I expect you have already seen this reference information, but just in case.

Scott.

Important message to our users

On January 29, 2016, we will end support for the Google Maps Engine (GME) product. You will be able to use your existing GME project as well as the GME API through this date. **After January 29, 2016, however, GME will be deactivated and no longer available for use.** My Maps (formerly Google Maps Engine Lite) is not affected and will remain available.

Effective immediately, we will no longer be allowing new free signups. However, you will be able to use your existing *free* GME project as well as the GME API through January 29, 2016.

Going forward, we will not be creating new Maps Gallery publisher pages and existing publisher pages will be removed from the Gallery in the near future. New GME map submissions to the Google Maps Gallery will no longer be available. Note that if you unpublish a map, you will not be able to resubmit the GME map to publish again after.

Please find the following potential alternative solutions for some GME use cases below (additional options will be added as they are scoped):

- [Create a map using Google My Maps](#)
- [Building spatial applications with Google Cloud SQL and Google Maps API](#)
- [Serving raster layers on Google Cloud Platform](#)
- [Building a store locator with the Google Maps API and Cloud SQL](#)

By default, Google will remove any data from your GME project once support ends on January 29, 2016. Please review this [technical whitepaper](#) for more details on data removal. Data may be exported from your GME project using the instructions in this [Help Center article](#). You may also export data from GME to Google Cloud SQL using interoperability software such as [Geospatial Data Abstraction Library](#) (GDAL) or Safe Software [FME Desktop](#). Visit this [Help Center article](#) for more information on FME Desktop.

For additional questions, feel free to reach out to our [Google Maps Engine Users group](#).

Subject: Re: Google - City of Oakland Intro

Thanks, Chelsea.

Brian - Are you available Friday afternoon? We can discuss options.

I expect you have already seen this reference information, but just in case.

Scott.

Important message to our users

On January 29, 2016, we will end support for the Google Maps Engine (GME) product. You will be able to use your existing GME project as well as the GME API through this date. **After January 29, 2016, however, GME will be deactivated and no longer available for use.** My Maps (formerly Google Maps Engine Lite) is not affected and will remain available.

Effective immediately, we will no longer be allowing new free signups. However, you will be able to use your existing *free* GME project as well as the GME API through January 29, 2016.

Going forward, we will not be creating new Maps Gallery publisher pages and existing publisher pages will be removed from the Gallery in the near future. New GME map submissions to the Google Maps Gallery will no longer be available. Note that if you unpublish a map, you will not be able to resubmit the GME map to publish again after.

Please find the following potential alternative solutions for some GME use cases below (additional options will be added as they are scoped):

- [Create a map using Google My Maps](#)
- [Building spatial applications with Google Cloud SQL and Google Maps API](#)
- [Serving raster layers on Google Cloud Platform](#)
- [Building a store locator with the Google Maps API and Cloud SQL](#)

By default, Google will remove any data from your GME project once support ends on January 29, 2016. Please review this [technical whitepaper](#) for more details on data removal. Data may be exported from your GME project using the instructions in this [Help Center article](#). You may also export data from GME to Google Cloud SQL using interoperability software such as [Geospatial Data Abstraction Library](#)(GDAL) or Safe Software [FME Desktop](#). Visit this [Help Center article](#) for more information on FME Desktop.

For additional questions, feel free to reach out to our [Google Maps Engine Users group](#).

Hi Scott,

Just wanted to make sure you got this. Who can we connect Brian with at Google to discuss his current GME, possible extensions, and the Cloud Compute program? His renewal is only a few weeks away so he needs to address solution alternatives ASAP.

Thanks!
Chelsea

Hi Scott,

I just wanted to introduce you (virtually) to Brian Kimball from the City of Oakland. He has some questions about his current GME license and would like more information on the new Google Cloud Computing program.

Would it be possible to set up a quick call for you or someone on your team to address Brian's questions?

Thanks!
Chelsea
