Subject: FW: Port of Oakland Maritime Operations Update 8/17/14

Please be advised of the following update regarding the situation at the Port of Oakland. A spontaneous demonstration of approximately 150-200 individuals occurred which resulted in labor shifts not reporting to the SSA Terminal to discharge cargo from the Zim Lines vessel. This situation remains fluid and we are anticipating that there may be an additional call from the organizers of today's and Saturday's events to have people assemble in the seaport tomorrow (Monday) morning. We're continuing to monitor such broadcasts and are working with law enforcement to secure the terminal gates and labor entrances as needed to ensure the flow of commerce.

More updates to come as information is available. Don't hesitate to contact me if you have any questions.

Thank you,

Matt Davis

Port of Oakland Maritime Operations Update 8/17/14

Dear Maritime Stakeholder:

At about 6:00 pm today, protestors started demonstrating in the Port's Maritime area (seaport) at the Oakland International Container Terminal (Berths 55-59) related to the Gaza-Israel conflict in the Middle East. As of 8:00 pm, the protestors remain in front of the terminal gates and labor did not report to work at this terminal. All other marine terminals are operating normally. Port staff is monitoring the situation closely and will send updates as more information becomes available or the situation changes.

Best Regards,
