April 28, 1977

ITEM 14: Request of Mr. John E. Coyle for variance from provisions of Section 702 (b) of the Oakland Building Code, relating to open frame roofs, in connection with the construction of the new Community Building, Greek Orthodox Church, located at 4700 Lincoln Avenue; building permit C92532.

Presentation was made by Mr. John E. Coyle and Mr. Robert F. Olwell.

MOTION by Mr. Long, seconded by Mr. Peterson, that request for variance be granted to permit the open frame roof as shown on plans submitted because the possibility of infiltration is minor; very little dust would come out of the fibreglas because it is a reasonable installation, and because the expanded metal has openings of 1".

MOTION PASSED by unanimous vote of Board members present.

ITEM 15: Request of Mr. John E. Maghetti and Mr. Richard N. Cober, Oakland Village Corporation, for variance from provisions of Section 3305 (c) of the Oakland Building Code, relating to rise and run of stairways, in connection with alterations to the retail shop space G-210 and G-212 at the Jack London Village, #55 Alice Street; building permit C92296.

Presentation was made by Mr. John E. Maghetti and Mr. Richard N. Cober.

MOTION by Mr. Long, seconded by Mr. Peterson, that request for variance be granted based on Staff's willingness to support the applicant's request, provided some type of barrier is provided to prevent unauthorized persons or the general public from using this stairway.

MOTION PASSED by unanimous vote of Board members present.

ITEM 16: Request of Mr. John H. Muir for variance from provisions of Section 3305 (c) of the Oakland Building Code, relating to rise and run of stairways, in connection with the construction of a new dwelling located at 1500 West View Drive; building permit C90353.

Mr. John H. Muir was present.

MOTION by Mr. Long, seconded by Mr. Peterson, that request for variance be granted based on the statements of Staff and also of the applicant, recognizing the risers are slightly over 8" after viewing the pictures submitted; and because the rise and tread on the stairway are reasonably uniform.

MOTION PASSED by unanimous vote of Board members present.
