Subject: City of Oakland proposed PEV infrastructure building codes and cost-effectiveness study

Mr. Murelli-

Nice to meet you at the Oakland Builders Alliance meeting earlier this month to discuss potential PEV readiness building codes. I appreciate your thoughts on the potential cost of this infrastructure and would like to discuss with you further so that we can compare the numbers from a study that Energy Solutions prepared with your experience.

Please let me know when is convenient for you for a follow-up discussion. I am available most of this week, out the last week of December, and back January 2nd.

Thanks.

Best,
Ed
