the terms of this Consent Decree as described in Section XVII and Appendix C, daily stipulated penalties may be assessed against EBMUD as follows:

<u>Period of Noncompliance</u>	<u>Penalty Per Violation Per Day</u>
--------------------------------	--------------------------------------

15 - 30 Days	\$1,500
--------------	---------

More than 30 Days	\$2,500
-------------------	---------

184. WWF Discharges That Occur After a Compliance Deadline Specified in Paragraph 16 of Section VI (Work - General).

a. In the event that a WWF experiences a discharge and the Output Ratio calculated in accordance with Section XVI(B) (WWF Output Tests) is greater than 0%, stipulated penalties may be assessed against EBMUD and each Satellite discharging to that WWF as follows:

Fiscal Year after compliance deadline	Stipulated Penalty per Defendant per Fiscal Year in which one or more such WWF Discharges occur from one or more WWFs
1 st Fiscal Year in which any such discharge occurs from that WWF	\$30,000
2 nd Fiscal Year in which any such discharge occurs from that WWF	\$50,000
3 rd Fiscal Year in which any such discharge occurs from that WWF	\$70,000
4 th and later Fiscal Years in which any such discharge occurs from that WWF	\$150,000

b. EBMUD shall notify Plaintiffs with a copy to Defendants and Intervenors of a WWF Discharge occurring after a compliance deadline specified in Paragraph 16 within ninety (90) Days of its occurrence (“the 90-Day Notice”). The 90-Day Notice shall include the information required by Paragraph 134.5. Any Defendant may, within 60 Days after submission of the 90-Day Notice, submit to Plaintiffs an explanation of why the Defendant should not be held responsible for the WWF Discharge in question. Thereafter, EPA shall determine, after consultation with the Regional Water Board, whether a stipulated penalty shall be assessed against any Defendant(s) for the discharge(s) in question.

185. Late Payment of a Civil Penalty. If a Defendant fails to pay the civil penalty required to be paid under Section V of this Decree (Civil Penalties) when due, stipulated penalties of \$500 per Day may be assessed against that Defendant for each Day that the payment is late.

186. SSOs Reaching Waters. For each SSO that reaches waters of the United States, a

stipulated penalty may be assessed as follows, with “gallons” referring to the total size of the overflow, spill or release:

Penalty Per SSO for SSOs totaling:		
Less than 1,000 gallons	1,000 to 9,999 gallons	10,000 gallons or more
\$200	\$1,000	\$25,000

a. A Defendant shall not be liable for stipulated penalties under this Paragraph if that Defendant demonstrates that the SSO was caused by an Act of God, vandalism, or a contractor not working directly or indirectly for the Defendant, and the Defendant demonstrates that it has used all reasonable measures to prevent such SSO.

b. At their discretion, Plaintiffs may reduce or not assess a stipulated penalty under this Paragraph for any particular SSO. In exercising their discretion of whether to reduce or not assess a stipulated penalty for an SSO, Plaintiffs may consider evidence submitted by any Defendant explaining why the Defendant should not be subject to a stipulated penalty for that SSO, including, but not limited to, any actions taken to prevent that SSO including performance of SSO Work; any actions taken to recover the sewage from that SSO; and any administrative or civil penalty that has been paid for that SSO.

187. Failure to Meet Effluent Limitation or Monitoring Requirements. For each violation of the effluent limitations set forth in Section VII (EBMUD Work) for the WWFs, a stipulated penalty may be assessed against EBMUD as follows:

Effluent Limitation	Penalty Per Violation Per Day
pH	\$3,000
Coliform	\$3,000
Chlorine	\$3,000, except that if the total volume discharged is greater than 50,000 gallons, the penalty is \$10,000

188. In addition, a stipulated penalty of \$3,000 per missed effluent monitoring, per pollutant, may be assessed against EBMUD, unless the Regional Water Board determines after consultation with the EPA that sampling as described in the Self-Monitoring Program, attached as Appendix D was infeasible.

189. Failure to Timely Submit Deliverables.

a. For each Day a Defendant fails to timely submit any Deliverable listed in this

Paragraph, a stipulated penalty for each such Deliverable may be assessed to that Defendant as follows:

Period of Noncompliance	Penalty Per Deliverable Per Day
1-15 Days	\$100
16-30 Days	\$300
31-60 Days	\$500
More than 60 Days	\$2,000

b. For purposes of this Paragraph, a Deliverable shall mean:

<u>Deliverable</u>	<u>Reference Sections</u>
Annual Reports, including the portions of EBMUD's report submitted pursuant to Paragraphs 149 and 150	Section XVIII
PEP	Section XV.A
RWPs, if required	Section XV.C
Pump Station Q Force Main Project Plan	Section VII.D (¶ 34)
Flow Model Calibration Plan	Section VII.F
Public Outreach and Sewer Lateral Education Program	Section VII.C
Berkeley Sewer Lateral Compliance Certificate Report	Section X (¶ 66(a))
Alameda Sewer Lateral Compliance Certificate Report	Section VIII (¶44(c)(iii))
Oakland Non-Linear High Priority Source plan	Section XII (¶87(c))
Oakland Root Control Evaluation Report	Section XII (¶ 92(e))
RTSP Plan	Section VII.B
Urban Runoff Diversion Project Plan	Section XVII (¶ 135)
Regional Standards Reports	Paragraphs 33, 43(c), 54(c), 64(c), 73(c), 83(d), 96(c), and 107(c)

190. Failure to Complete Specified Work.

a. Failure to Amend Regional Ordinance. EBMUD shall be subject to the following stipulated penalties for failure to timely amend its Regional Ordinance consistent

with the minimum requirements of Paragraphs 18-20:

Period of Noncompliance	Penalty Per Day
Days 1-30	\$1,000
Days 31-60	\$1,500
Days over 61	\$2,000

b. Failure to Meet Required Spend Amount. If EBMUD's Annual Report indicates that EBMUD did not comply with the Required Spend requirement pursuant to Paragraph 29, the amount that EBMUD failed to spend shall be subject to forfeiture as a stipulated penalty.

c. Failure to Timely Amend Local Ordinances. Each Regional Sewer lateral Program Non-Participant shall be subject to the following stipulated penalties for failure to timely amend its Local Ordinance, consistent with the minimum requirements of Paragraphs 44(c) and 65:

Period of Noncompliance	Penalty Per Day for Failure to Timely Amend
Days 1-30	\$1,000
Days 31-60	\$1,500
Days over 61	\$2,000

d. Failure to Take Action to Require Owners to Obtain Compliance Certificate. Each Regional Sewer Lateral Program Non-Participant shall be subject to the following stipulated penalties for failing to take action to require property owners to obtain a Compliance Certificate upon transfer of title of the structure, or prior to construction or significant modification of such structure, as required by its approved Ordinance:

Certificates Not Obtained and No Compliance Action	Penalty Per Certificate Each Year
25 – 50 Certificates	\$100 per notice over 24
Over 50 Certificates	\$200 per notice over 50

Penalties may only be assessed once per property per building permit.

e. Each Satellite Defendant (other than Stege Sanitary District) that participates in the Regional Sewer Lateral Program shall be subject to the following stipulated penalties for failing to provide notice to EBMUD of property owners required to obtain a Compliance

1 Certificate prior to construction or significant modification of such structure, unless the
 2 Defendant has in place a city building permitting process that requires a Compliance
 3 Certificate prior to receiving a final permit, and has provided EPA with a description of such
 4 process:

Notices Not Provided	Penalty Per Notice Each Year
25 – 50 Notices	\$100 per notice over 24
Over 50 Notices	\$200 per notice over 50

7 f. Signing Off On Final Inspection Without Requiring Compliance Certificate.

