**Attachments:** EV Ready Outreach List.xlsx

Great, thank you Ed.

Outreach list attached; technical stakeholders' email addresses highlighted in yellow

The Energy Solutions report format applied to the Permitting & Inspection Report is fine. I'll ask our Outreach team for imagery to suggest for the cover and optionally for Energy Solutions to utilize within the report if feasible within time constraint.

Thank you,

**Barry Hooper**

**Subject:** SF meeting action items for Ed, and please send email contacts for meeting attendees

Barry, Lars –

Congratulations on organizing an impressive group of stakeholders to provide input. Glad to hear overall support for the proposed code revisions. Here are my action items.

Cost-model:

- Ed will follow-up with interested stakeholders to develop the detailed inputs for in-slab construction. **Please send me the email contacts for meeting attendees.**
- Ed will prepare a stand-alone report focused on the San Francisco / Bay Area, with a summary of the model methodology and references to the existing report for readers wishing additional details. Ideal timeline is before November 14<sup>th</sup> meeting with Mayor's Office.
- Ed will check with PG&E regarding whether they have any objection to customizing the format including SF designing the cover – see attached draft permitting & inspection report for example of basic formatting by Energy Solutions for the content of a non-PG&E report.
- Ed will check on whether the SOW with PG&E includes implementation guidelines.

Best,  
Ed
