This is an e-mail that I received and just noticed was not cc'ed to water shed.
I have related their intent to you but this is , as they say, from the horse's mouth.
Case number is CP13-163. It is a Cat IV.
When we get plans I would like to see if it can be downgraded, and would appreciate the process required to do so.

Subject: 4123 St Andrews Road Update

Hi Moe,
To reiterate what we spoke about this morning. The current state of affairs on our landscape project as I understand it is that my husband John, our landscaper –Jesus, and the engineer Gautam met this week with Dexter Hom. We are engineering a backfill of the area that now holds the forms for the retaining wall. As you will remember, we were instructed to build these forms by Tom Espinosa, but now we have been directed through discussions with you and others that an elevated deck will be more appropriate for our needs as it will not create any additional impervious surface and will not trigger a grading permit. We have a landscape designer working on the design of the deck and will be submitting this shortly. Also Jesus Martinez is working to update the Creek protection plan to remove the cistern and perforated pipe as this will not be necessary with the elevated deck design.

My husband, John Johnson will be taking the lead in communications. Please feel free to contact him at 415 722 3722 or Johncejohnson@gmail.com for any reason.
Thank you very much for your help.