8 If a Satellite that participates in the Regional Sewer Lateral Program under the EBMUD
 9 Amended Regional Ordinance has in place a city building permitting process that requires a
 10 Compliance Certificate prior to or concurrently with receiving a sign-off on a final
 11 inspection or certificate of occupancy and has provided EPA with a description of such
 12 process, such a Satellite shall be subject to the following stipulated penalties for signing off
 13 on final inspections or providing certificates of occupancy without first requiring a
 14 Compliance Certificate:

Final Inspection Sign-Offs Without First Requiring Compliance Certificate	Penalty Per Inspection Each Year
25 – 50 inspections	\$100 per inspection over 24
Over 50 inspections	\$200 per inspection over 50

18 Penalties may only be assessed once per property per building permit.

19 g. Failure to Renovate Pump Stations. The Cities of Alameda and Oakland
 20 shall be subject to the following stipulated penalties for failing to complete Rehabilitation of
 21 each pump station as required by Alameda's approved Pump Station Renovation Plan, or
 22 Oakland's approved Pump Station Reliability Plan:

Period of Noncompliance	Penalty Per Day Per Pump Station
Days 1-15	\$0
Days 16-90	\$500
Days over 90	\$1,500

25 h. Failure to Rehabilitate Sewer Mains, Manholes and Lower Laterals.

26 Beginning July 1, 2016, for failing in any Fiscal Year to timely Rehabilitate the number of
 27 feet of Sewer Mains, and associated Manholes and (for Satellites other than the Stege
 28

Sanitary District) Lower Laterals, specified in Appendix E to this Decree (as that Appendix may be modified by an approved RWP, or pursuant to the Modification provisions of Section XXIX (Modification)), calculated using a three-year rolling average or cumulative total of Work, whichever is used by the Satellite, a Satellite shall be subject to a stipulated penalty equal to \$6.00 per foot for the first 5000 feet, and \$12.00 per foot for every foot over 5000 feet, by which the Satellite falls short of the Work requirement.

i. Failure to Update Capital Improvement Plan. A Satellite shall be subject to the following stipulated penalties for failing to update its Capital Improvement Plan within twenty-four (24) months as set forth in Paragraphs 47(a)(v), 58(a)(v), 68(a)(v), 76(a)(iii), 100(a)(v), and 111(a)(v), to include projects to eliminate the sources of Inflow and Rapid Infiltration identified by EBMUD pursuant to the RTSP.

Period of Noncompliance	Penalty Per Day
1-15 Days	\$100
16-30 Days	\$300
31-60 Days	\$500
More than 60 Days	\$2000

The first Day of noncompliance shall be considered the first Day of the twenty-fifth month after EBMUD provides notification to the Satellite.

j. Failure to Eliminate Linear or Non-Linear High Priority Sources of Inflow or Rapid Infiltration.

A Satellite shall be subject to the following stipulated penalties for failing to eliminate Linear or Non-Linear High Priority Sources of Inflow or Rapid Infiltration pursuant to the RTSP within twenty-four (24) months as set forth in Paragraphs 47, 58, 68, 76, 87, 100, and 111:

Number of Months Past the Deadline to Eliminate the Linear or Non-Linear High Priority Source of Inflow or Rapid Infiltration	Penalty Per Month Per Source for Failure to Eliminate Linear or Non-Linear High Priority Source of Inflow or Rapid Infiltration
1 month	\$3,000
2 or more months	\$7,000

The first month of noncompliance shall be considered the first Day of the twenty-sixth month after EBMUD or Oakland provides formal notification pursuant to Paragraphs 28(a)

1 or 87(a) on December 31st of each year; unless additional time is permitted pursuant to an
 2 applicable time extension provision in a Satellite's Work Section.

3 k. Failure to Provide Notification and Initiate Enforcement Action for Private
 4 High Priority Source.

5 A Satellite shall be subject to a stipulated penalty of \$500 per month for failing to notify an
 6 owner and failing to initiate all necessary administrative, civil, or criminal enforcement
 7 action(s) to eliminate a Private High Priority Source within twenty-four (24) months as set
 8 forth in Paragraphs 47, 58, 68, 76, 87, 100, and 111. The first month of noncompliance shall
 9 be considered the first Day of the twenty-fifth month after EBMUD or Oakland provide
 10 formal notification pursuant to Paragraphs 28(a) or 87(a) on December 31st of each Year.

11 l. Failure to Clean Sewer Mains.

12 A Defendant shall be subject to a stipulated penalty of \$0.20 per foot for the first 10,000 feet
 13 not cleaned, and \$0.40 per foot for additional required footage not cleaned, based on a three-
 14 year rolling average or cumulative miles, whichever is used by the Satellite, for failing in
 15 any Fiscal Year to clean the Sewer Main mileage required by Paragraphs 50, 61, 71, 79, 92,
 16 103, and 116 above.

17 m. Failure to Inspect and Assess Sewer Mains.

18 A Defendant shall be subject to a stipulated penalty of \$0.20 per foot for the first 10,000 feet
 19 not inspected and assessed; \$0.40 per foot for additional required footage not inspected and
 20 assessed, based on a three-year rolling average or cumulative miles, whichever is used by
 21 the Satellite, for failing in any Fiscal Year to inspect and document condition assessment,
 22 using CCTV or other equally effective method, its Collection System by the Sewer Main
 23 Linear Feet required by Paragraphs 43(b), 54(b), 64(b), 73(b), 83(c), 96(b), and 107(b)
 24 above.

25 n. Failure to Timely Implement All Other Work. For each Day a Defendant fails
 26 to timely implement any Work, including Work implemented under a Revised Work Plan,
 27 other than Work specifically identified in Paragraphs 182-190(m) above, daily stipulated
 28

penalties may be assessed for each such item of Work as follows:

Period of Noncompliance	Penalty Per Violation Per Day
1 - 180 Days	\$100
More than 180 Days	\$200

No penalty shall be assessed under this subparagraph (n) for a failure to timely implement Work set forth in a Revised Work Plan approved by EPA pursuant to Section XV (Periodic Performance Evaluation and Work Plan Revision Process), to the extent that the Revised Work Plan contains an applicable stipulated penalty.

B. MISCELLANEOUS

191. Unless otherwise specified, stipulated penalties assessed under this Section shall begin to accrue on the Day after performance is due or on the Day a violation subject to stipulated penalties occurs, whichever is applicable, and shall continue to accrue until performance is satisfactorily completed or until the violation ceases. Either Plaintiff may, in the unreviewable exercise of its discretion, reduce or waive stipulated penalties otherwise due to it under this Consent Decree. In the use of Plaintiffs' discretion, either may take into consideration issues such as delays in discovery of Defendant's failure, response of Defendant upon discovery, delays in assessment of penalty, and magnitude of effect on compliance dates. Any Defendant may provide information for consideration as to whether a violation resulted from events outside the control of the Defendant on whom the penalty may be imposed, and the effect of the amount of the penalty on that Defendant's ability to comply with the requirements of this Consent Decree.

192. A Defendant shall pay stipulated penalties to the United States and the Regional Water Board within 120 Days of receiving a written demand from either Plaintiff, or both jointly; only one demand shall be made. The Defendant shall pay fifty percent (50%) of the total stipulated penalty amount due to the United States, and fifty percent (50%) to the Regional Water Board, using the penalty payment procedures set forth in the following Paragraph. Plaintiffs may modify these payment procedures through written notice to Defendants. Any demand for payment of a stipulated penalty shall be simultaneously sent to all other Parties.

