

# PDRD MOBILE ANNOTATION TRAINING

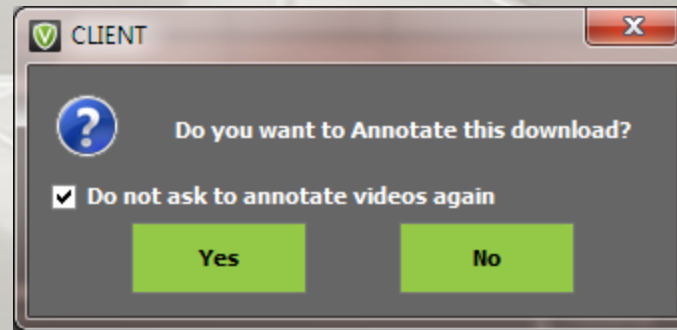

Beginning 27 July 2015 the following PDRD annotation fields will be mandatory. This can now be done from your vehicle and saved to your camera prior to clearing a call.

- Case Number

This will require the entry of the RD # or Inc incident number in it entirety . While downloading your video this information can be entered simultaneously.

*Most of you have disabled the below annotation box, which can be re-enabled to simplify the process of adding RD# and Inc #. If you choose not to re-enable the annotation box, the RD # / Inc # can still be entered as previously done.*

If you wish to have it re-enabled follow the next set of instructions.

Log into the client and Click File the Settings

This dialog box will open, check as indicated below and then ok.

The screenshot shows a 'Settings' dialog box with three tabs: 'General', 'Communication', and 'File List Columns'. The 'General' tab is active. It contains three sections: 'Cache Settings', 'Server location', and 'Annotate Video'. In the 'Cache Settings' section, the 'Local cache directory' is set to 'C:/Users/odb8506/VIEVU/VIEVU VERIPATROL Client/' with a 'Browse...' button. In the 'Server location' section, the 'Use computer default' checkbox is checked, the 'Server address' is 'pdpabviewusvr1', and the 'Port' is '43690'. In the 'Annotate Video' section, the 'Prompt to annotate videos during download' checkbox is checked. A red arrow points from this checkbox to the text 'Check this box Click "OK"'. Another red arrow points from this text to the 'OK' button. A small blue arrow points to the 'OK' button.

**Settings**

## STARTING THE VERIPATROL MOBILE APPLICATION

To start the VERIPATROL Mobile application, double click on the “VIEVU Mobile” icon located on the vehicles Laptop. Alternatively the program can be started by clicking “Start”, selecting “All Programs”, selecting “VIEVU VERIPATROL” and clicking on “VERIPATROL Mobile.”

***Note: The camera must be connected to the computer and in the “ON” position to be downloaded.***

Add Details To Videos

The file annotation window will appear. Select a category, add a case number, add comments, mark the video to never be deleted or for lockdown. When finished, click the “Next Video” button to move to the next video. When complete, the video files are NOT removed from the camera. The video files and the metadata entered will remain on the camera. The camera will need to be downloaded with the VERIPATROL Client software for permanent storage.