193. Defendants shall pay stipulated penalties owing to the United States by FedWire Electronic Funds Transfer (“EFT”) to the U.S. Department of Justice, in accordance with written instructions to be provided to Defendants by the Financial Litigation Unit of the U.S. Attorney’s Office for the Northern District of California, 450 Golden Gate Avenue, 11th Floor, San Francisco, CA 94102. At the time of payment, Defendants shall send a copy of the EFT authorization form and the EFT transaction record, together with a transmittal letter, which shall state that the payment is for stipulated penalties owed pursuant to the Consent Decree in *United States et al. v. EBMUD et al.*, and shall reference the civil action numbers C 09-00186-RS and C 09-05684-RS and DOJ Case No. 90-5-1-1-09361/1, to the United States in accordance with Section XXI of this Consent Decree (Notices); by email to acctsreceivable.CINWD@epa.gov; and by mail to:

EPA Cincinnati Finance Office
26 Martin Luther King Drive
Cincinnati, OH 45268

194. Defendants shall pay stipulated penalties owing to the Regional Water Board by sending a certified check or warrant payable to “California Regional Water Quality Control Board, San Francisco Bay Region.” At the time of payment, a Defendant shall state in its transmittal letter that the payment is for stipulated penalties owed pursuant to the Consent Decree in *United States et al. v. EBMUD et al.*, and shall address it to:

Executive Officer
California Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay Street, Suite 1400
Oakland, CA 94612

195. If any Defendant fails to pay stipulated penalties according to the terms of this Consent Decree, that Defendant shall be liable for interest on such penalties, as provided for in 28 U.S.C. § 1961, accruing as of the date payment became due, subject to Paragraph 196 below. Nothing in this Paragraph shall be construed to limit the United States or the Regional Water Board from seeking any remedy otherwise provided by law for a Defendant’s failure to pay any stipulated penalties.

196. Upon receipt of a written demand for payment of a stipulated penalty, a Defendant may dispute its liability for such stipulated penalty pursuant to the Dispute Resolution Section of this Consent Decree. Pending resolution of any such dispute, stipulated penalties continue to accrue if the obligation at issue has not been met and interest on any unpaid penalties accrues pursuant to the terms of the preceding Paragraph; provided that Defendants may argue to the Court that stipulated penalties shall not run after the matter has been fully briefed. Upon the completion of dispute resolution, any stipulated penalties that are ultimately determined to be due, plus interest as applicable, shall be paid within 120 Days of (1) the date a motion must be filed under Paragraph 207 if the Defendant does not initiate Judicial Dispute Resolution pursuant to Paragraph 207, or (2) any Court order directing payment.

197. The payment of stipulated penalties shall not alter in any way a Defendant's obligation to complete the performance of all activities required under this Consent Decree. Payment of stipulated penalties pursuant to this Section shall be in addition to any other rights or remedies that shall be available to Plaintiffs by reason of a Defendant's failure to comply with the requirements of this Consent Decree, or any other applicable federal, State or local laws, regulations, NPDES permits, and all other applicable permits. Where a violation of this Order is also a violation of the Clean Water Act, or comparable State law, the Defendant shall be allowed a credit for any stipulated penalties paid against any statutory penalties imposed for such violation. The payment of stipulated penalties under this Consent Decree shall not be deemed an admission of a violation of any law, regulation, or any Defendant's NPDES permit.

XXI. FORCE MAJEURE

198. A "force majeure event" is any event beyond the control of a Defendant, its agents and contractors, or any entity controlled by a Defendant that delays the performance of any Work under this Consent Decree despite the Defendant's best efforts to fulfill the obligation to do that Work. "Best efforts" includes anticipating reasonably foreseeable force majeure

1 events and taking appropriate preventive actions, if they exist, before a force majeure event
2 occurs. "Best efforts" also includes addressing the effects of any force majeure event (a) as
3 it is occurring and (b) after it has occurred, to prevent or minimize any resulting delay to the
4 extent reasonably practicable. "Force Majeure" does not include a Defendant's financial
5 inability to perform any obligation under this Consent Decree.

6 199. A Defendant shall provide notice to the Chief of EPA Region 9, Water Section,
7 Enforcement Division, within 15 Days and written notice, as provided in Section XXVI of
8 this Consent Decree (Notices), within 60 Days of the time a Defendant first knew of, or by
9 the exercise of due diligence, should have known of, a claimed force majeure event. The
10 written notice shall state the anticipated duration of any delay, its cause(s), the Defendant's
11 past and proposed actions to prevent or minimize any delay, a schedule for carrying out
12 those actions, and the Defendant's rationale for attributing any delay to a force majeure
13 event. Failure to provide written notice as required by this Paragraph shall preclude the
14 Defendant from asserting any claim of force majeure.

15 200. If EPA, following consultation with the Regional Water Board, agrees that a force
16 majeure event has occurred, it may agree to extend the time for a Defendant to perform the
17 affected requirements for the time necessary to complete those obligations. An extension of
18 time to perform the obligations affected by a force majeure event shall not, by itself, extend
19 the time to perform any other obligation. Where EPA, following consultation with the
20 Regional Water Board, agrees to an extension of time, the appropriate modification shall be
21 made pursuant to Section XXIX of this Consent Decree (Modification).

22 201. If EPA, following consultation with the Regional Water Board, does not agree that a
23 force majeure event has occurred, or does not agree to the extension of time sought by a
24 Defendant, EPA's position shall be binding, unless the Defendant invokes Dispute
25 Resolution under Section XXII of this Consent Decree. In any such dispute, the Defendant
26 bears the burden of proving, by a preponderance of the evidence, that each claimed force
27 majeure event is a force majeure event, that the Defendant gave the notice required
28

hereunder, that the force majeure event caused any delay the Defendant claims was attributable to that event, and that the Defendant exercised best efforts to prevent or minimize any delay caused by the event.

XXII. DISPUTE RESOLUTION

202. Unless otherwise expressly provided for in this Consent Decree, all disputes under this Consent Decree are subject to dispute resolution, and the dispute resolution procedures of this Section shall be the exclusive mechanism to resolve disputes arising under or with respect to this Consent Decree. A Defendant's failure to seek resolution of a dispute under this Section shall preclude that Defendant from raising any such issue as a defense to an action by the United States or the Water Boards to enforce any obligation of that Defendant under this Decree.

203. Informal Dispute Resolution. Any dispute subject to dispute resolution under this Consent Decree shall first be the subject of informal negotiations. The dispute shall be considered to have arisen when a Defendant or Intervenor sends Plaintiffs a written notice of dispute ("Notice of Dispute"). Such Notice of Dispute shall state clearly the matter in dispute. The period of informal negotiations shall not exceed 60 Days from the date the Notice of Dispute was sent, unless that period is modified by written agreement. If the Parties cannot resolve a dispute by informal negotiations, then the position advanced by the United States; or, in the case of a demand for stipulated penalties made solely by the Regional Water Board, the position advanced by the Regional Water Board, shall be considered binding unless, within 30 Days after the conclusion of the informal negotiation period, the Defendant or Intervenor invokes the dispute resolution procedures as set forth in the following Paragraph.

204. Formal Dispute Resolution. A Defendant or Intervenor shall invoke the dispute resolution procedures of this Paragraph within the time period provided in the preceding Paragraph by serving on Plaintiffs (with a copy to the other Parties) a written statement of position ("Statement of Position") regarding the matter in dispute. The Statement of Position

1 shall include, but may not necessarily be limited to, any factual data, analysis, opinion, or
2 legal analysis supporting the position and any supporting documentation relied upon by the
3 Defendant or Intervenors. The Defendant may argue that no stipulated penalties or interest
4 should be imposed.

5 205. As to all disputes other than disputes concerning a demand for stipulated penalties made
6 solely by the Regional Water Board, the United States, following consultation with the
7 Regional Water Board, shall serve the United States' Statement of Position within 45 Days
8 after service of a Defendant's Statement of Position. Any Defendant may also serve a
9 Statement of Position responsive to an Intervenor or to another Defendant during this period.
10 The United States' Statement of Position shall include, but may not necessarily be limited
11 to, any factual data, analysis, opinion, or legal analysis supporting that position and all
12 supporting documentation relied upon by the United States and the Regional Water Board.
13 The United States' Statement of Position shall be binding unless the Defendant or Intervenor
14 files a motion for judicial review of the dispute in accordance with the following Paragraphs.
15 If the United States does not serve a Statement of Position within the specified time period,
16 the Party invoking dispute resolution may initiate Judicial Dispute Resolution under
17 Paragraph 207 and accrual of interest shall be stayed unless otherwise ordered by the court.

18 206. As to a dispute concerning a demand for stipulated penalties made solely by the
19 Regional Water Board, the Regional Water Board shall serve its Statement of Position
20 within 45 Days after service of a Defendant's Statement of Position. The Regional Water
21 Board's Statement of Position shall include, but may not necessarily be limited to, any
22 factual data, analysis, opinion, or legal analysis supporting that position and all supporting
23 documentation relied upon by the Regional Water Board. The Regional Water Board's
24 Statement of Position shall be binding unless the Defendant files a motion for judicial
25 review of the dispute in accordance with the following Paragraphs. If the Regional Water
26 Board does not serve a Statement of Position within the specified time period, the Party
27 invoking dispute resolution may initiate judicial dispute resolution under Paragraph 207 and
28

1 accrual of interest shall be stayed unless otherwise ordered by the Court.

2 207. Judicial Dispute Resolution. A Defendant or Intervenor may seek judicial review of the
3 dispute against Plaintiffs by filing with the Court and serving on Plaintiffs (with copies to
4 the other Parties in accordance with Section XXVI - Notices), a motion requesting judicial
5 resolution of the dispute. The motion must be filed within 60 Days after service of the
6 Statement of Position by the United States or the Regional Water Board pursuant to
7 Paragraph 205 or 206. The motion shall contain a written statement of the moving
8 Defendant's or Intervenor's position on the matter in dispute, as set forth in its Statement of
9 Position, including any supporting factual data, analysis, opinion, or legal analysis, and any
10 documentation, and shall set forth the relief requested and any schedule within which the
11 dispute must be resolved for orderly implementation of this Consent Decree. When the
12 motion is filed accrual of interest shall be stayed unless otherwise ordered by the Court. The
13 United States, the Water Boards, and any other non-moving party participating in the dispute
14 shall have at least 60 Days in which to respond to Defendant's or Intervenor's motion. The
15 Defendant or Intervenor may file a reply memorandum to the extent permitted by the Local
16 Rules.

17 208. In any dispute in District Court under this Section XXII, the Court shall first rule on the
18 dispute (if any) between the Defendant and the United States (or the Regional Water Board
19 in the case of a dispute under Section XXII). If the Defendant's position prevails over the
20 United States' or the Regional Water Board's position as to any issue, the dispute resolution
21 as to that issue shall end. If the position of the United States or the Regional Water Board
22 prevails over the position of the Defendant, the Court shall then consider any remaining
23 dispute between the United States or the Regional Water Board and an Intervenor.

24 209. Except as otherwise provided in this Consent Decree, in any dispute in District Court
25 under this Section XXII, a Defendant shall bear the burden of demonstrating by a
26 preponderance of the evidence that the Defendant's position on the issues in dispute
27 complies with this Consent Decree and best furthers the Objectives of this Consent Decree.
28

1 In any dispute in District Court under this Section XXII, an Intervenor shall bear the burden
 2 of demonstrating that the United States' or the Regional Water Board's position is arbitrary
 3 and capricious.

4 210. Effect on Consent Decree Obligations. The invocation of dispute resolution procedures
 5 under this Section shall not, by itself, extend, postpone, or affect in any way any obligation
 6 of a Defendant under this Consent Decree, unless and until the final resolution of the dispute
 7 so provides. Stipulated penalties with respect to the disputed matter shall continue to accrue
 8 from the first Day of noncompliance, but payment shall be stayed pending resolution of the
 9 dispute as provided in Section XXII. In addition, interest shall not accrue during the period
 10 Judicial Dispute Resolution is noticed, heard, and under submission, unless requested by a
 11 Plaintiff and awarded by the Court for good cause to that Plaintiff. If a Defendant does not
 12 prevail on the disputed issue, stipulated penalties shall be paid, if ordered by the Court, as
 13 provided in Section XX.

14 **XXIII. INFORMATION COLLECTION AND RETENTION**

15 211. Plaintiffs and their representatives, including attorneys, contractors, and consultants,
 16 shall have the right of entry on Defendants' property upon reasonable notice at all
 17 reasonable times, upon presentation of credentials, to:

- 18 a. monitor the progress of activities required under this Consent Decree;
- 19 b. verify any data or information submitted to Plaintiffs in accordance with the
- 20 terms of this Consent Decree;
- 21 c. obtain documentary evidence, including photographs and similar data; and
- 22 d. assess a Defendant's compliance with this Consent Decree.

23 212. Until the termination of this Consent Decree and any subsequent order or decree entered
 24 in this matter, Defendants shall retain all final versions of records and documents (including
 25 records or documents in electronic form) that document a Defendant's performance of its
 26 obligations under this Consent Decree, unless such documents or records have already been
 27 provided to the Plaintiffs as part of a Defendant's Annual Report or other Deliverable
 28

1 required under this Consent Decree. Such records shall include relevant modeling inputs
2 and outputs, flow data, rainfall data, inspection records, cleaning records, construction plans
3 or as-built drawings, specifications, construction contracts, final payments and notices of
4 completion, and all Deliverables, in addition to records or documents specified by Plaintiffs
5 from time to time, that are necessary to evaluate a Defendant's performance of its
6 obligations under this Consent Decree. Other records and documents need not be retained
7 pursuant to this Consent Decree. A Defendant may seek a determination from EPA as to
8 whether any particular document or record must be preserved pursuant to this Paragraph by
9 submitting that document or record to EPA. This record retention requirement shall apply
10 regardless of a Defendant's corporate or institutional document-retention policy to the
11 contrary. At any time during this record-retention period, Plaintiffs may request copies of
12 any documents or records required to be maintained under this Paragraph, unless such
13 documents or records have already been provided to the Plaintiffs as part of a Defendant's
14 Annual Report or other Deliverable required under this Consent Decree.

15 213. This Consent Decree in no way limits or affects any right of entry and inspection, or any
16 right to obtain information, held by Plaintiffs pursuant to applicable federal or State laws,
17 regulations, or permits, nor does it limit or affect any duty or obligation of Defendants to
18 maintain records or information imposed by applicable federal or State laws, regulations, or
19 permits.

20 214. Notwithstanding the foregoing, nothing in Section XXIII shall be construed to require
21 any party to disclose any communication, document, or electronic record that is protected by
22 the attorney-client privilege, the attorney work product doctrine, the common interest
23 doctrine, or any other applicable privilege or protection. All applicable privileges, doctrines,
24 and protections shall remain in effect unless the Court orders that the communication,
25 document, or electronic record must be disclosed. If, during Judicial Dispute Resolution
26 pursuant to Paragraph 207 or judicial enforcement of this Consent Decree, after a request by
27 Plaintiffs to a Defendant for such document, or a request by a Defendant to Plaintiffs for a
28

such a document (including enforcement-related documents), a Party withholds a document based on the assertion of a privilege, doctrine, or protection, that Party shall provide, within 30 Days of such an assertion, a log that identifies, to the extent known: the general nature of the document (without disclosing its contents); the identity and position of its author; the date it was written; the identity and position of all addressees and recipients; the document's present location; and the specific reason(s) it was withheld (which privilege claimed and the basis for such claim).

XXIV. EFFECT OF SETTLEMENT/RESERVATION OF RIGHTS

215. Effect of Settlement

a. This Consent Decree resolves the civil claims of the Plaintiffs and the Intervenor for the violations specifically alleged in the Complaints filed in this action, through the date of lodging. This Consent Decree shall not be construed to prevent or limit the rights of the Plaintiffs or Intervenor to obtain penalties, injunctive relief or other appropriate relief under the CWA or the California Water Code, or under other federal or State laws, regulations, or permit conditions, except as to the claims specifically alleged in the Complaints.

b. Plaintiffs expressly reserve all civil claims with respect to any violation of the Satellites' MS4 Permit. Intervenor agree to resolve only those civil claims pertaining to the violations of the Satellites' MS4 Permit that are specifically alleged in the Satellite Complaint in Intervention regarding discharges of sewage into storm sewers through the date of lodging.

c. In this and any subsequent administrative or judicial proceeding initiated by the United States, the Water Boards and/or Intervenor for injunctive relief, civil penalties, or other appropriate relief relating to Defendants' compliance with the CWA and/or the California Water Code, the Parties shall not assert that another Party's claims or defenses in this or any subsequent administrative or judicial proceeding are barred or waived solely because the Party entered into this Consent Decree and did not raise such claims or defenses

1 in the instant case.

2 d. The Plaintiffs and the Intervenors reserve all legal and equitable remedies
3 available to enforce the provisions of this Consent Decree and Defendants reserve all
4 available defenses.

5 216. a. This Consent Decree resolves the claims of the Water Boards for litigation
6 costs (including attorneys' fees) pursuant to California Code of Civil Procedure section
7 1021.8. Defendants agree to pay to the Water Boards the sum of One Hundred Thousand
8 Dollars (\$100,000) in full satisfaction of all of the Water Boards' litigation costs (including
9 attorneys' fees) incurred up to the Effective Date of this Consent Decree. This payment
10 obligation of Defendants to the Water Boards is joint and several and shall be made within
11 twenty-one (21) Days of the Effective Date of this Consent Decree. The payment shall be
12 made in the form of a check(s) payable to *State Water Resources Control Board – Waste*
13 *Discharge Permit Fund*, addressed to: Jerrel Bolds, Accounting Officer, State Water
14 Resources Control Board, 1001 "I" Street, 18th Floor, Sacramento, California 95814, and
15 sent via overnight delivery. The receipt and negotiation by the Water Boards of full
16 payment shall constitute satisfaction of any and all litigation costs (including attorneys' fees)
17 pursuant to California Code of Civil Procedure section 1021.8 incurred by the Water Boards
18 in this matter that have been or could have been claimed in connection with or arising out of
19 this matter, up to and including the Effective Date of this Consent Decree.

20 b. Within 45 Days after the Effective Date of this Consent Decree, the
21 Defendants shall pay the Intervenors \$180,000 for their attorneys' fees and costs incurred
22 through the Effective Date. Additionally, the Defendants shall pay the Intervenors \$30,000
23 to be used as a Consent Decree compliance monitoring fund. In consideration of payment of
24 this \$30,000, Intervenors shall not seek any additional recovery for any attorneys' fees or
25 costs incurred in monitoring consent decree compliance or in informal Dispute Resolution.
26 Neither this Paragraph nor Paragraph 221 shall be interpreted as barring the Intervenors
27 from seeking recovery of attorney's fees or costs that they would otherwise be entitled to in
28

1 formal Dispute Resolution or other proceedings before the Court concerning this Consent
 2 Decree. Payment of the sums owed to Intervenor referred to in this Paragraph shall be made
 3 by check made payable to "Environmental Advocates Attorney Client Trust Account" sent
 4 via certified mail, return receipt requested to Christopher Sproul, Environmental Advocates,
 5 5135 Anza Street, San Francisco, California 94121.

6 217. This Consent Decree is not a permit, or a modification of any permit, under any federal,
 7 State, or local laws or regulations. Defendants are responsible for achieving and
 8 maintaining compliance with all applicable federal, State, and local laws, regulations, and
 9 permits; and Defendants' compliance with this Consent Decree shall be no defense to any
 10 action commenced pursuant to said laws, regulations, or permits. The Plaintiffs and the
 11 Intervenor do not, by their consent to the entry of this Consent Decree, warrant or represent
 12 in any manner that Defendants' compliance with any aspect of this Consent Decree will
 13 result in compliance with provisions of the CWA or the California Water Code.

14 218. Diligent Prosecution

15 a. The Plaintiffs and Defendants agree that, from the commencement of this
 16 action through the termination of this Consent Decree, Plaintiffs are "diligently prosecuting"
 17 this action as that term is used in CWA § 505(b)(1)(B), 33 U.S.C. §1365(b)(1)(B).

18 b. Intervenor agree that Plaintiffs are "diligently prosecuting" this action
 19 through the lodging of this Consent Decree, but contend that whether Plaintiffs will be
 20 diligently prosecuting this Consent Decree in the future can only be determined in the future.
 21 Until this Consent Decree is terminated by the Court, Intervenor agree to file no action
 22 naming any Defendant as a defendant or respondent regarding (1) any alleged discharge or
 23 release from the Regional Wastewater Collection and Transmission System or the WWFs, or
 24 (2) any alleged violation of a wastewater effluent standard or limitation, or of an order
 25 issued by a State or federal agency with respect to such a standard or limitation, imposed on
 26 the Regional Wastewater Collection and Transmission System or the WWFs.

27 219. Reservation of Rights

1 a. Nothing in this Consent Decree shall constitute an admission of any fact or of
2 any liability or a waiver of any right unless explicitly set forth in this Section or Section I
3 (Jurisdiction and Venue).

4 b. This Consent Decree does not limit or affect the rights of Defendants,
5 Intervenor, or the Plaintiffs against any third parties not party to this Consent Decree, nor
6 does it limit the rights of third parties not party to this Consent Decree against Defendants,
7 except as otherwise provided by law.

8 c. Nothing in this Consent Decree shall limit any Defendant's ability to modify
9 its program for the design, planning, construction, operation, and maintenance of its
10 facilities in any fashion not inconsistent with this Consent Decree.

11 d. This Consent Decree shall not be construed to create rights in, or grant any
12 cause of action to, any third party not party to this Consent Decree.

13 220. Termination of SOs and Dismissal of Petitions

14 a. Upon entry of this Consent Decree, (1) the EBMUD SO and the Satellite SO
15 are terminated, (2) the Regional Water Board staff shall bring orders to rescind Cease and
16 Desist Order No. R2-2009-0005 and Cease and Desist Order Nos. R2-2009-0087 and 93-
17 134 for the Regional Water Board's consideration, as provided in Paragraph 82, above, and
18 (3) the Defendants and the Intervenor shall dismiss without prejudice their petitions
19 pending before the State Water Board regarding NPDES Permit Nos. CA0038440,
20 CA0038474, CA0038471, CA0038466, CA0038792, CA0038512, CA0038504, and
21 CA0038482 and Cease and Cease and Desist Order Nos. R2-2009-0005 and R2-2009-0087.
22 These dismissals without prejudice shall not, in and of themselves, operate as a waiver of
23 any claims, contentions or defenses any Defendant or Intervenor may make in any
24 proceedings other than these consolidated lawsuits, and each Defendant and Intervenor
25 reserves its right to pursue a future administrative and judicial challenge to future NPDES
26 permits but no such challenge shall be a basis for reducing or otherwise modifying a
27 Defendant's obligations under this Consent Decree.
28

b. With respect to the reissuance of an NPDES permit for each Defendant, the Regional Water Board's Executive Officer shall recommend to the Regional Water Board to adopt a permit that is not materially inconsistent with the terms and conditions of this Consent Decree, or which would otherwise prevent each Defendant from satisfying its respective obligations under this Consent Decree. However, nothing herein limits the Regional Water Board's exercise of discretion or authority consistent with applicable law, and the Regional Water Board's decision to adopt NPDES permits that are materially inconsistent with this Consent Decree shall not constitute a breach of this Consent Decree.

XXV. COSTS

221. Except as provided in Paragraph 216 above, the Parties shall bear their own costs of this action, including attorneys' fees, except Plaintiffs shall be entitled to collect the costs (including attorneys' fees) incurred in any action necessary to collect any stipulated penalties due but not paid by a Defendant if Plaintiffs are the prevailing parties in such collection action. For the purposes of this Paragraph, stipulated penalties are not "due" until after the conclusion of dispute resolution proceedings regarding the stipulated penalties pursuant to the Dispute Resolution Section of this Consent Decree.

XXVI. NOTICES

222. A Defendant shall provide the Water Boards, Intervenors and the Chief, Environmental Enforcement Section, U.S. Department of Justice, with a copy of any report, notice, or Deliverable submitted to EPA under this Consent Decree at the time it submits the document to EPA. Unless otherwise specified herein, whenever notifications, submissions, or communications are required by this Consent Decree they shall be made in writing and addressed as follows:

To EPA:

Chief, Clean Water Act, Water Section I, (ENF 3-1)
Enforcement Division
U.S. Environmental Protection Agency, Region 9
75 Hawthorne Street
San Francisco, CA 94105

1 To the Regional Water Board:

2 Executive Officer
3 San Francisco Bay Regional Water Quality Control Board
4 1515 Clay Street, Suite 1400
5 Oakland, CA 94612

6 and

7 Legal Counsel
8 San Francisco Bay Regional Water Quality Control Board
9 1515 Clay Street, Suite 1400
10 Oakland, CA 94612

11 and

12 Daniel S. Harris
13 Deputy Attorney General
14 455 Golden Gate Avenue, Suite 11000
15 San Francisco, CA 94102

16 To the United States:

17 Chief, Clean Water Act, Water Section I, (ENF 3-1)
18 Enforcement Division
19 U.S. Environmental Protection Agency, Region 9
20 75 Hawthorne Street
21 San Francisco, CA 94105

22 and

23 Chief, Environmental Enforcement Section
24 Environment and Natural Resources Division
25 U.S. Department of Justice
26 Box 7611 Ben Franklin Station
27 Washington, D.C. 20044-7611
28 Re: DOJ No. 90-5-1-1-09361/2

To the State Water Board:

Executive Director
State Water Resources Control Board
P.O. Box 100
Sacramento, CA 95812-0100

To Plaintiffs:

To the United States and the Water Boards as indicated above.

To City of Alameda:

12 223. Any Party may, by written notice to the other Parties, change its designated notice
13 recipient(s) or notice address(es) provided above.

14 224. Notices submitted pursuant to this Section shall be deemed submitted upon mailing or
15 emailing, unless otherwise provided in this Consent Decree or by mutual agreement of the
16 Parties in writing.

17 **XXVII. EFFECTIVE DATE**

18 225. The Effective Date of this Consent Decree shall be the date upon which this Consent
19 Decree is entered by the Court or a motion to enter is granted, whichever occurs first, as
20 recorded on the Court's docket. Defendants hereby agree that they shall be bound to
21 perform duties scheduled to occur prior to the Effective Date. In the event that the United
22 States withdraws or withholds consent to this Consent Decree prior to entry, or the Court
23 declines to enter the Consent Decree, then the preceding requirement to perform duties
24 scheduled to occur before the Effective Date shall terminate.

25 **XXVIII. RETENTION OF JURISDICTION**

26 226. The Court shall retain jurisdiction over this case for the purpose of resolving disputes
27 arising under this Consent Decree pursuant to the Dispute Resolution Section of this
28 Consent Decree, hearing motions and entering orders awarding or denying attorney's fees
and costs, entering orders modifying this Consent Decree pursuant to the Modification

1 Section of this Consent Decree, or effectuating or enforcing compliance with the terms of
2 this Consent Decree.

3 **XXIX. MODIFICATION**

4 227. a. Any material modification to this Final Consent Decree must be with the
5 written agreement of the Parties and approval by the Court, except as provided herein.

6 b. Notwithstanding subparagraph (a) above, Plaintiffs and a Defendant, or
7 Plaintiffs and any combination of Defendants, can agree in writing and without Court
8 approval to make non-material modifications to the requirements of this Consent Decree
9 applicable to that Defendant or Defendants. Defendant(s) shall provide Intervenor copies of
10 any such modifications within seven (7) Days of agreeing to such modifications and
11 Intervenor may dispute the materiality of such modifications pursuant to Section XXII
12 (Dispute Resolution). Time extensions for submission of Deliverables and minor
13 modifications to individual Defendant Work sections may be considered non-material
14 modifications to this Consent Decree.

15 c. Notwithstanding subparagraph (a) above, any Party may seek modification of
16 this Consent Decree pursuant to Rule 60(b) of the Federal Rules of Civil Procedure
17 following Dispute Resolution pursuant to Section XXII (Dispute Resolution).

18 **XXX. FINAL COMPLIANCE AND TERMINATION**

19 228. Defendants shall perform the Work set forth in Sections VI-XVIII of this Consent
20 Decree. EPA shall periodically review the performance of each Defendant and shall
21 determine, following consultation with the Regional Water Board, whether the Defendant
22 has satisfactorily complied with and accomplished the Objectives of this Decree.

23 229. Partial Termination of SSO Work Obligations. After consultation with the Regional
24 Water Board and upon notice to Intervenor, the United States may move the Court to
25 terminate the SSO Work of a particular Defendant once that Defendant has performed such
26 SSO Work for a period of 10 Calendar Years or more from the Effective Date. In the event
27 that the United States' motion for partial termination of the SSO Work obligations of a
28

1 particular Defendant is granted, that Defendant shall no longer be responsible for performing
2 SSO Work under the Decree, and shall not be subject to stipulated penalties assessed under
3 Paragraph 186 for SSOs that occur after the date such motion is granted. However,
4 Plaintiffs and Intervenors may seek administrative and civil penalties for such SSOs under
5 applicable law.

6 230. Defendants shall achieve final compliance with all terms of this Consent Decree no later
7 than December 15, 2036, which is the deadline to submit the portion of the Annual Report
8 containing Compliance WWF Output Test results for the Oakport WWF. Defendants shall
9 demonstrate final compliance by showing that Defendants: (a) have completed all Work
10 required under Sections VI-XVIII of this Decree, (b) have demonstrated based on the most
11 recent Compliance WWF Output Test for each WWF that the WWF's Output Ratio in a
12 simulation of the December 5, 1952 Storm is zero; (c) have demonstrated, for each WWF,
13 that the WWF has not experienced an actual discharge in any storm that did not exceed the
14 December 5, 1952 Storm since the time of the demonstration made under clause (b) of this
15 Paragraph; (d) have complied with all other requirements of this Consent Decree; (e) have
16 paid the civil penalties and any stipulated penalties previously demanded by the United
17 States pursuant to Section XX and not paid; and (f) have paid any Court-ordered award, if
18 any, of attorneys fees and/or costs. Upon such a showing, the Defendants may serve upon
19 the United States and the Water Boards, with a copy to Intervenors, a Request for
20 Termination, stating that the Defendants have satisfied those requirements, together with all
21 necessary supporting documentation.

22 231. Reserved.

23 232. Following receipt by the United States and the Water Boards of Defendants' Request for
24 Termination, the Parties shall confer informally concerning the Request and any
25 disagreement that the Parties may have as to whether Defendants have satisfactorily
26 complied with the requirements for termination of this Consent Decree. If the United States,
27 after consultation with the Water Boards, agrees that the Decree may be terminated, the
28

Parties who are in agreement shall submit, for the Court's approval, a joint stipulation and proposed order terminating the Decree.

233. If the United States, after consultation with the Water Boards, does not agree that the Decree may be terminated, Defendants may invoke Dispute Resolution under Section XXII of this Decree. However, Defendants shall not seek Dispute Resolution of any dispute regarding termination, under Section XXII, until 60 Days after service of its Request for Termination.

XXXI. PUBLIC PARTICIPATION

234. This Consent Decree shall be lodged with the Court for a period of not less than 30 Days for public notice and comment in accordance with 28 C.F.R. § 50.7. Plaintiffs reserve the right to withdraw or withhold their consent if comments regarding this Consent Decree disclose facts or considerations indicating that this Consent Decree is inappropriate, improper, or inadequate. Defendants and Intervenors consent to entry of this Consent Decree without further notice.

XXXII. SIGNATORIES/SERVICE

235. Each undersigned representative of each Defendant, the Water Boards, Intervenors, and the Assistant Attorney General for the Environment and Natural Resources Division of the Department of Justice certifies that he or she is fully authorized to enter into the terms and conditions of this Consent Decree and to execute and legally bind the Party he or she represents to this document.

236. This Consent Decree may be signed in counterparts, and its validity shall not be challenged on that basis.

XXXIII. INTEGRATION

237. This Consent Decree, including its appendices, exhibits and attachments hereto, constitutes the final, complete, and exclusive agreement and understanding among the Parties with respect to the settlement embodied in this Consent Decree, and this Consent Decree supersedes all prior agreements and understandings, whether oral or written,

1 concerning the settlement embodied herein. Other than Deliverables that are submitted
2 pursuant to this Consent Decree, no other document and no other representation,
3 inducement, agreement, understanding, or promise constitutes any part of this Consent
4 Decree or the settlement it represents, nor shall they be used in construing the terms of this
5 Consent Decree.

6 **XXXIV. HEADINGS**

7 238. Headings to the sections and subsections of this Consent Decree are provided for
8 convenience and do not affect the meaning or interpretation of the provisions of this Consent
9 Decree.

10 **XXXV. FINAL JUDGMENT**

11 239. Upon approval and entry of this Consent Decree by the Court, this Consent Decree shall
12 constitute a final judgment between the Parties. The Court enters this judgment as a final
13 judgment under Fed. R. Civ. P. 58.

14 Dated and entered this ____ day of _____, 2014.

APPENDIX C

Urban Runoff Diversion Project

Urban Runoff Diversion Project

I. Project Definition

A. Project Description

The Urban Runoff Diversion Project (Project) will divert dry weather urban runoff flows to the EBMUD Main Wastewater Treatment Plant (MWWTP) in Oakland for treatment.

B. Project Location

EBMUD will divert flows from the Ettie Street pump station, located at the intersection of Ettie Street and 34th Street in Oakland. The Ettie Street pump station is owned and operated by the Alameda County Flood Control and Water Conservation District (ACFC&WCD).

C. Design Criteria

EBMUD will design and construct a pumping system at the Ettie Street pump station to divert a portion of dry weather flow to the EBMUD MWWTP. The flow will be pumped from the wet well via a new force main to EBMUD's Wood Street interceptor. Based on recent average daily flow data, the facility will be designed to divert up to 0.5 MGD.

D. Treatment

Flows diverted by the Project will be conveyed to EBMUD's MWWTP in Oakland, where they will be mixed with domestic wastewater and undergo standard treatment. No special treatment will be provided for Project flows.

E. ACFC&WCD Approval

Implementation of the Project is contingent upon the execution of an agreement with the ACFC&WCD. If EBMUD and the ACFC&WCD are not able to reach an agreement regarding the Project, or if the ACFC&WCD terminates the Project for any reason, EBMUD shall notify the EPA and the Regional Water Board within 48 hours. Within 90 days, Defendants shall submit to Plaintiffs an alternative mitigation project in accordance with Consent Decree Paragraph 135

1 (Urban Runoff Diversion Project) and Section XIX of the Consent Decree (Review and Approval of
2 Deliverables).

3 II. Implementation Schedule

4 A. Project Plan

5 EBMUD will prepare and submit to the EPA and the Regional Water Board a Project Plan within
6 120 Days after the Effective Date of the Consent Decree. The Project Plan shall include figures and
7 descriptions of the work to be done and a schedule with milestones and corresponding dates.

8 B. Completion of Construction

9 EBMUD will notify the EPA and the Regional Water Board when it has completed construction of
10 the Project and has begun operational testing.

11 C. Project Commissioning

12 Within 45 Days following commissioning of the Project (the date the Project becomes operational
13 following the completion of startup testing), EBMUD will notify the EPA and the Regional Water
14 Board when it has completed start up and commissioning of the Project and the Project is
15 operational. EBMUD will commission the Project by September 30, 2017.

16 D. Term

17 EBMUD shall operate the Project through December 31, 2035.

18 III. Operating Parameters

19 A. Dry Season Operation

20 EBMUD will operate the Project for the duration of the Dry Season, here defined as April 16th
21 through November 30th. EBMUD is not obligated to operate the Project during rainfall events that
22 occur during the Dry Season.

23 B. Operation During Wet Season

24 EBMUD will make reasonable efforts to operate the Project during dry periods of the Wet Season,
25 here defined as December 1st through April 15th, while attempting to avoid impacts to the Regional
26 Wastewater Collection and Transmission System and to wastewater treatment facilities.

27 C. Reliability

28

1 EBMUD shall use best efforts to operate the Project for the full extent of the Dry Season. However,
2 EBMUD may be required to perform occasional maintenance on the Project facilities, requiring a
3 temporary shutdown of the Project. EBMUD will operate the Project for 90% of all available hours
4 during each dry weather season, not including storm events and circumstances described in Sections
5 III(D) and III(E) below. This reliability requirement does not apply during the Wet Season.

6 D. ACFC&WCD Shutdowns

7 EBMUD is not required to operate the Project during shutdowns that are required, requested, or
8 caused by the ACFC&WCD. EBMUD shall notify the EPA and the Regional Water Board within
9 48 hours of any such shutdown that EBMUD determines poses a substantial threat to the Project's
10 ability to provide the anticipated environmental benefit. Any such notice shall provide the reason(s)
11 and basis for the shutdown. EBMUD will resume Project operation as soon as practicable following
12 the shutdown.

13 E. Suspension of Operation

14 EBMUD shall have the right to suspend operation of the Project under the following circumstances:

- 15 1. EBMUD reasonably believes that operation of the Project is contributing pollutants
16 that have caused or threaten to cause a permit violation;
- 17 2. EBMUD reasonably believes that operation of the Project has caused or threatens to
18 cause a significant process upset at EBMUD's wastewater treatment plant; or
- 19 3. EBMUD reasonably believes that continued operation of the Project constitutes a
20 threat to employee health and safety.

21 If EBMUD suspends operation of the Project under any of the circumstances outlined above,
22 EBMUD will notify the EPA and the Regional Water Board within 48 hours and provide the
23 reason(s) and basis for the suspension. EBMUD will resume Project operations as soon as
24 practicable after the circumstances that resulted in the suspension no longer pose an imminent or
25 potential threat. If EBMUD does not resume Project operations within 90 Days, then EBMUD shall
26 submit to Plaintiffs a plan for returning the Project to operation, or Defendants shall submit to
27 Plaintiffs an alternative mitigation project in accordance with Consent Decree Paragraph 135
28

1 (Urban Runoff Diversion Project) and Section XIX of the Consent Decree (Review and Approval of
2 Deliverables).

APPENDIX D

EBMUD Wet Weather Facilities SELF-MONITORING PROGRAM

I. Description of Sampling and Observation Stations

A. EFFLUENT STATIONS

Stations	Description
E-001	At any point in the Pt. Isabel WWF outfall where all waste tributaries to that outfall are present (may be the same as E-001-D)
E-002	At any point in the San Antonio WWF outfall where all waste tributaries to that outfall are present (may be the same as E-002-D)
E-003	At any point in the Oakport WWF outfall where all waste tributaries to that outfall are present (may be the same as E-003-D)
E-001-D	At any point in the Pt. Isabel WWF outfall at which adequate disinfection has taken place
E-002-D	At any point in the San Antonio WWF outfall at which adequate disinfection has taken place
E-003-D	At any point in the Oakport WWF outfall at which adequate disinfection has taken place

B. UNTREATED SEWAGE OVERFLOWS AND SPILLS

Stations	Description
OV-1	Oakland Inner harbor overflow structure at Alice Street
OV-2	Oakland Inner harbor overflow structure at Webster Street
OV-3	Overflow structure at Elmhurst Creek
OV-4	Overflow structure at San Leandro Creek
OV-5	Overflow structure at Temescal Creek
OV-X	Any sewerage overflow locations, such as manholes, pump stations, etc.

II. Schedule of Sampling, Analysis and Observations

Effluent sampling is required only during discharge events lasting more than one hour. For monitoring purposes, a discharge ceases if there is no effluent flow from the facility for a period of at least 24 hours. Effluent flow after a 24-hour cessation constitutes a new discharge.

The schedule of sampling, analysis and observation shall be that given in Tables 1 and 2 below.

Table 1

Sampling Station		E-001 to E-003	E-001-D to E-003-D
Type of Sample		GRAB	GRAB
Parameter	Units		
Flow Rate	mgd	Cont.	
pH	pH units	E	
Total Coliform	MPN / 100 ml	M	
Chlorine Residual	mg/L		Cont.

100 milliliters

III. Specifications for Sampling, Analysis and Observations

Sampling, analyses and observations, and recording and reporting of results shall be conducted in accordance with the schedule given in Table 1 of this SMP, and in accordance with the following specifications, as well as all other applicable requirements given in this SMP. All analyses shall be conducted using analytical methods that are approved in 40 CFR part 136, and that provide quantification of sampling parameters and constituents sufficient to evaluate compliance with applicable effluent limits.

A. Flow Monitoring.

Flow monitoring shall be conducted by continuous measurement of flow and reporting of the following measurements:

1. Each Occurrence:

a. Total Discharge (MG)

b. Hourly Discharge Flow (mgd)

2. Monthly: Total Discharge volume for the calendar month.

B. Total Coliform Monitoring. Because of the difficulty of analyzing coliform samples from an intermittent discharge within the maximum holding period, sampling for total coliform may be taken at any time during the discharge.

1 C. Chlorine Residual Monitoring.

2 During all times when chlorination is used for disinfection of the effluent, effluent
3 chlorine residual concentrations shall be monitored continuously, or by grab samples
4 taken hourly. Chlorine residual concentrations shall be monitored and reported for
5 sampling points both prior to and following dechlorination.

6 **IV. Reporting Requirements**

7 A. Written reports, electronic records, strip charts, equipment calibration and maintenance
8 records, and other records pertinent to self-monitoring program requirements, shall be
9 maintained by the Discharger in a manner and at a location (e.g., wet weather facilities
10 or Discharger offices) such that the records are accessible to Board staff. These records
11 shall be retained by the Discharger for a minimum of three years. The minimum period
12 of retention shall be extended during the course of any unresolved litigation regarding
13 the subject discharges, or when requested by the Board or by the Regional Administrator
14 of the U.S. EPA, Region IX.

15 B. Records to be maintained shall include the following:

16 1. Parameter Sampling and Analyses, and Observations

17 For each sample, analysis or observation conducted, records shall include the
18 following:

- 19 a. Parameter
- 20 b. Identity of sampling or observation station, consistent with the station
21 descriptions given in this SMP.
- 22 c. Date and time of sampling or observation.
- 23 d. Method of sampling (grab, composite, other method)
- 24 e. Date and time analysis started and completed, and name of personnel or contract
25 laboratory performing the analysis.
- 26 f. Reference or description of procedure(s) used for sample preservation and
27 handling, and analytical method(s) used.
- 28 g. Calculations of results.
- h. Analytical method detection limits and related quantitation parameters.
- i. Results of analyses or observations.

2. Flow monitoring data

For all required flow monitoring, records shall include the following:

- a. Total flow or volume, for each Day.
- b. Hourly flow (mgd)
- c. Duration of each discharge

3. For bacteriological analyses:

- a. Date and time of each sample collected
- b. Wastewater flow rate at the time of sample collection
- c. Results of sample analyses (coliform count)

4. For chlorination process, at least daily average values for the following:

- a. Chlorine residual in contact basin (mg/L)

C. For each calendar month, a self-monitoring report (SMR) shall be submitted to the
Board in accordance with the following:

1. The report shall be due 30 Days after the end of each calendar month, covering that
calendar month.
2. Letter of Transmittal: Each report shall be submitted with a letter of transmittal. This
letter shall include the following:

- a. Identification of all violations found during the monitoring period;
- b. Details of the violations: parameters, magnitude, test results, frequency, and dates;
- c. The cause of the violations;
- d. Discussion of corrective actions taken or planned to resolve violations and prevent recurrence, and dates or time schedule of action implementation. If previous reports have been submitted that address corrective actions, reference to such reports is satisfactory; and
- e. Signature: The letter of transmittal shall be signed by the Discharger's principal executive officer or ranking elected official, or duly authorized representative, and shall include the following certification statement:

"I certify under penalty of law that this document and all attachments have been prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. The information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

3. The report shall contain results of analyses and observations, including tabulations of all required analyses and observations, including parameter, sample date and time, sample station, and test result.
 4. The Discharger shall electronically submit SMRs using the State Water Board's California Integrated Water Quality System (CIWQS) Program Web site (<http://www.waterboards.ca.gov/ciwqs/index.html>). The CIWQS website will provide additional directions for SMR submittal in the event of a service interruption for electronic submittal.
- D. Routine wet weather discharges from a WWF are not considered unauthorized discharges for purposes of reporting when the discharge is treated as designed by the WWF. The Discharger shall report any discharge to a drainage channel or a surface water from a WWF when the discharge is: (a) from a WWF that is not operating as designed to achieve compliance with total coliform limits or (b) in fact not complying with total coliform limits or (c) a spill or release of untreated wastewater or hazardous substances as defined by Water Code section 13050(p). Such report shall be made as soon as possible, but not later than two (2) hours after becoming aware of the discharge, spill or release, to the California Office of Emergency Services and the local health officer or directors of environmental health with jurisdiction over the affected water bodies.

Notes:

- 1) Subject to modification under Paragraph 54(a) of the Consent Decree.
- 2) Subject to modification under Paragraph 64(a) of the Consent Decree.

APPENDIX G**Alameda Collection System Grid and Non-Grid Map**

The gravity sewer mains in the City of Alameda collection system are classified into two basic types: “grid” and “non-grid”. The sewers in the grid system are characterized by having multiple pathways for flow should a temporary pipe blockage and flow backup occur. This allows the flow to be bypassed to another, non-obstructed sewer main and be conveyed downstream in another direction, thereby preventing a sanitary sewer overflow. Approximately 60 percent of the sewers in the main Alameda collection system are part of the grid system (Alameda Point is a non-grid system). Each pipe is flagged as “grid” or “non-grid” in the City’s geographic information system (GIS) based on the configuration of the surrounding system. The map on the following page shows the locations of the grid and non-grid sewer mains in the system.

[See following page]
